2021-2022 Curriculum Feedback Transaction

The following changes can be considered

1. Final semester can be dedicated to the final year project. To accommodate the Professional Elective's IV and V the changes mentioned in the points 2, 3 and 4.
2. ASI can be brought from V Semester to VII Semester. Similarly management courses can be shifted from VII Semester to V Semester.
3. UAV courses need to be introduced early, therefore offering PE I to V Semester would be ideal.
4. Virtual experiments/simulations (available online at various IITs) can be considered to be made part of regular theory courses (at the end of chapters wherever necessary and possible) to complement the concepts being taught.
5. Elective subjects should be evenly distributed across all relevant streams, with a focus on the students' project work.
6. Feedback from previous BOS:
 - (i) Keeping the latest industrial needs in mind, In Professional Elective - IV - instead of Introduction to Product Development, --- "Project management" / "Materials management" / "Lean Six Sigma" can be offered.
 - (ii) In PE- V, instead of "Spray Theory ", --- "Rockets and Launch Vehicles" can be offered.
 - (iii) A new course related to "Satellite Technology" can be introduced in either Professional Elective IV or V.

B. TECH ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING

The following points were observed on collecting and analysing the feedback from the stake holders during the academic year 2021- 2022.

- o Inclusion of latest trends like IoT, AI based topics in the syllabus.
- o Simulation based experiments in laboratory
- o Increasing the number of lab and theory-oriented courses.

The above points will be discussed in the upcoming Department Advisory Board (DAB) meeting for inclusion of topics and courses in the R2023 curriculum and syllabi.

Based on the feedback collected from stakeholders (Faculty, Student, Industrial Expert and Alumni) during the Academic year 2021-22 the following points are identified:

- Electric Vehicle related courses can be increased in the core courses.
- Latest trend in Automobile Engineering field may be included in professional elective courses.
- One credit course can be included for improving the industry best practices.

The above points will be discussed in the forthcoming Department Advisory Board (DAB) for the programme **B.E. – Automobile Engineering**. Based on the recommendations of the DAB meeting, revised draft version of Curriculum and Syllabus of Automobile Engineering department (Regulation 2023) will be prepared. The same will be presented to Board of Study members and for their suggestions and approval.

TRANSACTIONS OF THE FEEDBACK ON CURRICULAM AND SYLLABUS

Based on the feedback collected from stakeholders (Faculty, Student, Industrial Expert and Alumni) during the Academic year **2021-22** the following points are identified:

- Case study, Simulation and modeling lab components can be included in the core courses.
- Latest Applications of Artificial intelligence in medical field may be included in professional elective courses.
- Current industrial trends in biomedical field can be included in professional elective courses.
- One credit course imparting technical skills can be included for industrial exposure to students.

The above points will be discussed in the forthcoming Department Advisory Board (DAB) for the programme **B.E. – Biomedical Engineering**. Based on the recommendations of the DAB meeting, revised draft version of Curriculum and Syllabus of Biomedical Engineering department (**Regulation 2023**) will be prepared. The same will be presented to Board of Study members and for their suggestions and approval.

DEPARTMENT BOARD OF STUDIES MEETING: REVIEW REPORT

The Sixth Board of Studies meeting for Department of Food Technology was conducted on 26th August 2022 at 10.00 a.m. through Google meet platform in the Department of Food Technology, Rajalakshmi Engineering College. The feedback and suggestions given by academic and industry experts and passed out students (2018-2022 batch) were discussed and will be included in the R2023 curriculum and syllabus.

1. Syllabus can be tuned to latest needs by introducing new courses for B.Tech Food Technology Honours degree such as Food plant Design and Layout, Nanotechnology in Food Applications, Food Product Design and Development, Management of Food Waste, Sensory Evaluation of Foods, Speciality Foods, Entrepreneurship and IPR in Food Technology.
2. Electives can be grouped on latest trends by including Professional elective course- Comprehension in Food Technology (FT19P79) in the 7th Semester.

From the feedback collected, the above suggested points will be included in the upcoming curriculum and syllabus of R2023 regulations.

PROPOSED ACTIONS ON FEEDBACK - ACADEMIC YEAR 2022-23

The feedback on Curriculum was collected from the stakeholders namely Students, Faculty, Alumni and Employers for the academic year 2021-2022. The following suggestions were given by the stakeholders as part of the feedback.

1. Additional one credit courses can be introduced for new innovative areas and technologies.
2. Core courses in state-of-the-art technologies like Quantum computing, Metaverse, Automation Tools and GPU Computing can be introduced.
3. Elective courses offered in Sixth, Seventh and Eighth semesters can be grouped as verticals based on latest technologies.

Before presenting the proposed Regulation 2023 Curriculum and Syllabus to the Board of Studies meeting, the aforementioned points will be discussed at the upcoming Department Advisory Board (DAB) meeting.

Curriculum feedback report

Based on the feedback collected from various stakeholders (Alumni, parents, Industrial expert and academic expert) during 2021-2022 ACY, the following suggestions are to be deliberated in forthcoming DAB meeting and BoS meeting (to be implemented from 2023 regulation onwards).

1. The elective courses can be grouped in verticals and the students can chose electives from the same vertical so that he/she can gain expertise in a specific domain.
2. During the eighth semester only final year project can be given so that students can focus on projects.
3. Experiments based on matlab can be included in the syllabus for providing simulation of analog, digital and automation circuits and design.
4. One credit internship can be included during fourth/fifth semesters so that all the students undergo industrial internship.

3. To Propose mandatory student Publication (Minimum of 2 papers) across 2 years of study.
4. To Reintroduce Operations Management as a Specialisation in the Proposed New Curriculum.
5. To propose Minor Programs like Entrepreneurship, Fin-Tech and Business Analytics for Undergraduate Engineering Courses.
6. To merge Statistics and Research Methodology and introduce a new paper Statistics for Business Research.
7. To remove redundant topics in Operations Research and include the needed topics in Operations Management.
8. A.O.B

The Board of Studies Members Suggested the Following:

1. The Proposal for a new Regulation 2023 and Curriculum revision was approved and also to have Project as the only component in the IV Semester.
2. Rural Community Engagement Program can be taken up by the students during the semester break (after completion of the first semester examinations and Second Semester commencement).
3. To enhance the research skills, the students may be encouraged to publish a Review/Research Paper or present a Paper in a Conference during the course of Study and not to make it mandatory for students.
4. Approval was given to reintroduce Operations Management and Introduce Data Analytics also as a Specialisation.
5. Consent was provided to frame the syllabus and teach Minor Courses in Entrepreneurship, FinTech and Business Analytics for Undergraduate Engineering Programs.
6. Approval was given to merge Statistical Methods and Research Methodology as one paper Statistics for Business Research which should also contain topics on Research & Publication Ethics.
7. Suggestion was provided to form a Faculty research team at the Department level based on the student projects, research on the material and try to create an avenue for consultancy.
8. The Board agreed to delete redundant topics and include topics of relevance of Operations Research in Operations Management. Inputs on the same were given by Ms.Babitha Lucin Rani, Asst.Professor in the department and the board agreed on the same.

Vote of thanks was proposed by Dr.C.B.Ragothaman, Professor, Department of Management Studies.
