RAJALAKSHMI ENGINEERING COLLEGE DEPARTMENT OF AUTOMOBILE ENGINEERING

07.06.2022

Submitted to the Principal

It is proposed to conduct guest lecture on "HEALTH AND HYGIENE TALK - "FOOD SAFETY AND STANDAREDS" ON 14.06.2022. This guest lecture will be useful for students. Mrs. Hema Malini S Assistant professor, Department of Food technology will be acting as coordinator for this workshop.

HOD/Food Technology

Denals John

Dr. K.RAMALAKSHMI Professor & Head Department of Food Technology Rajalakshmi Engineering College Thandalam, Chennai 602 105.

BROCHURE

HEALTH AND HYGIENE TALK

3.00 PM 14th JUNE, 2022

on

Food Safety and Standards

Organized by

Department of Food Technology

In association with

Institution's Innovation Cell, REC Industry Institute Interaction Cell, REC

Speaker:

Mrs. Hema Malini S

Assistant Professor Department of Food Technology Rajalakshmi Engineering College, Chennai

Venue : Main Seminar Hall

Target Audience: First year students-2021-25

J. W. Herryon

PROFILE OF RESOURCE PERSON

Mrs. HEMA MALINI. S

Mrs. Hema Malini. She did her Bachelor of Technology in Food Technology in A.C. Tech College of Engineering, Anna University, Chennai and Master of Technology in Food Science and technology from NIFTEM-T. She has 3 years of academic experience; she was also awarded for the "Best Faculty Award". She skilled in the area of Texture Analysis, Statistical SPSS, Image J software, LATEX programming. She was also awarded as the best faculty award. She was also a member of AFSTI —Association of food Scientist and Technologist.

AN AUTONOMOUS INSTITUTION

Why Food Safety and Standards Act, 2006?

- Multiplicity of food laws, standard setting and enforcement agencies for different sectors of food
- Overlapping Quality / Safety standards
- Standards restricting innovation in food products
- Thin spread of manpower, poor laboratory infrastructure and other resources non-conducive to effective fixation of standards
- Standards rigid and non-responsive to scientific advancements and modernization
- Poor information dissemination to consumer level

India's Strategy Set up the Food Safety and Standards Authority

FSS ACT 2006

- The Act consists of 12 chapters (101 Articles);
- Preliminary: definitions Food Safety and Standards Authority of India
- General principles of food safety (Rish based; Science-based) General provisions as to food: additives, residues provibitions
- Provisions relating to import (Section 25)
- Special responsibilities as to food safety (FBOs, recall)
 Enforcement of the Act (States structure, licensing, powers)
- Analysis of food: laboratories: sampling and public analysis
- Offences and penalties
- 10. Adjudication and food safety appellate tribunal
- 11. Finance, accounts, audits and reports
- 12 Miscellaneous (Other powers and resp

- Schedule 4: Hygiene Requirements

Schedule 4: Hygiene Requirements

PART I – for Petty Food Businesses (registrations)

- for manufacturers / processors / handlers
- for street vendors and units other than manufacturers / processors

PART II - for manufacturers / processors(licenses) PART III – for milk / milk products FBOs PART IV – for meat / meat products FBOs PART V – for catering / food service establishments

Food Safety and Standards (Packaging and Labeling) Regulations, 2011

- DPackaging requirements of various pre packaged food products are described
- DPrescribes specific labelling requirements for infant food, infant milk substitute, edible oils and fats and other products
- DRequirement of Nutritional information on the
- DDefines the Health claims and Nutrition claims

Contd...

These regulations arein the process of comprehensive revision with the objective of having three different regulations with respect

- Packaging specifications(notified);
- Labeling and Display;
- · Advertisement and Claims (notified).

Non-conformance may lead to

- 1 Under FSS (Licensing and Registration of Food Businesses)
 - Notice / rejection of application during inspection for licens Notice / cancellation of license during periodic food safety audit by the Licensing Authority
- 2. Under Section 56 of FSSA
 - Penalty of up to Rupees one lakh for unhygienic or unsanitary processing or manufacturing of food

Label Must Carry...

- Name of the food
 List of ingredients in descending order
 Nutritional information
 Veg / Non-Veg Togo of appropriate dimensions
- Specific declaration of food additives and colors / Re-
- Name and complete address of manufacturer
- National and drained weight by weight of Volume
 Lot No / Code No / Batch Identification
 Date of Manufacturing / Packing
 To Best Before Other than by Cute
- 11. Country of Origin for Imported food
- 12 Instructions for use

FOOD SAFETYAND STANDARDS (PACKAGINGAND LABELING) **REGULATIONS, 2011**

Nutritional Information

- Nutritional information is the declaration of nutritional composition of the food. It provides an idea of the nutrition that can be derived from that particular article of food
- Nutritional information should always be stated in numerical terms. The nutrition information for a particular food article is declared per 100g or 100ml or per serving of the food on

THREE PARTS: (1) Food Standards; (ii) Food Additives; and.

- I*PARF There are 13 product entegories in the chapter and standards for about 377 products have been provided. following slides mention only the names product entegories—
- · Dairy products and analogues
- · Fata, oils and fat emplsons
- · Fruits and vegetable products . Cereals and cereal products

J. D. Henrylon

- · Sweets and confectionary
- · Salt, spices and related products
- Beverages (other than dairy and fruits & vegetables based)
- · Other food products and ingredients
- Proprietary food

> METAL CONTAMINANTS: This regulation prescribes the limits for Heavy Metals and Metal Contaminants for various foods and commodities

- 2 Arsenic
- 1. Copper 4. Cadmium
- 5. Mercury
- 6: Methyl mercury
- 7: Chromium
- 8. Nickel

2#PART: This part deals with the use of Food Additives in various categories of food products. These are prescribed in Tables 1 - 15 of Appendix A.

- It also contains a GMP Table applicable to food products.
 It also has a person but in the America (e.g. butter milk).
- The list specifies -
- (i) their limits
- (ii) some specific label declarations respect to certain food additives (e.g., MSG)

Definition: "Contaminant" means any substance not intentionally added to food, but which gets added to articles of food in the process of their production (Including operations carried out in crop husbandry, animal husbandry and veterinary medicine), manufacture, processing, preparation, treatment, packing, packaging transport or holding of articles of such food as a result of environmental contamination. environmental contamination.

> CROP CONTAMINANTS AND NOTS

This defines Crop Contaminants and specifies their limits for foods -

- Contaminants: Atlatoxins (Lotal, M.), Ochratoxin A. Patulin, DON
- NOTS: Agaric acid, Hydrocyanic acid, Hypericine, Saffrole
- Also prescribes the limit for Polychlorinated Biphenyls (PCBs) and Polycyclic Aromatic Hydrocarbons (PAH) compounds in fish products

3rd PART: This part prescribes the Microbiological requirements of various food products. These are contained in Appendix B.

- Mainly addresses high risk food products (fishery products, meat, poultry, dairy products)
- Other food products also including low moisture foods (fruit & vegetable products, dry fruits, spices)

This Regulation contains 3 parts that specify the limits in various foods:

- > METAL CONTAMINANTS: MLs for 9 Metal Contam
- > CROP CONTAMINANTS AND NATURALLY OCCURING TOXINS:
- . Limits for 5 Crop Contaminants
- · Limits for 4 naturally occurring toxins Limits for 3 PCBs and PAHs in fish products
- RESIDUES:
- MRLs for Pesticides
- Tolerance Limit for Antibiotics Regularly updated

RESIDUES: This lists out lumits for residues of

- 213 Pesticides
- 103 Vet. Drugs in
- · Prohibited list of antibiotics and other Pharmacologically Active Substances in sen foods including shrimps, pray or any other variety of fish and fishery products
- Limits for Antibiotics in Honey: Chloramphenicol, Narofurans and its metabolites, Sulphonamides, Streptomycin, Tetracycline, etc.
- · Limits of Bioloxins in fish and fishery products
- Limits of Histamine level in fishery products
- · Maximum level for Melamine

Recent Amendments

- Amended to prescribe 453 tolerance limits for 103 veterinary drugs in various foods
- Amended to prescribe tolerance limits for 76 antibiotics at 0.01 mg/kg at LOD by existing method of analysis.
- Also revisions to the prohibited list of antibiotics and veterinary drugs applicable to :
- meat and meat products
 poultry and eggs
- · sea foods including shrimps, prawns or any variety of

Upcoming Regulations

- Regulation on Food Labeling and Display
- · Regulation on Safe Food and Balanced Diet for Children in School
- Comprehensive Revision of Food Safety and Standards (Licensing and Registration of Food Businesses)

FOOD SAFETYAND STANDARDS (PROHIBITIONAND RESTRICTION FOR SALE)

Other Major Regulations

- Food Safety and Standards (Health Supplements, Nutraccuticals, Food for Special Dietary Use, Food for Special Medical Purpose, Functional Food and Novel Food) Regulations, 2016
- Food Safety and Standards (Food Recall Procedure) Regulations, 2016
- Food Safety and Standards (Food Import) Regulations, 2017
- Food Safety and Standards (Approval for Non-Specified Food and Food Ingredients) Regulations, 2017
- Food Safety and Standards (Organic Food) Regulations, 2017

Upcoming Guidelines

- Guidelines for On-line Marketing of Food Products (E-Commerce) (operationalized)
- Guidelines for Direct Selling of Food Products
- Guidelines on Providing Wholesome, Nutritious, Safe and Hygienic Food to School Children

> This Regulation deals with Restrictions and Probabilities on sale of 15 products. It also prescribes 22 conditions (restrictions prohibition.)

- Sale of certain admistures is prohibited prater in milk, butter in ghee, mixing two oils
- * Restrictions on use of certain ingredients (tobacco, meotine, acetylene gas kexari daul, argeniume seeds,
- Prohibition and restriction on sale of certain products frontied water without BIS mark, loose spices, loose blended edible oil, fresh fruit may be coaled with bees wax carnaula wax itselfac wax with limits)

Other Major Regulations

- Food Safety and Standards (Alcoholic Beverages) Regulations, 2018
- Food Safety and Standards (Food Safety Auditing) Regulations, 2018
- Food Safety and Standards (Recognition and Notification of Laboratories) Regulations, 2018
- Food Safety and Standards (Packaging) Regulations, 2018
- Food Safety and Standards (Advertising and Claims) Regulations, 2018
- Food Safety and Standards (Recovery and Distribution of Surplus Food Regulation, 2019

Thank you

Dr. Herry

Summary

Health and hygiene talk on food safety and standards was organized by the department of food technology in association with Institution's innovation cell & Industry institute interaction cell, REC. The session was handled by Mrs.Hemmalini of department of food technology. around 219 students attended the session at the main seminar hall. The session was about multiplicity of food laws, standard setting and enforcement agencies for different sectors of food. Overlapping Quality / Safety standards. Standards restricting innovation in food products. Thin spread of manpower, poor laboratory infrastructure and other resources non-conducive to effective fixation of standards. Standards rigid and nonresponsive to scientific advancements and modernization. Poor information dissemination to consumer level. Food Safety and Standards (Health Supplements, Nutraceuticals, Food for Special Dietary Use, Food for Special Medical Purpose, Functional Food and Novel Food) Regulations, 2016.Food Safety and Standards (Food Recall Procedure) Regulations, 2016.

Food Safety and Standards (Food Import) Regulations, 2017. Food Safety and Standards (Approval for Non-Specified Food and Food Ingredients) Regulations, 2017. Food Safety and Standards (Organic Food) Regulations, 2017. This Regulation deals with Restrictions and Prohibitions on sale of 15 products. It also prescribes 22 conditions (restrictions / prohibition)

Contains 3 main clauses: Sale of certain admixtures is prohibited (water in milk, butter in ghee, mixing two oils). Restrictions on use of certain ingredients (tobacco, nicotine, acetylene gas, kesari, daal, argemone seeds, cassia). Prohibition and restriction on sale of certain products. (Bottled water without BIS mark, loose spices, loose blended edible oil, fresh fruits may be coated with bee's wax / carnauba wax / shellac wax with limits).

RAJALAKSHMI ENGINEERING COLLEGE DEPARTMENT OF AUTOMOBILE ENGINEERING

07.06.2022

Submitted to the Principal

Personthed (B) 1/6/22

It is proposed to conduct guest lecture on "HEALTH AND HYGIENE TALK – FOOD SANITATION AND HYGINE" ON 14.06.2022. This guest lecture will be useful for students. Mrs. Hema Malini S Assistant professor, Department of Food technology will be acting as coordinator for this workshop.

HOD/Food Technology

Dr. K.RAMALAKSHMi Professor & Head Department of Food Technology Rajalakshmi Engineering College Thandalam, Chennai 602 105.

PROFILE OF RESOURCE PERSON

MRS. SRIMAGAL. A

Mrs. Srimagal. A has completed her UG in Food Process Engineering from NIFTEM-T, Thanjavur and master degree in Food process engineering National Institute of Technology (NIT), Rourkela, Odisha. She is a GATE qualified faculty. She has more than three years of academic experience in various engineering colleges in the food technology departments. She has publications on Effect of ethyl oleate assisted blanching and drying temperature on antioxidant properties of Bitter gourd, Effects of ethyl oleate and microwave blanching on drying kinetics of bitter gourd, Effect of light emitting diode treatment on inactivation of Escherichia coli in milk in SCOPUS indexed journal. She skilled in the area of MATLAB, SPSS, Mathematical Modelling using MATLAB.

Nutrition and Food

- Nutrition is a basic human need and a prerequisite to a healthy life.
- Since nutrition is bonded with food, it is essential to advocate nutrition in terms of foods, rather than nutrients.
- Emphasis has, therefore, been shifted from a nutrient orientation to the food-based approach for attaining optimal nutritional status.
- A proper diet is essential from the very early stages of life (Gestation peroid) for proper growth, development and to remain active.

Establishmen Food borne illness outbreak can cost an establishment thousands of pesos, it can even be the reason an establishment is forced to closed.

- · Loss of customers and sales
- · Loss of prestige and reputation
- Lawsuits
- · Increase insurance premiums
- Lowered employee morale
- · Employee absenteeism
- Increase employee turn over
- Embarrassment

What if.....

After eating lunch in a cafeteria, half of this class cannot come to class anymore because of the most of you are experiencing stomach ache, diarrhea, vomiting and fever.

Definition of terms

- Safety is overall quality of food fit for consumption. Sanitation is a health of being clean and conducive to health.
- Microbiology the branch of biology that deals with microorganisms and their effect on other microorganisms.

Dangers of food borne illness

- Food borne illness are the greatest danger to food safety. It could result to illness or diseases to an individual that would affect their overall health, work and personal lives.
- 1.Loss of family income
- 2.increased insurance
- 3.Medical expenses
- 4.Cost of special dietary needs
- 5. Loss of productivity, leisure and travel opportunities
- 6.Death or funeral expense

- Food Infection microbial infection resulting from ingestion of contaminated foods.
- Food Intoxication type of illness caused by toxins. Under favorable condition certain bacteria produce chemical compounds called
- Food Spoilage means the original nutritional value, texture, flavor of the food are damaged, the food become harmful to people and unsuitable to eat.
- · Food borne Illness A disease carried or transmitted to people by food.

J. W. Henry

Test your knowledge

- 1. Fish that has been properly cooked will be safe to eat
- 2. Cooking can destroy the toxins.
- 3. Copper utensils can cause illnesses when used to prepare acidic foods
- 4. Cleaning products may be stored with packages with foods
- Most biological toxins found in seafood, plants and mushrooms occur naturally, are not caused by the presence of microorganisms.

Physical Contaminant – any foreign object that accidentally find its way into food

- Hair Staple wire
- Glass fragments
- Dust
- Nails Earrings
- Plastics

Extraneous vegetable

• stones

Biological contaminant - may cause a food borne illness (bacteria, viruses, fungi, parasites, biological toxins)

- Sea food toxins
- · Mushroom toxins
- Clostridium Botulinum · Salmonella bacteria

Preventing Physical Contaminants

- · Wear hair restraint
- Avoid wearing jewelry when preparing, cooking and holding foods (ring, earrings)
- · Do not carry pencil or pen
- · Do not wear nail polish or artificial nails when working with foods
- · Clean can openers regularly
- · Remove staple wire in the receiving area
- Place shields on lights

Preventing Biological contaminant

- · Purchase foods only on reputable supplier
- · Do not use wild mushrooms
- · Maintain good personal hygiene
- · Observe proper hand washing
- Clean and sanitize equipment Maintain clean and sanitize facilities
- Control pests

Chemical Contaminant – a chemical substance that can cause food borne finess. Substances normally found in realaurant

- Pesticides
- · Cleaning product
- Sanitizers

When to wash hands?

- Beginning food preparation Putting on disposable gloves

- Using handkerchief or
- Handling inventory
- Handling raw foods Touching or scratching part of the body
- Coughing, sneezing Handling garbage
- **Touching dirty surfaces**

Stay home if someone is suffering from these illnesses:

- Hepatitis A
- Shigella
- E-Coli Infection
- Salmonella
- * Sick employees must not work with foods*

When hermful organisms from one food contaminate other foods. (raw meats, thawing meat on top of the shelf where it can drip on the other foods)

Preventing food to food contamination

- Store cooked foods that will not be cooked in the refrigerator on a higher shelf than raw foods.
 Bess to practice mix left over foods with fresh foods
- Wash fruits & veg, in a cold running water
- Do not let raw meat and raw vegetables be prepared on the same surface at the same time

Keeping Good Personal Hygiene

- Medicines should be kept inside the locker and away from foods
- Clean and cover cuts and wounds
- Never use bare hands when handling ready to eat foods
 Olsposable gloves should be used once
- Take a bath everyday
- Wear appropriate attire
- Refrain from wearing jewelry, make ups, and nail polish
 Observe proper hand washing procedures at all times

Equipment to Food Contamination

- How to prevent:
- Use separate cutting boards for different foods (meat- veg)
- Prepare raw foods in separate area from fresh and ready to eat foods
- Clean & sanitize equipment, work surfaces & utensils after preparing each foods
 Use specific containers for various food products.
- Make sure cloth and paper towel use for wiping spills are not used for any other purposes

Summary

Health and hygiene talk on food sanitation and hygiene was organized by the department of food technology in association with Institution's innovation cell & Industry institute interaction cell, REC. The guest Lecture was handled by Mrs.Srimagal of food technology department. Around 237 were participated in the event, the was conducted at the main seminar hall, REC. The session gave a clear idea on Safe food is a food which is free of contaminants and will not cause illness or harm. Our food is devitalized, coloured, filled with chemicals, drugs and synthetic ingredients, polluted by agricultural and environmental chemicals and are grown on impoverished land puffed up by chemical fertilizers. Moreover, the chemicals used are known to cause adverse effects in humans and animals. Therefore, all individuals involved in food handling should be trained in handling food safety. It is necessary to create and maintain hygienic and sanitary conditions to safeguard the food. Nutrition is a basic human need and a prerequisite to a healthy life. Since nutrition is bonded with food, it is essential to advocate nutrition in terms of foods, rather than nutrients. Emphasis has, therefore, been shifted from a nutrient orientation to the food-based approach for attaining optimal nutritional status. A proper diet is essential from the very early stages of life (Gestation period) for proper growth, development and to remain active.

BROCHURE

HEALTH AND HYGIENE TALK

9.00 AM 14th JUNE, 2022

on

Neuro Nutrition

Organized by

Department of Food Technology

In association with

Institution's Innovation Cell, REC Industry Institute Interaction Cell, REC

Speaker:

Mrs. Aruthra Devi G

Assistant Professor Department of Food Technology Rajalakshmi Engineering College, Chennai

Venue: Main Seminar Hall Target Audience: First year students-2021-25

PROFILE OF RESOURCE PERSON

MRS. ARUTHRA DEVI

Mrs.Aruthra Devi has completed her UG degree in Food Processing & Engineering from Karunya University, Coimbatore and master degree from in Food Technology from College of Food & Dairy Technology, TANUVAS, Chennai. She has more than three years of academic experience in various engineering colleges in the food technology departments.

Her area of interest includes Product Development, Functional food products, Nutraceutical products, Probiotics, Dairy technology. She had published three research papers in the reputed journal and participated many national and international conferences. She was qualified in UGS-NET 2020 and awarded with TamilNadu Veterinary and Animal Sciences University merit scholarship for pursuing M.Tech degree programme (2017-2019). She is the members of international societies like International Association of Engineers (IAENG), Institute for Engineering Research and Publication (IFERP) and Indian Dairy Association (IDA).

FACULTY FEEDBACK FORM

DEPARTMENT: FOOD TECHNOLOGY

Speaker Name	Ms ARUTHRA DEVIG
Designation	ASSISTANT PROFESSOR
Institution/University/Organization	RADALAKSHMI ENGINEERING COLLEGE
Title of the Lecture	NEURO NUTRITION
Date	14-06-2022 (14th Tune 2022)
Time	9.00 AM
Venue	MAIN SEMINAR HALL, REC.
Signature	Bancy.
Comments	Good Hospitality. Yery informative.
	very informative.

S.N. Hengo

Neuro Nutrition

- · Neuro-nutrition is the nutrition needed to achieve healthy brain and good neurocognitive function.
- · NN looks at how our foods affect our brains.
- NN = Neuroscience+ Nutrition

Neurological disorders such as Alzheimer's disease, mental fatigue and memory problems are prevalent across the world, and this opens the door to provide tailor-made products which cater to consumer's desire for better neuro nutrition.

(Ref:Wannee, 2016)

Brain

- Brain is where the performances begins and ends.
- It monitors and controls all the energy metabolism of the body and it never stops working.
- The human body needs around 200g of energy daily and about 130g of it is used up by the brain.
- Fuel of Brain = Glucose
- No storage capacity for its fuel.

Nutrition and Food

Nutrition is the master key to human health.

- the science that links food to health and disease.
- · Nutrition is a basic human need and a prerequisite to a healthy
- Since nutrition is bonded with food, it is essential to advocate nutrition in terms of foods, rather than nutrients.
- Emphasis has, therefore, been shifted from a nutrient orientation to the food-based approach for attaining optimal nutritional status.
- A proper diet is essential from the very early stages of life (Gestation peroid) for proper growth, development and to remain active.

(Ref: Food for thought- Debra Austin)

- Most of the weight of the dehydrated brain would come from fats, also known as lipids.
- · In the remaining brain matter, you would find proteins and amino acids, traces of micronutrients, and glucose.
- Omega 3 and 6(EFA) Prevent degenerative brain conditions- from diet.

(Ref:Human Anatomy - Dr.Matthew)

Perspheral nervous Activity Of Brain

- The brain pulls glucose from the blood stream by activating the stress systems who suppress insulin secretion, so more glucose stays available in the blood stream instead of being stored into the muscle or the fat tissue.
- · The body now pulls glucose from the food and when there is no food in the vicinity, the body moves and starts looking for food.
- All these mechanism function to ensure a more or less continious glucose level in the brain.
- Nerves- Neurons- Efferent- Afferent- Synapse (Ref:Human Anatomy - Dr.Matthew)

Neuro Diseases

A neurologic deficit refers to abnormal function of a body area. This altered function is due to weaker function of the nerves system_

"Neurodegenerative Disease" : caused by degeneration (dysfunction and death) of neurons within the brain

- Alzemier's Disease
- 2 Parkinson's Disease
- 3 Dementia & Cognitive decline etc...

Neurological disorders are now the leading source of disability globally which create the burden of neurodegenerative diseases.

Nutrition and Brain Health

- Nutrition can affect the brain throughout the life cycle, with profound implications for mental health and degenerative disease.
- · From entire diets to specific nutrients, everything affect brain structure and function.
- The Physical, chemical and physiological development of the brain evolve from the continuous interaction of genetic and environmental factors.

· The environmental conditions is concerned with providing energy and nutrients needed for cellular structures and various metabolic systems.

Alzemier's Disease

- Alzheimer's disease (AD) is characterized by a massive neuronal death causing memory loss, cognitive impairment and behavioral alteration that ultimately lead to dementia and death.
- Tau protein and beta amyloid "protein misfolding disorder"
- . The number of AD patients in the world is estimated to 16.8 million and is expected to increase up to 131.5 million by 2050.

(Sunil, 2018)

- variety of ways. • 2 major categories of change
- · Anatomically, various indices of the brain
- structure have been found to be decreased by moderate to severe malnutrition.
- Bio chemically, the nutrient supply available to the brain cells is reduced, producing metabolic abnormalities with malnutrition.
- An adequate intake of necessary nutrients (eg: micronutrients, EFAs) is beneficial whereas an excessive intake of someother (eg: sugar, saturated fat) is detrimental.

(Food and Natrition Board, Washington, D.C. 2010)

Parkinson's Disease

- Parkinson's disease is a disorder that affects nerve cells in the part of the brain controlling muscle movement
- NORMAL BRAIN FUNCTION

 - Cells in substantia nigra produce& release dopamine
 Dopamine released by SN neurons lands on neurons of other brain centers
 This is involved in regulation of movement.
- PARKINSON'S BRAIN FUNCTION
 - Cells of substantia nigra degenerate
 These cells can no longer produce adequate amounts of dopamine
 Results in loss of control of movements –Parkinson's disease
- In 2016, 6-1 million individuals had Parkinson's disease globally, compared with 2-5 million in 1990. (GBD 2016 Parkinson's Disease Collaborat)es (Aarsland, 2004)

- Energy metabolism of neurons –Glucose-Fasting- Liver glycogen-B vitamin biotingluconeogenic pathway.
- 2, Homocysteine metabolism-
- 3. Nerve Impulse Propagation- Speed of the nerve impulse- Mylenation-Mylein sheathconduit of electrical signal.
- Neurotransmitter synthesis- chemicaltransmits impulse-2 types- small amino acids- biogenic amines - vitamin Cnorepinephrine
- Neurotransmitter -bind-receptors on the cell membrane- receiving cell-gate like channel-flow of ion-receiving cell. (Fernando,2008)

MICRONUTRIENTS-VITAMINS & MINERALS

- Zinc is involved in many enzymatic reactions inside of the brain and it assists with the metabolization of omega $3s_{\rm s}$
- More than one third of the world's population is zinc deficient.
- Research has linked low dietary zinc intake to depressive symptoms-the lower the zinc levels, the greater the depression.
- Zinc levels are 30% lower in individuals with ADHD.
- Sources: pumpkin seeds, beans, nuts, oatmeal, egg yolks, fresh gingerroot etc

(Fernando, 2008)

Magnesium

- More than 60% of population are magnesium deficient.
- Magnesium plays an essential role in supporting brain plasticity, which is the sign of a youthful, flexible brain primed for optimal learning, memory, and cognitive function.
- Magnesium level are decreased by excess alcohol, salt, coffee, sugar, soda and antibiotics.
- Low levels of magnesium have been implicated in mood disorders, depression and suicide.
- Sources: wheat and oat bran. brown rice, nuts, dark leafy green vegetables etc.

(Fernando, 2008)

- Ascorbate (vitamin C) is a vital antioxidant molecule in the brain.
- The functions of ascorbate in the CNS and brain are numerous.
- It directly acts to scavenge oxygen- or nitrogen based radical species generated during normal cellular metabolism.
- This required for the enzymatic reaction that synthesis the neurotransmitter norepinephrine from dopamine.
- Sources-bell peppers, dark leafy greens, kiwis, broccoli, berries, citrus fruits, tomatoes, peas, papayas etc.

10 .00

(Fernando, 2008)

Gut Health

- The Brain and Gut are connected both physically and biochemically in a number of different ways.
- Gut and brain are connected through chemicals called neurotransmitters.
- "Second heain" because it produces many of the same neurotransmitters as the brain does, like serotonin, dopamine, and gamma-aminobutyric acid, all of which play a key role in regulating mood.
- Food consumption is regulated largely by dopamine and serotonin.
- It is estimated that 90% of serotonin is made in the digestive tract.
- · Neurotransmitters control feelings and emotions.
- Gut-brain axis is also connected through the immune system.
- · Enhancing gut bacteria improve your brain health,
- Probiotics are live bacteria that impart health benefits and that affect the brain are often referred to as "psychobiotics".

(Campbell, 2008)

- The Vit-D receptor is expressed in brain tissue, and is known to be important for normal brain development and function.
- Vitamin D deficiency may impair cognitive abilities and is a major problem worldwide, with an estimated one billion people having insufficient level.
- Cognitive impairment ,memory loss and Vitamin D deficiency are correlated.
- Sources: Cod liver oil, salmon, shrimp and egg yolk, etc

21 '30

(Fernando, 2008)

- Probiotics may help boost mood and cognitive function and lower stress and anxiety.
- Case: Alzheimer's patients who took milk made with probiotic bacteria species for 12 weeks scored better on a test to measure cognitive impairment compared with those who drank regular milk.(Frontiers in Aging Neuroscience)
- Beneficial gut bacteria promotes intestinal tract function, a healthy immune system and weight control
- The research on exact role probiotics play in the gut-brain axis is in its infancy.
- Probiotics may not only support a healthier gut, but a healthier brain, too.

J. W. Henry

Summary

Health and hygiene talk on neuro nutrition took place at Rajalakshmi Engineering College organized by the Department of food technology in association with Institution's innovation cell & Industry institute interaction cell, REC. Mrs. Aruthra Devi from department of the department of food technology handled the session. Around 201 students attended the session at the Main seminar hall, REC. The seminar encloses the science that links food to health and disease. Nutrition is a basic human need and a prerequisite to a healthy life. Since nutrition is bonded with food, it is essential to advocate nutrition in terms of foods, rather than nutrients. Emphasis has, therefore, been shifted from a nutrient orientation to the food based approach for attaining optimal nutritional status. A proper diet is essential from the very early stages of life (Gestation period) for proper growth, development and to remain active. Neuro-nutrition is the nutrition needed to achieve healthy brain and good neurocognitive function. NN looks at how our foods affect our brains. NN = Neuroscience+ Nutrition There has been a growing interest in using nutrition to improve mental functions. Neurological disorders such as Alzheimer's disease, mental fatigue and memory problems are prevalent across the world, and this opens the door to provide tailor-made products which cater to consumer's desire for better neuro nutrition. No single food is key to good brain health, but rather a combination of healthy foods is likely to help protect the brain. The pattern of whole diet over life span affects brain health. Half of the populations does not meet the recommended dietary allowance (RDA) of important brain vitamins and minerals, including calcium, magnesium, zinc, vitamin A, and Vitamin B6

RAJALAKSHMI ENGINEERING COLLEGE DEPARTMENT OF AUTOMOBILE ENGINEERING

07.06.2022

Submitted to the Principal

It is proposed to conduct guest lecture on "HEALTH AND HYGIENE TALK – "GUT HEALTH" ON 14.06.2022. This guest lecture will be useful for students. Mrs. Hema Malini S Assistant professor, Department of Food technology will be acting as coordinator for this workshop.

HOD/Food Technology

Dr. K.RAMALAKSHMI
Professor & Head
Department of Food Technology
Rajalakshmi Engineering College
Thandalam, Chennai 602 105.

09.00 AM 15th JUN, 2022

HEALTH AND HYGIENE TALK on

GUT HEALTH

Organized by

Department of Food Technology

In association with

Institution's Innovation Cell, REC Talent Enhancement Cell Industry Institute Interaction Cell, REC

Dr. Chandrakala R

Assistant Professor (SG)
Department of Food Technology
Rajalakshmi Engineering College, Chennai

Venue: Main Seminar Hall

Target Audience: First year students-2021-25

J. D. Henryen

PROFILE OF RESOURCE PERSON

Dr. Chandrakala R

Dr. Chandrakala R did her B. tech from Tamilnadu Veterinary and Animal Sciences University, M. tech from Amity University Noida and received her PhD from NIFTEM, Haryana. She was entitled for CSIR-Senior Research Fellow (SRF) for the research project entitled "Study of process induced modification in residual fruit pulp for flavor retention". She also perused her NATIONAL ELIGIBILITY FOR LECTURE /ASST. PROFESSORSHIP (2015-16): Awarded NET in Food Science and Technology for Lectureship/ Assistant professorship in the year 2015, through "Agricultural Research Service/ National Eligibility Test Examination (ARS/NET) -2015-16" of Indian Council of Agricultural Research (ICAR), recognized by UGC/CSIR. She is Certificated with Food Safety Management System (ISO 22000) course conducted by BSI (British Standard Institution).

Summary

Health and hygiene talk on gut health was organized by the department of food technology in association with Institution's innovation cell & Industry institute interaction cell, REC. The session was handled by Mrs. Chandrakala of department of food technology. around 256 students attended the session at the main seminar hall. The gut microbiome plays a very important role in your health by helping control digestion and benefiting your immune system and many other aspects of health. An imbalance of unhealthy and healthy microbes in the intestines may contribute to weight gain, high blood sugar, high cholesterol and other disorders. Probiotics are dietary supplements of live bacteria or yeasts thought to be healthy for the host organism. According to the currently adopted definition by FAO/WHO, probiotics are: 'Live microorganisms which when administered in adequate amounts confer a health benefit on the host'. Lactic Acid Bacteria (LAB) are the most common type of microbes used. Prebiotics are non-digestible food ingredients that stimulate the growth and/or activity of bacteria in the digestive system in ways claimed to be beneficial to health. They were first identified and named by Marcel Roberfroid in 1995. Most of the prebiotics are non digestible carbohydrates. Probiotics are microorganisms that some have claimed provide health benefits when consumed. Nobel Prize recipient Eli Metchnikoff, who in 1907 suggested that "the dependence of the intestinal microbes on the food makes it possible to adopt measures to modify the flora in our bodies and to replace the harmful microbes by useful microbes". Symbiotic is defined as "a mixture of probiotics and prebiotics that beneficially affects the host by improving the survival and implantation of live microbial dietary supplement in the gastrointestinal tract" (Gibson and Roberfroid et al., 1995). Symbiotic is a food supplement that contains both a prebiotic and a probiotic - work together to improve the "friendly flora" -J.v. Pluyon human intestine. Symbiotic product is a "functional food.

HEALTH AND HYGIENE TALK

on

FUNCTIONAL FOODS FOR HEALTH

Organized by

Department of Food Technology

In association with

Institution's Innovation Cell, REC Talent Enhancement Cell Industry Institute Interaction Cell, REC

Dr. Niveadhitha S

Assistant Professor (SG) Department of Food Technology Rajalakshmi Engineering College, Chennai

Q Venue: Main Seminar Hall

Target Audience: First year students-2021-25

PROFILE OF RESOURCE PERSON

Dr. Niveadhitha. S

Dr. Niveadhitha. S is an assistant professor (Senior Grade) at department of food technology received her PhD specializing Process Optimization for the Development of Functional Milk Beverage Powder and did her B. tech and M.tech from College of Food and Dairy Technology, Tamil Nadu Veterinary and Animal Science University. She received Tamil Nadu Veterinary and Animal Sciences University Merit Scholarship for Ph.D (2015-2018), Received Tamil Nadu Veterinary and Animal Sciences University Merit Scholarship for M.tech (2012-2014).she is Qualified NET in FOOD TECHNOLOGY conducted by Agricultural Scientists Recruitment Board, (ASRB) (2016). She is a member of Association of Food Technologist in India (AFSTI), Indian Meat Science Association, Tamil Society for Veterinary Sciences, Agricultural Scientific Tamil Society, Institute for Engineering Research and Publication. She specialized in the area of drying and new product development.

Introduction-Functional Foods and Nutraceuticals

- Nurraceutical can be defined as " A food or part of food or nutrient, that provides health benefits, melading the prevention and treatment of a discus-
- Offices health Senefits and are majorly used to prevent from lifestyle disorders (CVD: Diabetes, and
- Plants, Animals and Micro-organisms are the source of Nittraccuticals ingrédients.
- Vitamins, Minerals, Proteins, Probiotics, Fatty acids, Amino Acid are some of the major ingredients
- Formulations are available in the form of Powder, Pills, Tablets, Capsules, Bars, Food a

Food concepts- Olden days

- · Source of energy and nutrients
- · Focus on balanced diets

History

- The Indians, Egyptians, Chinese, and Sumerians are just a few civilizations that have used food
- · Greek Physician Hippocrates (Father of Medicine) (said several centuries ago) *Let.Fooll.be.Your Medicine
 - The Philosophy behind is-
- Focus on Prevention
- The term's Nutraconical was comed from "Nutrition" & [Pharmaconical in 1989 by Soppler DeFelies, MD, Founder and Charman of the Foundation for Imposition in Medicine (FIM).

 Other words used in the context.

- Dietary supplementation, Functional, Main stanctional Foods, etc. The modern nutriceouscal market began to develop, in Japan during the 4980s

Food concepts- Recent Days

- · Provide health benefits
- · Weight control
- · · No chemical additives
- · Fresh and be minimally processed
- · Good shelf life
- · Safe to consume (Without any chemical or microbiological toxins)
- · Should require minimum preparation at home
- · RTE/RTD

Eat to live- Eat for good looking and well being

Parameters	Shirt accorneals	Pharmacaracak
Prevention and Wellness	Primary FOCUS	Secondary FOCUS
ledical supervision	Not Required	Required
DA Approval	Not Required.	Required
Prescription	Not Required	Required
tësults - L	Slow but effective	Fast, may have side effe

Regulatory Bodies

- Foods For Specified Health Use(FOSHU)-Japan
- · Joint Health Claims Initiative(JHCI) UK
- · Codex Alimentarius FAO and WHO
- Functional Food Science in Europe (FUFOSE) European Union
- · Food Safety and Standard Act 2006-India

Advantages

- · Improves health
- · Delay aging
- Increases life expectancy
- · Reduced side effects with desirable outcomes

Limitations

- Not subjected to same testing and regulations as pharmaceuticals
- · Majority not regulated by FDA in USA
- · Companies creating unregulated products to create a wide profit
- · Bioavailability of nutrients is lower
- · No regulatory definition
- · Effect may be attributed to that of a placebo

PRINCIPAL RAJALAKSHMI ENGINEERING COLLEGE AN AUTONOMOUS INSTITUTION

THANDALAM, CHENNAI - 602 105.

SUMMARY

Health and hygiene talk on gut health was organized by the department of food technology in association with Institution's innovation cell & Industry institute interaction cell, REC. The session was handled by Dr.Niveadhita of department of food technology. around 256 students attended the session at the main seminar hall. The session deals with Nutraceutical that can be defined as "A food or part of food or nutrient, that provides health benefits, including the prevention and treatment of a disease. "Offers health benefits and are majorly used to prevent from lifestyle disorders (CVD, Diabetes, and malnutrition among others). Plants, Animals and Micro-organisms are the source of Nutraceuticals ingredients. Vitamins, Minerals, Proteins, Probiotics, Fatty acids, Amino Acid are some of the major ingredients. Formulations are available in the form of Powder, Pills, Tablets, Capsules, Bars, Food and Drinks. The Indians, Egyptians, Chinese, and Sumerians are just a few civilizations that have used food as medicine. Greek Physician Hippocrates (Father of Medicine) (said several centuries ago) "Let Food be Your Medicine". The Philosophy behind is "Focus on Prevention". The term "Nutraceutical" was coined from "Nutrition" & "Pharmaceutical" in 1989 by Stephen DE Felice, MD, Founder and Chairman of the Foundation for Innovation in Medicine (FIM). Other words used in the context: Dietary supplementation, Functional, Multifunctional Foods, etc. The modern nutraceutical market began to develop in Japan during the 1980s. Not subjected to same testing and regulations as pharmaceuticals. Majority not regulated by FDA in USA Companies creating unregulated products to create a wide profit margin. Bioavailability of nutrients is lower No regulatory definition. Effect may be attributed to that of a placebo. Regional bodies such as Foods For Specified Health Use (FOSHU)-Japan Joint Health Claims Initiative (JHCI) – UK, Codex Alimentarius - FAO and WHO Functional Food Science in Europe (FUFOSE) - European Union, Food Safety and Standard Act 2006-India discussed in detail. 5.6. PROFILE OF RESOURCE PERSON

MR. K. CHEZHIYAN

Mr. Chezhiyan has completed his Bachelor's degree in Biotechnology from REC, Chennai and pursued his post-graduation in Food technology from Anna university. He was actively involved in the research from 2012- 2015 at central Food Technological research institute, Mysore. He is a lead auditor for FSSC 22000 and is working as a "Food Analyst" at National Food Laboratory, Kolkata, who is responsible for safety of food by analysis and further deciding the conformity.

J. W. Hemps

Head Of The Department

Summary

Webinar on "Responsibility of FSSAI as Apex Regulator in Establishing Food Safety" conducted through online. Students from department of food technology has participated in the event. Mr. Chezhiyan is a lead auditor for FSSC 22000 and is working as a "Food Analyst" at National Food Laboratory, Kolkata, who is responsible for safety of food by analysis and further deciding the conformity.

Mr. Chezhiyan addressed this year's theme, 'Safe food today for a healthy tomorrow', stresses that production and consumption of safe food has immediate and longterm benefits for people the planet and the economy. The speaker elaborated how to recognize the systemic connections between the health of people, animals, plants, the environment and the economy will help us meet the needs of the future and he also explained the global burden of foodborne diseases, which affect individuals of all ages, in particular children under-5 and persons living in low-income countries, the United Nations General Assembly proclaimed in 2018 that every 7 June would be World Food Safety Day. In 2020, and the Food and Agriculture Organization of the United Nations (FAO) jointly facilitate the observance of World Food Safety Day, in collaboration with Member States and other relevant organizations. He also added that the Food safety is a shared responsibility between governments, producers and consumers. He mentioned that everyone has a role to play from farm to table to ensure the food we consume is safe and healthy. Through the World Food Safety Day, WHO works to mainstream food safety in the public agenda and reduce the burden of foodborne diseases globally. Food safety is everyone's busines J. No. Henry

Certificate of Completion

This is to certify that Mr./ Ms. NITHISH KUMAR (191301031.) III Food Tech...... In recognition for attending "GUEST LECTURE ON "FOOD SAFETY: FARM TO FORK" conducted by Rajalakshmi Engineering College in association with Intuition Innovation Council, REC and Industry Institute Interaction, REC ON 07.08.2021

Mrs.Hema Malini S
Assistant Professor

Dr.K.Ramalakshmi

Head Of The Department

Summary

Webinar on "Farm to Fork" happened through online which is organized by the department of food technology. around 108 participants attended the webinar. Mr.G.Senthil Kumar is a Quality Executive in Corporate Quality Assurance, Marico Limited, Coimbatore, a leading Indian company in Consumer Goods and Products in the global beauty and wellness space.

The speaker mentioned the implementation of food safety is very important in these days. Particularly in food industries, it is keen carry out safety measures from post-harvest farming to consumption. This webinar had a brief lecture on evolution of quality and food safety systems about HACCP, ISO 22000 etc. vendor selection like identification and screening also discussed. Food safety at farm level about usage of herbicides and insecticides. Pest management to be followed during food processing. Food fraud incidents and what are preventive measures need to be taken was discussed. Preventive quality control systems and safety measures while packing are also discussed. Product and facility approval along with audit check list, consumer awareness was discussed

BROCHURE

PROFILE OF RESOURCE PERSON

MR.CT. BOPANNA

Mr. CT. Bopanna is a Managing director of Food fix technology pvt ltd, Mysore. C T Bopanna hails from Gonikoppal, Coorg, a town known for its coffee and pepper plantations. Bopanna studied Microbiology, Botany and Bio-Chemistry at Mysore University and his early entrepreneurial journey taught him resources management and business skills. He further sharpened his marketing and sales skills with GSK and Zydus Cadilla and worked with some of the biggest names in the pharmaceutical industry. His abiding interest in food technology lead him to set up his own company Foodfix Technology which has divisions that specialize in coffee and herbal extracts which are exported to the Maldives, Russia and Chile. He is now also consulting in food processing and quality assurance for MNCs. With a social conscience and commitment to the welfare of the common good, he is also a participant in the Lions Club, Rotary and RHA activities.

Summary

Webinar on "Sustainable Farming" was conducted through online. Students from second year and third year of food technology department participated in the event. The session was mainly focusing on gourmet marketing.Mr. CT. Bopanna is a Managing director of Food fix technology pvt ltd, Mysore. C T Bopanna hails from Gonikoppal, Coorg, a town known for its coffee and pepper plantations.

Mr. Bopanna addressed about the gourmet marketing and modern farming. He mainly discussed about the Increase productivity, employment and value addition in food systems. Protect and enhance natural resources. Improve livelihoods and foster inclusive economic growth. Enhance the resilience of people, communities and ecosystems. Adapt governance to new challenges. He also spoke about the Sustainable food production' means shared responsibility for the production, supply and consumption of safe and nutritious food within a viable industry that simultaneously protects and enhances our natural environment and quality of life now and into the future. He also added the benefits of modern farming such as prevents pollution, Saves energy, Prevents soil erosion, Encourages biodiversity, Animal friendly, Reduces costs, Improves food production with less waste, It improves public health. He closed the session with the current trends in sustainable farming.
