

**RAJALAKSHMI**  
**ENGINEERING COLLEGE**  
An AUTONOMOUS Institution  
Affiliated to ANNA UNIVERSITY, Chennai

**CURRICULUM AND SYLLABUS**  
**CHOICE BASED CREDIT SYSTEM**  
**B.E. COMPUTER SCIENCE AND ENGINEERING**  
**REGULATION 2023**

**Vision**

To promote highly ethical and innovative computer professionals through excellence in teaching, training and research.

**Mission**

- To produce globally competent professionals, motivated to learn the emerging technologies and to be innovative in solving real world problems.
- To promote research activities amongst the students and the members of faculty that could benefit the society.
- To impart moral and ethical values in their profession.

**PROGRAMME EDUCATIONAL OBJECTIVES (PEOs)**

**PEO 1:** To equip students with essential background in computer science, basic electronics and applied mathematics.

**PEO 2:** To prepare students with fundamental knowledge in programming languages and tools and enable them to develop applications.

**PEO 3:** To encourage the research abilities and innovative project development in the field of networking, security, data mining, web technology, mobile communication and also emerging technologies for the cause of social benefit.

**PEO 4:** To develop professionally ethical individuals enhanced with analytical skills, communication skills and organizing ability to meet industry requirements.

## **PROGRAMME OUTCOMES (POs)**

**PO1: Engineering knowledge:** Apply the knowledge of Mathematics, Science, Engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2: Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3: Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO 4: Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO 5: Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO 6: The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

**PO 7: Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**PO 8: Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

**PO 9: Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10: Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**PO11: Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**PO12: Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

## **PROGRAM SPECIFIC OUTCOMES (PSOs)**

A graduate of the Computer Science and Engineering Program will demonstrate,

**PSO 1: Foundation Skills:** Ability to understand, analyze and develop computer programs in the areas related to algorithms, system software, web design, machine learning, data analytics, and networking for efficient design of computer-based systems of varying complexity. Familiarity and practical competence with a broad range of programming language and open source platforms.

**PSO 2: Problem-Solving Skills:** Ability to apply mathematical methodologies to solve computational task, model real world problem using appropriate data structure and suitable algorithm. To understand the standard practices and strategies in software project development, using open- ended programming environments to deliver a quality product.

**PSO 3: Successful Progression:** Ability to apply knowledge in various domains to identify research gaps and to provide solution to new ideas, inculcate passion towards higher studies, creating innovative career paths to be an entrepreneur and evolve as an ethically social responsible computer science professional.

Mapping of Program Educational Objectives (PEOs) and Program Outcomes (POs) with correlation levels (1: Slight, 2: Moderate, 3: Substantial, -: No correlation), based on the provided information:

### **PEO and PO Mapping Table**

PEOs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
<b>PEO1</b>	3	3	2	2	3	-	-	-	2	2	2	2	3	3	2

## CURRICULUM

### B.E. COMPUTER SCIENCE AND ENGINEERING Regulation 2023 | Total Credits: 160

<b>SEMESTER I</b>								
Sl. NO.	COURSE CODE	COURSE TITLE	Category	Contact Periods	L	T	P	C
<b>THEORY COURSES</b>								
1.	HS23111	Technical Communication I	HS	2	2	0	0	2
2.	MA23111	Linear Algebra and Calculus	BS	4	3	1	0	4
3.	GE23117	தமிழர் மரபு /Heritage of Tamils	HS	1	1	0	0	1
<b>LAB ORIENTED THEORY COURSES</b>								
4.	GE23131	Programming using C	ES	7	1	0	6	4
5.	EE23133	Basic Electrical and Electronics Engineering	ES	5	3	0	2	4
6.	PH23132	Physics for Information Science	BS	5	3	0	2	4
<b>LABORATORY COURSES</b>								
7	GE23121	Engineering Practices-Civil and Mechanical	ES	2	0	0	2	1
<b>NON-CREDIT COURSES</b>								
8.	MC23111	Indian Constitution and Freedom Movement	MC	3	3	0	0	0
<b>TOTAL</b>				<b>29</b>	<b>16</b>	<b>1</b>	<b>12</b>	<b>20</b>

<b>SEMESTER II</b>								
Sl. NO.	COURSE CODE	COURSE TITLE	Category	Contact Periods	L	T	P	C
<b>THEORY COURSES</b>								
1.	MA23213	Discrete Mathematical Structures	BS	4	3	1	0	4
2.	GE23217	தமிழரும் தொழில்நுட்பமும் /Tamils and Technology	HS	1	1	0	0	1
<b>LAB ORIENTED THEORY COURSES</b>								
3.	EC23232	Digital Logic and Microprocessor	ES	5	3	0	2	4
4.	GE23111	Engineering Graphics	ES	6	2	0	4	4
5.	CS23231	Data Structures	PC	7	3	0	4	5
<b>LABORATORY COURSES</b>								
6.	HS23221/ HS23222	Technical Communication II / English for Professional Competence	HS	2	0	0	2	1
7.	GE23122	Engineering Practices- Electrical and Electronics	ES	2	0	0	2	1
8.	CS23221	Python Programming Lab	PC	4	0	0	4	2
<b>NON-CREDIT COURSES</b>								
9.	MC23112	Environmental Science and Engineering	MC	3	3	0	0	0
<b>TOTAL</b>				<b>34</b>	<b>15</b>	<b>1</b>	<b>18</b>	<b>22</b>

SEMESTER III								
Sl. NO.	COURSE CODE	COURSE TITLE	Category	Contact Periods	L	T	P	C
<b>THEORY COURSES</b>								
1.	MA23312	Fourier Series and Number Theory	BS	4	3	1	0	4
2.	CS23311	Computer Architecture	PC	3	3	0	0	3
<b>LAB ORIENTED THEORY COURSES</b>								
3.	CS23331	Design and Analysis of Algorithms	PC	5	3	0	2	4
4.	CS23332	Database Management Systems	PC	7	3	0	4	5
5.	CS23333	Object Oriented Programming Using Java	PC	7	1	0	6	4
6.	CS23334	Fundamentals of Data Science	PC	5	3	0	2	4
<b>TOTAL</b>				<b>31</b>	<b>16</b>	<b>1</b>	<b>14</b>	<b>24</b>

SEMESTER IV								
Sl. NO.	COURSE CODE	COURSE TITLE	Category	Contact Periods	L	T	P	C
<b>THEORY COURSES</b>								
1.		Open Elective – I	OE	3	3	0	0	3
2.		Professional Elective-I	PE	3	3	0	0	3
<b>LAB ORIENTED THEORY COURSES</b>								
3.	MA23435	Probability, Statistics and Simulation	BS	5	3	0	2	4
4.	CS23431	Operating Systems	PC	7	3	0	4	5
5.	CS23432	Software Construction	PC	5	3	0	2	4
6.	GE23627	Design Thinking and Innovation	EEC	4	0	0	4	2
<b>EMPLOYABILITY ENHANCEMENT COURSES</b>								
7.	GE23421	Soft Skills-I	EEC	2	0	0	2	1
8.	CS23421	Internship (2 weeks)	EEC	0	0	0	2	1
<b>TOTAL</b>				<b>29</b>	<b>15</b>	<b>0</b>	<b>14</b>	<b>23</b>

SEMESTER V								
Sl. NO.	COURSE CODE	COURSE TITLE	Category	Contact Periods	L	T	P	C
<b>THEORY COURSES</b>								
1.	CS23511	Theory of Computation	PC	4	3	1	0	4
2.	CS23512	Fundamentals of Mobile Computing	PC	3	3	0	0	3
3.		Professional Elective-II	PE	3	3	0	0	3
<b>LAB ORIENTED THEORY COURSES</b>								
4.	CS23531	Web Programming	PC	7	1	0	6	4
5.	CS23532	Computer Networks	PC	7	3	0	4	5
6.	CS23533	Foundations of Artificial Intelligence	PC	5	3	0	2	4
<b>EMPLOYABILITY ENHANCEMENT COURSES</b>								
7.	GE23521	Soft Skills-II	EEC	2	0	0	2	1
<b>TOTAL</b>				<b>31</b>	<b>16</b>	<b>1</b>	<b>14</b>	<b>24</b>

SEMESTER VI								
Sl. NO.	COURSE CODE	COURSE TITLE	Category	Contact Periods	L	T	P	C
<b>LAB ORIENTED THEORY COURSES</b>								
1.	CS23631	Compiler Design	PC	5	3	0	2	4
2.	CS23632	Cryptography and Network Security	PC	4	2	0	2	3
3.	CS23633	Cloud Computing	PC	4	2	0	2	3
4.	CS23634	Fundamentals of Generative AI and Prompt Engineering	PC	4	2	0	2	3
5.	AI23331	Fundamentals of Machine Learning	PC	5	3	0	2	4
<b>LABORATORY COURSES</b>								
6.	CS23621	Mobile Application Development Laboratory	PC	4	0	0	4	2
<b>EMPLOYABILITY ENHANCEMENT COURSES</b>								
7.	GE23621	Problem Solving Techniques	EEC	2	0	0	2	1
<b>TOTAL</b>				<b>27</b>	<b>13</b>	<b>0</b>	<b>14</b>	<b>20</b>

SEMESTER VII								
Sl. NO.	COURSE CODE	COURSE TITLE	Category	Contact Periods	L	T	P	C
<b>THEORY COURSES</b>								
1.		Professional Elective-III	PE	3	3	0	0	3
2.		Professional Elective-IV	PE	3	3	0	0	3
3.		Professional Elective-V	PE	3	3	0	0	3
4.		Professional Elective-VI	PE	3	3	0	0	3
5.		Open Elective – II	OE	3	3	0	0	3
<b>LABORATORY COURSES</b>								
6.	CS23721	Project Phase I	EEC	6	0	0	6	3
<b>TOTAL</b>				<b>21</b>	<b>15</b>	<b>0</b>	<b>6</b>	<b>18</b>

SEMESTER VIII								
Sl. NO.	COURSE CODE	COURSE TITLE	Category	Contact Periods	L	T	P	C
<b>THEORY COURSES</b>								
1.		Professional Elective-VII	PE	3	3	0	0	3
<b>LABORATORY COURSES</b>								
2.	CS23821	Project Phase II	EEC	12	0	0	12	6

**TOTAL NO. OF CREDITS: 160**

## PROFESSIONAL ELECTIVES (PE)

<b>Cyber Security</b>								
Sl. NO.	COURSE CODE	COURSE TITLE	Category	Contact Periods	L	T	P	C
1.	CR23A11	Security Assessment and Risk Analysis	PE	3	3	0	0	3
2.	CS23A11	Malware Detection and Analysis	PE	3	3	0	0	3
3.	CR23A31	Ethical Hacking and Security	PE	4	2	0	2	3
4.	CR23A32	Digital and Mobile Forensics	PE	4	2	0	2	3
5.	CR23A33	Cryptocurrency and Blockchain Technologies	PE	4	2	0	2	3
6.	CR23A34	Security and Privacy in Cloud	PE	4	2	0	2	3
7.	CR23A35	Social Network Security	PE	4	2	0	2	3
8.	CS23A35	Web Application Security	PE	4	2	0	2	3
9.	CR23A36	Information Security and Management	PE	4	2	0	2	3

<b>Data Science</b>								
Sl. NO.	COURSE CODE	COURSE TITLE	Category	Contact Periods	L	T	P	C
1.	AI23A31	Social Network Analysis	PE	4	2	0	2	3
2.	AD23A32	Explorative and Forecasting Analytics	PE	4	2	0	2	3
3.	AI23A35	Recommendation Systems	PE	4	2	0	2	3
4.	IT23D11	Deep Learning Concepts	PE	3	3	0	0	3
5.	AD23B33	Text and Speech Analysis	PE	4	2	0	2	3
6.	CS23A31	Business Analytics	PE	4	2	0	2	3
7.	AD23A37	Image and Video Analytics	PE	4	2	0	2	3
8.	AD23B31	Image Processing and Computer Vision	PE	4	2	0	2	3
9.	AI23A36	Big Data Analytics	PE	4	2	0	2	3
10.	AI23632	Natural Language Processing	PE	4	2	0	2	3
11.	CS23C31	Data Analytics and Insights in MindSphere	PE	5	1	0	4	3

<b>Virtual and Augmented Reality</b>								
Sl. NO.	COURSE CODE	COURSE TITLE	Category	Contact Periods	L	T	P	C
1.	CS23A37	Augmented Reality and Virtual Reality	PE	4	2	0	2	3
2.	CD23C22	Data Visualization	PE	6	0	0	6	3
3.	CS23A39	Game Development	PE	4	2	0	2	3
4.	CS23B31	Introduction to Metaverse	PE	4	2	0	2	3
5.	IT23E31	Graphics and Multimedia	PE	4	2	0	2	3
6.	CS23A38	Digital Marketing	PE	4	2	0	2	3
7.	CD23721	Visual Effects	PE	6	0	0	6	3
8.	CD23731	Film Making and Radio Podcasting	PE	4	2	0	2	3
9.	CS23A34	User Interface Design	PE	4	2	0	2	3
10.	CS23B34	Immersive Experience in AR/VR	PE	5	1	0	4	3

Emerging Technologies								
Sl. NO.	COURSE CODE	COURSE TITLE	Category	Contact Periods	L	T	P	C
1.	CS23A32	Robotic Process Automation	PE	4	1	0	4	3
2.	CS23A33	Cyber Security and Forensics	PE	4	2	0	2	3
3.	CS23A35	Web Application Security	PE	4	2	0	2	3
4.	CS23A36	3D Printing and Design	PE	4	2	0	2	3
5.	CB23G11	Quantum Computation and Quantum Information	PE	3	3	0	0	3
6.	CS23B32	Advanced Application Development with Oracle APEX	PE	6	0	0	6	3
7.	CS23B33	Introduction to Modern Databases with MongoDB	PE	6	0	0	6	3
8.	BA23512	Fundamentals of Accounting	PE	3	3	0	0	3

Full Stack Development								
Sl. NO.	COURSE CODE	COURSE TITLE	Category	Contact Periods	L	T	P	C
1.	IT23C31	Software Testing	PE	4	2	0	2	3
2.	IT23B33	DevOps	PE	4	2	0	2	3
3.	IT23B31	C# and .Net Programming	PE	4	2	0	2	3
4.	IT23A11	Internet of Things	PE	3	3	0	0	3
5.	IT23C12	Software Project Management	PE	3	3	0	0	3
6.	IT23C17	Ubiquitous Computing	PE	3	3	0	0	3
7.	CS23B35	IoT: Concepts and Hands-On Applications	PE	5	1	0	4	3

Open Elective – Offered by CSE								
Sl. NO.	COURSE CODE	COURSE TITLE	Category	Contact Periods	L	T	P	C
1.	OCS2331	Java Programming	OE	4	2	0	2	3
2.	OCS2332	Data Structures Using C	OE	4	2	0	2	3
3.	OCS2333	Assistive Technology	OE	4	2	0	2	3
4.	OCS2334	Web Design and Development	OE	4	2	0	2	3
5.	OCS2335	App Development	OE	4	2	0	2	3

## COURSES OFFERED BY CSE TO OTHER DEPARTMENTS

SI. NO.	COURSE CODE	COURSE TITLE	Category	Contact Periods	L	T	P	C
1.	GE23233	Problem Solving and Python Programming	ES	6	2	0	4	4
2.	GE23231	Programming using Python	ES	5	1	0	4	3
3.	CS23232	Fundamentals of Data Structures using C	ES	7	3	0	4	5
4.	CS23422	Python Programming for Machine Learning	ES	4	0	0	4	2
5.	CS23336	Introduction to Python Programming	ES	5	1	0	4	3

### Credit Distribution

Category	AICTE 2022	R2019	R2023

## Semester – I

Course Code	Subject Name (Theory Courses)	Category	L	T	P	C
HS23111	TECHNICAL COMMUNICATION I	HS	2	0	0	2
<b>Common to all branches of B.E/B. Tech Programmes</b>						

<b>Objectives:</b>
<ul style="list-style-type: none"> <li>● To facilitate students, develop their comprehension skills</li> <li>● To enable students to improve their receptive skills</li> <li>● To equip learners with better vocabulary and enhance their writing skills</li> <li>● To aid students speak effectively in all kinds of communicative contexts.</li> <li>● To improve the learners' basic proficiency in workplace communication</li> </ul>

UNIT-I	DEVELOPING COMPREHENSION SKILLS	6
--------	---------------------------------	---

**Listening:** Introduction to Informational listening – Listening to Podcasts, News  
**Reading:** Intentional Reading - Short Narratives and Passages.  
**Speaking:** Introducing Oneself, Narrating a Story / Incident.  
**Writing:** Sequential Writing – connecting ideas using transitional words (Jumbled Sentences), Process Description  
**Grammar:** Verbs – Main & Auxiliary: Simple Tenses – Form, Function and Meaning.  
**Vocabulary:** Word formation – Prefix, Suffix, Compound Words.

UNIT-II	LISTENING AND EXTENDED READING	6
---------	--------------------------------	---

**Listening:** Deep Listening – Listening to Talk Shows and Debates  
**Reading:** In-depth Reading - Scanning Passages **Speaking:** Describing Current Issues, Happenings, etc., **Writing:** Note Making, Note Taking – Paragraph Writing, Grammar: Continuous Tenses, Prepositions, Articles  
**Vocabulary:** One Word Substitutes, Phrasal Verbs.

UNIT-III	FORMAL WRITING AND VERBAL ABILITY	6
----------	-----------------------------------	---

**Listening:** Listening to Lectures and Taking Notes **Reading:** Interpretation of Tables, Charts and Graphs **Speaking:** SWOT Analysis on Oneself  
**Writing:** Formal Letter Writing and Email Writing  
**Grammar:** Perfect Tenses, Phrases and Clauses, Discourse Markers  
**Vocabulary:** Verbal Analogy / Cloze Exercise

UNIT-IV	ENHANCING SPEAKING ABILITY	6
---------	----------------------------	---

**Listening:** Listening to eminent voices of one's interest (Martin Luther King, APJ Abdul Kalam, etc.)  
**Reading:** Timed Reading, Filling KWL Chart. **Speaking:** Just a Minute, Impromptu **Writing:** Check-list, Instructions.  
**Grammar:** 'Wh' Questions / 'Yes' or 'No' Questions, Imperatives  
**Vocabulary:** Synonyms, Antonyms, Different forms of the same words.

UNIT-V	LANGUAGE FOR WORKPLACE	6
--------	------------------------	---

**Listening:** Extensive Listening (Audio books, rendering of poems, etc.) **Reading:** Extensive reading (Jigsaw Reading, Short Stories, Novels) **Speaking:** Short Presentations on Technical Topics  
**Writing:** Recommendations, Essay Writing  
**Grammar:** Impersonal Passive, Reported Speech, Concord  
**Vocabulary:** Informal Vocabulary and Formal Substitutes

**Total Contact Hours: 30**

**Course Outcomes: On completion of the course students will be able to**

- Apply their comprehension skills and interpret different contents effortlessly
- Read and comprehend various texts and audio-visual contents
- Infer data from graphs and charts and communicate it efficiently in varied contexts
- Participate effectively in diverse speaking situations
- To present, discuss and coordinate with their peers in workplace using their language skills

**SUGGESTED ACTIVITIES**

- Ice breaker
- Just A Minute
- Ship wreck
- Hot seat
- Vocabulary building
- Chinese whispers
- Case study

**SUGGESTED EVALUATION METHODS**

- Assignment topics
- Quizzes
- Class Presentation/Discussion
- Continuous Assessment Tests

**Text Book(s):**

1.	Effective Technical Communication by M. Ashraf Rizvi, 2nd Edition, 2017
2.	Sylvan Barnet and Hugo Bedau, 'Critical Thinking Reading and Writing', Bedford/st. Martin's: Fifth Edition, 2004
3.	Meenakshi Upadhyay, Arun Sharma – Verbal Ability and Reading Comprehension.
4.	Teaching Speaking: A Holistic Approach, Book by Anne Burns and Christine ChuenMeng Goh, Cambridge University Press

**Reference Book(s):**

1.	Basic Vocabulary in Use: 60 Units of Vocabulary Practice in North American English with Answers 2nd Edition by Michael McCarthy, Felicity O'Dell, John D. Bunting
2.	Reading Development and Difficulties By Kate Cain
3.	The 7 Habits of Highly Effective People by Stephen Covey, Simon and Schuster, UK
4.	Everybody Writes: Your Go-To Guide to Creating Ridiculously Good Content Hardcover by Ann Handley

**CO - PO – PSO matrices of course**

PO/PSO CO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3
HS23111. 1	-	-	-	1	-	-	-	-	-	3	-	-	-	2	-

1: Slight (Low)    2: Moderate (Medium)    3: Substantial (High)    No correlation: “-“

Course Code	Subject Name (Theory Courses)	Category	L	T	P	C
MA23111	LINEAR ALGEBRA AND CALCULUS	BS	3	1	0	4
<b>Common to B.E. - CSE, CSE-CS, EEE, ECE, BME and B.Tech. IT.</b>						

Objectives:
<ul style="list-style-type: none"> <li>To introduce the matrix techniques and to explain the nature of the matrix.</li> </ul>
<ul style="list-style-type: none"> <li>To collect the matrix algebra techniques and the concepts of basis and dimension in vector spaces.</li> </ul>
<ul style="list-style-type: none"> <li>To construct normalization of vectors and ortho-normal vectors.</li> </ul>
<ul style="list-style-type: none"> <li>To understand techniques of calculus which are applied in the Engineering problems.</li> </ul>
<ul style="list-style-type: none"> <li>To apply the techniques of Integration in finding area and volumes.</li> </ul>

UNIT-I	MATRICES	12
Matrices - Eigenvalues and eigenvectors - Diagonalization of matrices using orthogonal transformation - Cayley-Hamilton Theorem (without proof) - Quadratic forms - Reduction to canonical form using orthogonal transformation - Numerical computation of Eigen value using Power method.		
UNIT-II	LINEAR TRANSFORMATION	12
Vector spaces – Subspaces – Linear combinations and system of Linear equations – Linear independence and Linear dependence – Bases and Dimensions – Linear Transformation – Matrix representation of Linear Transformation – Null space, Range space and dimension theorem (without proof).		
UNIT-III	INNER PRODUCT SPACES	12
Inner product and norms - Gram Schmidt orthonormalization process - QR Factorization - Singular value decomposition.		
UNIT-IV	FUNCTIONS OF SEVERAL VARIABLES	12
Partial differentiation–Total derivative–Change of variables–Jacobians–Partial differentiation of implicit functions–Taylor’s series for functions of two variables–Maxima and minima of functions of two variables–Lagrange’s method of undetermined multipliers.		
UNIT-V	MULTIPLE INTEGRALS	12
Double integrals–Change of order of integration–Area enclosed by plane curves–Triple integrals–Volume of solids–Numerical computation of double integrals–trapezoidal rule.		
<b>Total Contact Hours: 60</b>		

Course Outcomes: On completion of the course, students will be able to
<ul style="list-style-type: none"> <li>Demonstrate the matrix techniques in solving the related problems in engineering and technology.</li> </ul>
<ul style="list-style-type: none"> <li>Apply the concepts of basis and dimension in vector spaces to the solution of related complex engineering problems.</li> </ul>
<ul style="list-style-type: none"> <li>Construct orthonormal basis by the concepts of normalization in inner products and to analyze complex engineering problems.</li> </ul>
<ul style="list-style-type: none"> <li>Interpret the problems in Engineering and Technology using the principles of mathematical calculus.</li> </ul>
<ul style="list-style-type: none"> <li>Evaluate multiple integrals to conduct investigations of complex problems.</li> </ul>

Text Book(s):

11. Porunai Civilization (Jointly Published by: Department of Archaeology & Tamil Nadu Text Book and Educational Services Corporation, Tamil Nadu)
12. Journey of Civilization Indus to Vaigai (R.Balakrishnan) (Published by: RMRL) – Reference Book.

Course Code	Subject Name (Lab oriented Courses)	Category	L	T	P	C
GE23131	PROGRAMMING USING C	ES	1	0	6	4
<b>Common to B.E. Programmes of CSE, CSECS, CSD and B.Tech. Programmes of IT, AIML, AIDS</b>						

#### Objectives:

• To develop C Programs using basic programming constructs
• To develop C programs using arrays and strings
• To do searching and sorting algorithms in C
• To develop applications in C using user defined functions and recursive functions
• To develop applications in C using pointers and structures

#### List of Experiments

1	Overview of C, Constants, Variables and Data Types		
2	Operators and Expressions, Managing Input and Output Operations		
3	Decision Making and Branching		
4	Decision Making and Looping		
5	Nested Loops - while and for, Jumps in Loops		
6	One-Dimensional Arrays		
7	Searching Algorithms - Linear and Binary		
8	Sorting Algorithms - Bubble and Selection		
9	Two-Dimensional and Multi-dimensional Arrays		
10	Character Arrays and Strings Handling Functions		
11	User-Defined Functions - Recursive Functions		
12	Passing Arrays and Strings to Functions		
13	Scope, Visibility and Lifetime of Variables		
14	Structures and Unions		
15	Pointers		
16	The Preprocessor		
<b>Platform Needed:</b> GCC Compiler for Windows/Linux		<b>Total Contact Hours</b>	<b>90</b>

#### Course Outcomes: On completion of the course, the students will be able to

• Formulate simple algorithms for arithmetic and logical problems.
• Implement conditional branching, iteration and recursion.
• Decompose a problem into functions and synthesize a complete program using divide and conquer approach.
• Use arrays, pointers and structures to formulate algorithms and programs.
• Apply programming to solve matrix addition and multiplication problems and searching and sorting problems.

#### Text Book(s):

1.	Brian W. Kernighan and Dennis M. Ritchie, "The C Programming Language", Second Edition, Pearson, 2015
2.	Byron Gottfried, "Programming in C", Second Edition, Schaum Outline Series, 1996.

#### Reference Book(s):

1.	Herbert Schildt, "C: The Complete Reference", Fourth Edition, McGraw Hill, 2017
2.	Yashavant Kanetkar, "Let Us C", BPB Publications, 15th Edition, 2016.
3.	Balagurusamy, Programming in ANSI C, Tata McGraw-Hill, 9th Edition, 2019.
4.	NPTEL course, "Problem Solving Through Programming In C", By Prof. Anupam Basu, IIT Kharagpur

#### Suggested Activities

- Practice small and tricky codes
- Practice problems in portals like Digital Café Debugging the codes
- Completing the function definitions etc

#### Lab Equipment Required:

Sl. No.	Name of the Equipment	Quantity Required (For a batch of 30 students)
1.	<b>Verification of ohms and Kirchhoff’s Laws</b>	
	1. DC Regulated Power supply (0 - 30 V variable)	1
	2. Bread Board	1
	3. Resistors	1
	4. Multimeter	As Required
	5. Connecting wires	
2.	<b>Load test on DC Shunt Motor.</b>	
	1. Ammeter MC (0-20A)	1
	2. Voltmeter MC (0-300) V	1
	3. Tachometer	1
	4. Field Rheostat 500 $\Omega$ , 1.5 A	1
	5. Connecting wires	As Required
3.	<b>Load Test on Induction Motor</b>	
	1. Ammeter MI (0-20A)	1
	2. Voltmeter MI (0-300) V	1
	3. Wattmeter – 300V, 30 A	1
	4. Tachometer – Digital	1
	5. Connecting Wires	As Required
	6. Single phase Induction motor	1

<b>4.</b>	<b>Load test on Single phase Transformer</b> 1. Ammeter (0-30) A, (0-5) A 2. Voltmeter (0-150) V, (0-300) V 3. Wattmeter – 300V, 5A, UPF 4. Autotransformer 5. Single phase Transformer 6. Connecting Wires	1 1 1 1 1 As Required
<b>5.</b>	<b>Characteristics of PN and Zener Diodes</b> 7. PN Diode (IN4007), Zener diode (6.8V, 1A) 8. Resistor 1 K $\Omega$ , 100 $\Omega$ 9. Bread Board 10. DC Regulated Power supply (0 - 30 V variable) 11. Multimeter 12. Connecting wires	1 1 1 1 1 As Required
<b>6.</b>	<b>Characteristics of BJT</b> 1. Transistor (BC107) 2. Resistors- 1k $\Omega$ , 470K $\Omega$ , 1M $\Omega$ 3. Bread Board 4. DC Regulated Power supply (0 - 30 V variable) 5. Multimeter 6. Connecting wires	1 1 1 1 1 As Required
<b>7.</b>	<b>Characteristics of MOSFET</b> 1. MOSFET (IRF510) 2. Resistors- 100k $\Omega$ , 1k $\Omega$ 3. Bread Board 4. DC Regulated Power supply (0 - 30 V variable) 5. Multimeter 6. Connecting wires	1 1 1 1 1 As Required
<b>8.</b>	<b>Measurement of displacement of LVDT, RTD and Thermistor</b> 1. LVDT Kit 2. RTD 3. Thermistor 4. 4. Multimeter	1 1 1 1 1

Course Code	Subject Name (Lab oriented Theory Courses)	Category	L	T	P	C
PH23132	PHYSICS FOR INFORMATION SCIENCE	BS	3	0	2	4
<b>Common to -B.E.-CSE, CSD, CSECS &amp; B. Tech.- IT, AIML, AI&amp;DS</b>						

Objectives:
<ul style="list-style-type: none"> <li>To understand the principles of laser and fiber optics in engineering and technology.</li> </ul>
<ul style="list-style-type: none"> <li>To analyze the properties of magnetic and superconducting materials.</li> </ul>
<ul style="list-style-type: none"> <li>To understand the advanced concept of quantum theory and applications.</li> </ul>
<ul style="list-style-type: none"> <li>To become proficient in semiconductor applications</li> </ul>
<ul style="list-style-type: none"> <li>To become proficient in optoelectronic devices</li> </ul>

UNIT-I	LASERS AND FIBER OPTICS	9
Lasers: Characteristics, Einstein's A and B coefficients derivation – resonant cavity, optical amplification (qualitative) –Nd-YAG Laser, Semiconductor lasers: Homojunction and Heterojunction- Applications of Lasers. Fiber optics: principle, numerical aperture and acceptance angle - types of optical fibers (material, mode and refractive index) –losses associated with optical fibers -Fiber optic communication system - fiber optic sensors: pressure and displacement.		
UNIT-II	MAGNETIC AND SUPERCONDUCTING MATERIALS	9
Magnetic dipole moment – atomic magnetic moments- magnetic permeability and susceptibility -Magnetic material classification: diamagnetism – paramagnetism – ferromagnetism – antiferromagnetism – ferrimagnetism – Domain Theory- M versus H behaviour – Hard and soft magnetic materials – examples and uses– Magnetic principle in computer data storage. Superconductors: Properties - BCS theory (Qualitative)- Type-I and Type II superconductors - Magnetic levitation-SQUID-Cryotron.		
UNIT-III	QUANTUM PHYSICS	9
Introduction- Quantum free electron theory-De Broglie's concept-Schrodinger wave equation-Time independent and time dependent equations-Physical significance of wave function - Particle in a one-dimensional box – electrons in metals - degenerate states – Fermi- Dirac statistics – Density of energy states -Size dependence of Fermi energy – Quantum confinement – Quantum wells, Quantum wires, Quantum dots and Quantum clusters - Band gap of nanomaterials.		
UNIT-IV	SEMICONDUCTOR PHYSICS	9
Intrinsic Semiconductors – Energy band diagram – direct and indirect band gap semiconductors – Carrier concentration in intrinsic semiconductors – Band gap determination- extrinsic semiconductors (Qualitative)- Halleffect - determination of Hall co-efficient -Formation of P-N Junction-Forward bias- Reverse bias –Ohmic contact-Schottky diode- Tunnel diode.		
UNIT-V	OPTOELECTRONICS	9
Classification of optical materials – carrier generation and recombination processes – Absorption, emission and scattering of light in metals, insulators and semiconductors (concepts only) – Photo electric effect-Photo current in a P-N diode – Photo transistor-solar cell - LED – Organic LED- Non-Linear Optical materials-properties and applications.		
<b>Total Contact Hours: 45</b>		

List of Experiments	
1	Determine the wavelength of the laser using grating and size of the particle using diode laser.
2	Determine the numerical aperture and acceptance angle of optical fiber.
3	Study the permeability of the free space using Helmholtz coil.
4	Determine the hysteresis loss in the transformer core using B-H curve unit.
5	Determine the band gap of given semiconductor.
6	Determine the Hall coefficient of semiconducting material.
7	Determine specific resistance of the material of given wires using metre bridge.
8	Study the resonance frequency in series connected LCR circuits.
9	Determine the V-I characteristics of the solar cell.
10	Determine the thickness of the given specimen by using air wedge method.
<b>Contact Hours: 30</b>	
<b>Total Contact Hours: 75</b>	

<b>Course Outcomes:</b> On completion of the course, students will be able to
• Use the concepts of Laser and Fiber optics in communication.
• Use the properties of magnetic and superconducting materials in data storage devices.
• Apply the concepts of electron transport in nanodevices.
• Analyse the physics of semiconductor devices
• Analyze the properties of optical materials for optoelectronic applications.

<b>Suggested Activities</b>
• Problem solving sessions
<b>Suggested Evaluation Methods</b>
• Quizzes
• Class Presentation / Discussion

Course Code	Subject Name (Lab oriented Courses)	Category	L	T	P	C
GE23121	ENGINEERING PRACTICES – CIVIL AND MECHANICAL	ES	0	0	2	1

**Objectives:**

- To provide exposure to the students with hands on experience on various basic engineering practices in Civil and Mechanical Engineering

**List of Experiments**

CIVIL ENGINEERING PRACTICE	
1.	Study of pipeline joints, its location and functions: valves, taps, couplings, unions, reducers, and elbows in household fittings.
2.	Preparation of basic plumbing line sketches for wash basins, water heaters, etc.
3.	Hands-on-exercise: Basic pipe connections – Pipe connections with different joining components.
Carpentry Works:	
4.	Study of joints in roofs, doors, windows and furniture.
5.	Hands-on-exercise: Woodwork, joints by sawing, planing and chiselling.
MECHANICAL ENGINEERING PRACTICE	
6.	Preparation of butt joints, lap joints and T- joints by Shielded metal arc welding.
7.	Gas welding practice.
Basic Machining:	
8.	Simple Turning and Taper turning
9.	Drilling Practice
Sheet Metal Work:	
10.	Forming & Bending:
11.	Model making – Trays and funnels
12.	Different type of joints.
Machine Assembly Practice:	
13.	Study of centrifugal pump
14.	Study of air conditioner
<b>Total Contact Hours</b>	
<b>: 30</b>	

**Course Outcomes: On completion of the course, the students will be able to**

- Able to perform plumbing activities for residential and industrial buildings considering safety aspects while gaining clear understanding on pipeline location and functions of joints like valves, taps, couplings, unions, reducers, elbows, etc.
- Able to perform wood working carpentry activities like sawing, planing, cutting, etc. while having clear understanding of the joints in roofs, doors, windows and furniture.
- Able to produce joints like L joint, T joint, Lap joint, Butt joint, etc. through arc welding process while acquiring in depth knowledge in the principle of operation of welding and other accessories
- Able to perform operations like Turning, Step turning, Taper turning, etc. in lathe and Drilling operation in drilling machine
- Able to perform sheet metal operations like Forming, Bending, etc. and fabricating models like Trays, funnels, etc.

Course Code	Subject Name (Theory Courses)	Category	L	T	P	C
MC23111	INDIAN CONSTITUTION AND FREEDOM MOVEMENT	MC	3	0	0	0
<b>Common to all branches of B.E/B. Tech Programme</b>						

**Objectives:**

<ul style="list-style-type: none"> <li>To apprehend the sacrifices made by the freedom fighters.</li> </ul>
<ul style="list-style-type: none"> <li>To inculcate the values enshrined in the Indian constitution.</li> </ul>
<ul style="list-style-type: none"> <li>To instill a sense of responsibility as the citizens of India.</li> </ul>
<ul style="list-style-type: none"> <li>To familiarize about the functions of the various levels of Government.</li> </ul>
<ul style="list-style-type: none"> <li>To be informed about Constitutional and Non- Constitutional bodies.</li> </ul>

<b>UNIT-I</b>	<b>INDIAN FREEDOM MOVEMENT</b>	9
British Colonialism in India-Colonial administration till 1857- Revolt of 1857- Early Resistance to British Rule-Rise of Nationalism in India-Indian Freedom Struggle under Mahatma Gandhi-Non- Cooperation Movement-Civil Disobedience Movement- Quit India Movement-British Official response to National movement- Independence of India Act 1947- Freedom and Partition.		
<b>UNIT-II</b>	<b>CONSTITUTION OF INDIA</b>	9
Historical Background – Indian Constitution: Constitution’ meaning of the term, Sources and constitutional history, Constituent Assembly of India – Philosophical foundations of the Indian Constitution – Preamble – Fundamental Rights – Directive Principles of State Policy – Fundamental Duties – Citizenship – Constitutional Remedies for citizens.		
<b>UNIT-III</b>	<b>STRUCTURE AND FUNCTIONS OF CENTRAL GOVERNMENT</b>	9
Union Government – Structure of the Union Government and Functions – President – Vice President – Prime Minister – Cabinet – Parliament – Supreme Court of India – Judicial Review.		
<b>UNIT-IV</b>	<b>STRUCTURE AND FUNCTION OF STATE GOVERNMENT AND LOCAL BODY</b>	9
State Government – Structure and Functions – Governor – Chief Minister – Cabinet – State Legislature – Judicial System in States – High Courts and other Subordinate Courts- Role and Importance, Municipalities: Introduction, Mayor and role of Elected Representative, CEO of Municipal Corporation, Pachayati Raj: Introduction, Elected officials and their roles, Village level: Role of Elected and Appointed officials.		
<b>UNIT-V</b>	<b>CONSTITUTIONAL FUNCTIONS AND BODIES</b>	9
Indian Federal System – Centre – State Relations – President’s Rule – Constitutional Functionaries – Assessment of working of the Parliamentary System in India- CAG, Election Commission, UPSC, GST Council and other Constitutional bodies-. NITI Aayog, Lokpal, National Development Council and other Non –Constitutional bodies.		
<b>Total Contact Hours</b>		<b>: 45</b>

**Course Outcomes: Upon completion of the course, students will be able to:**

<ul style="list-style-type: none"> <li>Appreciate the sacrifices made by freedom fighters during freedom movement.</li> </ul>
<ul style="list-style-type: none"> <li>Be responsible citizens and abide by the rules of the Indian constitution.</li> </ul>
<ul style="list-style-type: none"> <li>Be aware of the functions of the Indian government.</li> </ul>
<ul style="list-style-type: none"> <li>Be knowledgeable about the functions of the state Government and the Local bodies.</li> </ul>
<ul style="list-style-type: none"> <li>Apply the knowledge on constitutional functions and role of constitutional bodies and non-constitutional bodies.</li> </ul>

**SUGGESTED ACTIVITIES**

<ul style="list-style-type: none"> <li>Famous speeches from around the world relating to independence</li> <li>Case study</li> <li>Quiz on Portfolio and Cabinet</li> <li>Discussions on International Associations like the UN, BRICS, QUAD</li> <li>Presentation on issues around the world</li> </ul>
--

**SUGGESTED EVALUATION METHODS**

- Assignment topics
- Quizzes
- Class Presentation/Discussion
- Continuous Assessment Tests (CAT)

**Text Book(s):**

1. M. Laxmikanth, "Indian Polity, McGraw-Hill, New Delhi.
2. Durga Das Basu, "Introduction to the Constitution of India ", Lexis Nexis, New Delhi. 21<sup>st</sup>ed 2013.

## Semester – II

Course Code	Subject Name (Theory Courses)	Category	L	T	P	C
MA23213	DISCRETE MATHEMATICAL STRUCTURES	BS	3	1	0	4
<b>Common to B.E. - CSE and B. Tech. IT</b>						

Objectives:
<ul style="list-style-type: none"> <li>● To extend student's Logical and Mathematical maturity and ability to deal with abstraction.</li> </ul>
<ul style="list-style-type: none"> <li>● To provide discrete structures of many levels and to know the principle of counting.</li> </ul>
<ul style="list-style-type: none"> <li>● To give an understanding of relations and functions and to determine their properties.</li> </ul>
<ul style="list-style-type: none"> <li>● To provide the basic principles of sets and operations in sets and to Prove basic set equalities.</li> </ul>
<ul style="list-style-type: none"> <li>● To model problems in Computer Science using graphs and trees.</li> </ul>

<b>UNIT-I</b>	<b>LOGIC AND PROOFS</b>	<b>12</b>
Logic: Propositional equivalence, predicates and quantifiers - Methods of proofs - mathematical induction		
<b>UNIT-II</b>	<b>COMBINATORICS</b>	<b>12</b>
Counting: The basics of counting - The pigeonhole principle - Permutations and Combinations -Recurrence relations: solving recurrence relations, generating functions - Inclusion-Exclusion principle: application of inclusion-exclusion		
<b>UNIT-III</b>	<b>RELATIONS</b>	<b>12</b>
Relations - Equivalence relations – Functions - Bijections - Binary relations and graphs- Posets and Lattices -Hasse Diagrams – Boolean algebra		
<b>UNIT-IV</b>	<b>ALGEBRA</b>	<b>12</b>
Group theory: Groups, subgroups, Cosets and Lagrange's theorem - Permutation groups and Burnside's theorem - Isomorphism – Automorphisms - Homomorphism - Normal subgroups - Rings, Integral domains and Fields (only definitions)		
<b>UNIT-V</b>	<b>GRAPHS</b>	<b>12</b>
Graph theory: Introduction to graphs, graph terminology, representing graphs and graph isomorphism – Connectivity - Euler and Hamilton paths - Planar graphs - Graph coloring - Introduction to trees, application of trees.		
<b>Total Contact Hours: 60</b>		

Course Outcomes: On completion of the course, students will be able to
<ul style="list-style-type: none"> <li>● Demonstrate the ability to write and evaluate a proof or outline the basic structure and give examples of each proof technique described.</li> </ul>
<ul style="list-style-type: none"> <li>● Apply counting principles to determine probabilities in engineering problems.</li> </ul>
<ul style="list-style-type: none"> <li>● Demonstrate the relations and functions and to determine their properties in solving engineering problems.</li> </ul>
<ul style="list-style-type: none"> <li>● Analyse the concepts and properties of algebraic structures in the solving complex engineering problems.</li> </ul>
<ul style="list-style-type: none"> <li>● Use different traversal methods for trees and graphs arising in the field of engineering and technology.</li> </ul>

SUGGESTED ACTIVITIES
<ul style="list-style-type: none"> <li>● Problem solving sessions</li> <li>● Visio for drawing graphs</li> <li>● Online Calculators for PDNF and PCNF, recurrence relations and sets</li> <li>● Calculators for Logic gates</li> <li>● GeoGebra for Hasse diagrams and graphs</li> </ul>

**SUGGESTED EVALUATION METHODS**

- Problem solving in Tutorial sessions
- Assignment problems
- Quizzes and class test
- Discussion in classroom

<b>Course Code</b>	<b>Subject Name (Lab oriented Theory Courses)</b>	<b>Category</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
EC23232	DIGITAL LOGIC AND MICROPROCESSOR	ES	3	0	2	4
<b>For B.E Programme CSE and CSECS</b>						

**Objectives:**

- To learn basic postulates of Boolean algebra and infer the methods for simplifying Boolean expressions.
- To illustrate the formal procedures for the analysis and design of Combinational and Sequential circuits.
- To understand the basic functionalities of 8085 and programming logic.
- To understand the concepts and basic functionalities of 8051 architecture and its functionalities.
- To peruse the knowledge of programming, peripherals and interface various devices.

<b>UNIT-I</b>	<b>MINIMIZATION TECHNIQUES AND LOGIC GATES</b>	<b>9</b>
<b>Fundamentals:</b> Boolean postulates and laws, De-Morgan's Theorem, Principle of Duality, Boolean expression, Sum of Products (SOP), Product of Sums (POS).		
<b>Minimization Techniques:</b> Minimization of Boolean expressions using Boolean laws, Karnaugh map, Quine McCluskey method of minimization, don't care conditions.		
<b>Logic Gates:</b> Implementations of Logic Functions using gates, NAND–NOR implementations.		
<b>UNIT-II</b>	<b>COMBINATIONAL AND SEQUENTIAL CIRCUITS</b>	<b>9</b>
<b>Combinational Circuits:</b> Full Adder, Full Subtractor, Code Converters-Binary to Gray and Gray to Binary, 2-bit Magnitude Comparator, Multiplexer, Demultiplexer, Decoder, Encoder-Priority Encoder, Parallel Binary Adder/Subtractor.		
<b>Sequential Circuits:</b> Memory element: Flip-flops: RS, JK, D, T, Shift Registers - SISO, SIPO, PISO, PIPO. Design: Synchronous & Asynchronous counters - Up/Down counter, Modulo–N counter.		
<b>UNIT-III</b>	<b>THE 8085 MICROPROCESSORS</b>	<b>9</b>
8085 Architecture - Pin configuration - Instruction Set - Addressing modes – Interrupts- Assembly Language Programming.		
<b>UNIT-IV</b>	<b>THE 8051 MICROCONTROLLERS</b>	<b>9</b>
8051 Architecture - SFR - Instruction Set - Addressing modes – Programming 8051 Timers, Serial Port, Interrupt handling, Assembly Language Programming.		
<b>UNIT-V</b>	<b>INTERFACING &amp; APPLICATIONS</b>	<b>9</b>
Programmable Peripheral Interface (8255), Programmable Interval Timer (8253), DAC and ADC interfacing with 8085, Stepper Motor Control and Traffic Light Control interfacing with 8051.		
<b>Total Contact Hours:</b>		<b>45</b>

<b>Description of the Experiments</b>	<b>Total Contact Hours: 60</b>
1. Design and Implementation of adder, subtractor using logic gates.	
2. Design and Implementation of Binary to Gray and Gray to Binary code converter	
3. Design and Implementation of Multiplexer and De-multiplexer using logic gates.	
4. Design and Implementation of 4-bit Synchronous counters.	
5. Implementation of SISO, SIPO, PISO and PIPO shift registers using Flip- Flop.	
6. 8-bit Arithmetic, Logical and Decimal Arithmetic Operations using 8085.	
7. 8 Searching an array of numbers using 8085.	
8. 8-bit Arithmetic, Logical operations using 8051.	
9. 8255 - Parallel interface with 8085.	
10. 8253– Timer interface with 8085.	
11. Stepper Motor Control using 8051.	

**Course Outcomes: On completion of the course students will be able to:**

- Simplify the Boolean expressions using basic postulates of Boolean algebra with suitable minimization
- Apply the procedure to design and implement combinational and sequential circuits.
- Interpret the concepts of 8085 and develop programs using 8085.
- Analyze the concepts of 8051 and to infer the basic functionalities.
- Explore the knowledge of interfacing and use it for different applications.

**SUGGESTED ACTIVITIES (if any) (UNIT/ Module Wise) – Could suggest topic**

- Problem solving sessions- Tabulation Method
- Flipped classroom – 8051 architectures.
- Activity based learning- Quiz- Instruction set

**SUGGESTED EVALUATION METHODS (if Any) (UNIT/ Module Wise) – could suggest topic**

- Tutorial problems – K-map, Quine Mc-Cluskey method
- Assignment problems – Boolean expression-based problems
- Quizzes- 8085, 8051 concepts
- Class Presentation/Discussion- Architecture topics

<b>Course Code</b>	<b>Subject Name (Lab oriented Theory Courses)</b>	<b>Category</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
GE23111	ENGINEERING GRAPHICS	ES	2	0	4	4
<b>For B.E. Programme CSE, CSECS and B.Tech. Programme in IT, AIML &amp; AIDS</b>						

<b>Objectives:</b>
<ul style="list-style-type: none"> <li>● To understand the importance of the drawing in engineering applications</li> <li>● To develop graphic skills for communication of concepts, ideas and design of engineering products</li> <li>● To expose them to existing national standards related to technical drawings.</li> <li>● To improve their visualization skills so that they can apply this skill in developing new products.</li> <li>● To improve their technical communication skill in the form of communicative drawings</li> </ul>

<b>CONCEPTS AND CONVENTIONS (Not for Examination)</b>		<b>1</b>
Importance of graphics in engineering applications–Use of drafting instruments– BIS conventions and specifications– Size, layout and folding of drawing sheets– Lettering and dimensioning. Basic Geometrical constructions.		
<b>UNIT-I</b>	<b>PLANE CURVES AND PROJECTION OF POINTS</b>	<b>5+12</b>
Curves used in engineering practices: Conics–Construction of ellipse, parabola and hyperbola by eccentricity method – Cycloidal Curves–Construction of cycloid, epicycloid and hypocycloid – Construction of involutes of square and circle– Drawing of tangents and normal to the above curves. Principles of Projection and Projection of points.		
<b>UNIT-II</b>	<b>PROJECTION OF LINES AND PLANE SURFACES</b>	<b>6+12</b>
Projection of straight lines (First angle projection) inclined to both the principal planes – Determination of true lengths and true inclinations by rotating line method Projection of planes (polygonal and circular surfaces) inclined to both the principal planes by rotating object method.		
<b>UNIT-III</b>	<b>PROJECTION OF SOLIDS AND PROJECTION OF SECTIONED SOLIDS</b>	<b>12</b>
Projection of simple solids like prisms, pyramids, cylinder and cone when the axis is inclined to one of the principal planes by rotating object method. Sectioning of solids in simple vertical position when the cutting plane is inclined to HP and perpendicular to VP –obtaining true shape of the section. Practicing three-dimensional modeling of simple objects by CAD software (Not for examination)		
<b>UNIT-IV</b>	<b>DEVELOPMENT OF SURFACE AND ISOMETRIC PROJECTIONS</b>	<b>12</b>
Development of lateral surfaces of simple and sectioned solids – Prisms, pyramids cylinders and cones. Principles of isometric projection–isometric scale–Isometric projections of simple solids and truncated solids - Prisms, pyramids, cylinders and cones .Model making of isometric projection of combination of solids as assignment (Not for End semester)		
<b>UNIT-V</b>	<b>FREE HAND SKETCHING AND PERSPECTIVE PROJECTIONS</b>	<b>12</b>
Free Hand sketching: Freehand sketching of multiple views from pictorial views of objects - Freehand sketching of pictorial views of object from multiple views. Perspective projection of simple Solids-Prisms, pyramids, cylinder and cone by visual ray method.		
<b>90 Periods</b>		<b>Total Contact Hours: (L=30; P=60)</b>

<b>Course Outcomes: After learning the course, the students should be able</b>
<ul style="list-style-type: none"> <li>● To construct different plane curves and to comprehend the theory of projection</li> <li>● To draw the basic views related to projection of lines and planes</li> <li>● To draw the projection of simple solids and to draw the projection of development of surfaces of Sectioned solids in simple vertical position</li> <li>● To draw the orthographic projection from pictorial objects and Isometric projections of simple solids</li> <li>● To visualize Perspective view of simple solids</li> </ul>

Course Code	Subject Name (Lab oriented Theory Courses)	Category	L	T	P	C
CS23231	DATA STRUCTURES	PC	3	0	4	5
<b>For B.E. Programme CSE, CSECS, CSD and B.Tech. Programme in IT, AIML &amp; AIDS</b>						

<b>Objectives:</b>						
● To apply the concepts of Linked List in the applications of various linear data structures.						
● To demonstrate the understanding of stacks, queues and their applications.						
● To apply the concepts of Linked List in the applications of various nonlinear data structures.						
● To understand the implementation of graphs and their applications.						
● To be able to incorporate various sorting and hashing techniques in real time scenarios						

<b>UNIT-I</b>	<b>LINEAR DATA STRUCTURES – LIST</b>	<b>9</b>
Self-Referential Structures, Dynamic Memory Allocation, Linked list implementation - Singly Linked List, Doubly Linked List, Circular Linked List, Applications of List.		
<b>UNIT-II</b>	<b>LINEAR DATA STRUCTURES – STACKS, QUEUES</b>	<b>9</b>
Stack – Operations, Array and Linked list implementation, Applications – Evaluation of Arithmetic Expressions, Queues-Operations, Array and Linked list Implementation.		
<b>UNIT-III</b>	<b>NON-LINEAR DATA STRUCTURES – TREES</b>	<b>9</b>
Tree Terminologies, Binary Tree Representation, Tree Traversals, Binary Search Trees, Binary Heap, Height Balance trees – AVL Trees.		
<b>UNIT-IV</b>	<b>NON-LINEAR DATA STRUCTURES – GRAPHS</b>	<b>9</b>
Representation of Graphs, Topological Sort, Depth First Search and Breadth-First Search, Minimum Spanning Tree – Prim's Algorithm, Shortest path algorithm – Dijkstra's Algorithm.		
<b>UNIT-V</b>	<b>SEARCHING, SORTING AND HASHING TECHNIQUES</b>	<b>9</b>
Sorting Techniques – Insertion Sort, Quick Sort, Merge Sort, Hashing- Hashing functions – Mid square, Division, Folding, Collision Resolution Techniques – Separate Chaining – Open Addressing – Rehashing.		
<b>Contact Hours</b>		<b>: 45</b>

<b>List of Experiments</b>	
<b>1</b>	Implementation of Single Linked List (Insertion, Deletion and Display).
<b>2</b>	Implementation of Doubly Linked List (Insertion, Deletion and Display).
<b>3</b>	Implementation of Stack using Array and Linked List implementation.
<b>4</b>	Implementation of Queue using Array and Linked List implementation.
<b>5</b>	Implementation of Binary Search Tree and perform Tree Traversal Techniques.
<b>6</b>	Program to perform Quick Sort
<b>7</b>	Program to perform Merge Sort
<b>8</b>	Program to perform Linear Probing.
<b>9</b>	Program to perform Rehashing.
<b>10</b>	Mim Project: <ul style="list-style-type: none"> <li>● Contact book application using Linked List.</li> <li>● Dictionary using Binary search trees.</li> <li>● Snake Game.</li> <li>● Chess Game.</li> <li>● Travel Planner (Shortest Path Algorithm).</li> <li>● Tic-Tac-Toe Game.</li> <li>● Library Management System.</li> <li>● Project Management System.</li> <li>● other projects.</li> </ul>
<b>Contact Hours : 60</b>	
<b>Total Contact Hours: 105</b>	
<b>Platform Needed:</b> GCC Compiler for Windows/Linux	

<b>Course Outcomes: After learning the course, the students should be able</b>
<ul style="list-style-type: none"> <li>Understand and apply the various concepts of Linear data Structures</li> <li>Understand and apply the various concepts of Non-Linear data Structures.</li> <li>Understand and apply the various sorting and Hashing concepts.</li> <li>Analyse and apply the suitable data structure for their research.</li> <li>Choose efficient data structures and apply them to solve real world problems.</li> </ul>

#### SUGGESTED ACTIVITIES

- Role play- Linked List (Unit 1).
- Mind Map, Poster Design - Stack and Queue (Unit 2).
- Flipped Classroom - Binary Heap (Unit 3).
- Poster Design - Graph (Unit4).
- Implementation of small module- Hashing (Unit5).

#### SUGGESTED EVALUATION METHODS

- Assignment problems - Linked List (Unit 1).
- Tutorial problems - Applications – Evaluation of Arithmetic Expressions (Unit 2).
- Quizzes - BST and Binary Heap (Unit 3).
- Tutorial problems- Graph traversal (Unit 4).
- Quizzes - Hashing and Sorting (Unit5).

Course Code	Subject Name (Lab oriented Theory Courses)	Category	L	T	P	C
HS23221	TECHNICAL COMMUNICATION II	HS	0	0	2	1

Common to all branches of B.E/B. Tech programmes

Objectives:
<ul style="list-style-type: none"> <li>To facilitate students to improve their vocabulary for a better communication</li> </ul>
<ul style="list-style-type: none"> <li>To enable learners to understand and reproduce language</li> </ul>
<ul style="list-style-type: none"> <li>To aid students to write technical reports in a convincing manner</li> </ul>
<ul style="list-style-type: none"> <li>To expose students to different sentence structures</li> </ul>
<ul style="list-style-type: none"> <li>To equip learners to present their ideas in an efficient manner</li> </ul>

UNIT-I	VOCABULARY FOR BETTER COMMUNICATION	6
<b>Listening:</b> Telephonic Conversations and TV News <b>Reading:</b> Newspapers and Magazines <b>Speaking:</b> Conversational Practice: Speaking in a given situation, asking permission and requesting etc., <b>Writing:</b> Job Application Letter and Resume <b>Grammar:</b> Reference words: pronouns and determiners <b>Vocabulary:</b> Guessing meanings of words in different contexts.		
UNIT-II	FUNCTIONAL LANGUAGE ASPECTS	6
<b>Listening:</b> Motivational listening – listening to real life challenges <b>Reading:</b> Articles and Technical reports <b>Speaking:</b> Using Polite Expressions, Indirect Questions <b>Writing:</b> Paraphrasing a Text, Poem <b>Grammar:</b> Purpose Statements, Cause and Effect Expressions <b>Vocabulary:</b> Neologisms.		
UNIT-III	TECHNICAL REPORTWRITING	6
<b>Listening:</b> Empathetic Listening – Giving Solutions to Problems <b>Reading:</b> Inferential Reading <b>Speaking:</b> Dialogues – Interviewing Celebrities / Leaders / Sportspersons, etc., <b>Writing:</b> Report Writing <b>Grammar:</b> Functional Usage of Expressions – used to, gone / been, etc., <b>Vocabulary:</b> Words Often Confused		
UNIT-IV	STRUCTURAL GRAMMAR	6
<b>Listening:</b> Comprehension (IELTS practice tests) <b>Reading:</b> Intensive Reading for specific information <b>Speaking:</b> Pick and Talk <b>Writing:</b> Proposals <b>Grammar:</b> Sentence Structures – Simple, Compound, Complex Sentences <b>Vocabulary:</b> Replacing dull words with vivid ones		
UNIT-V	PRESENTATION SKILLS	6
<b>Listening:</b> Discriminative listening – sarcasm, irony, pun, etc., <b>Reading:</b> Practice of chunking – breaking up reading materials <b>Speaking:</b> Mini presentation on some topic <b>Writing:</b> Minutes of the meeting <b>Grammar:</b> Correction of Errors <b>Vocabulary:</b> Advanced vocabulary – fixing appropriate words in the given context.		
		<b>Total Contact Hours: 30</b>

Course Outcomes: On completion of the course students will be able to
<ul style="list-style-type: none"> <li>Communicate effectively using appropriate vocabulary</li> </ul>
<ul style="list-style-type: none"> <li>Use the acquired language skills to comprehend various types of language contents</li> </ul>
<ul style="list-style-type: none"> <li>Evaluate different texts and write effective technical content</li> </ul>
<ul style="list-style-type: none"> <li>Use appropriate sentence structures to convey their thoughts in varied contexts</li> </ul>
<ul style="list-style-type: none"> <li>Present their concepts and ideas in an effective manner</li> </ul>

**SUGGESTED ACTIVITIES**

- Story Lines
- One truth and two lies
- Hang Man
- Pictionary
- Word Scramble
- Case study

**SUGGESTED EVALUATION METHODS**

- Assignment topics
- Quizzes
- Class Presentation/Discussion
- Continuous Assessment Tests

Course Code	Subject Name (Lab oriented Theory Courses)	Category	L	T	P	C
HS23222	ENGLISH FOR PROFESSIONAL COMPETENCE	HS	0	0	2	1
<b>Common to all branches of B.E/B. Tech programmes</b>						

Objectives:
<ul style="list-style-type: none"> <li>To facilitate the learners in acquiring listening and reading competence</li> </ul>
<ul style="list-style-type: none"> <li>To enable the learners to communicate effectively through written and oral medium</li> </ul>
<ul style="list-style-type: none"> <li>To assist the learners in preparing for competitive examinations</li> </ul>
<ul style="list-style-type: none"> <li>To train the students in acquiring corporate skills</li> </ul>
<ul style="list-style-type: none"> <li>To inculcate professional standards among the students and make them realize their responsibility in addressing the challenges</li> </ul>

<b>UNIT-I</b>	<b>RECEPTIVE SKILLS</b>	<b>6</b>
<b>Listening</b> – Comprehensive Listening – Watching the news – Listening to a peer giving presentation, etc. – Critical Listening – Watching a televised debate, listening to poems – <b>Reading</b> – Extensive Reading – Short stories and One-act Plays – Intensive Reading – Articles or Editorials in Magazines, Blog posts on topics like science and technology, arts, etc.		
<b>UNIT-II</b>	<b>PRODUCTIVE SKILLS</b>	<b>6</b>
<b>Speaking</b> – Demonstrative Speaking – Process description through visual aids – Persuasive Speaking – Convincing the listener with the speaker’s view – <b>Writing</b> – Descriptive Writing - Describing a place, person, process – Courseive Writing – Autobiography, Writing based on personal opinions and interpretations.		
<b>UNIT-III</b>	<b>ENGLISH FOR COMPETITIVE EXAMS</b>	<b>6</b>
An introduction to International English Language Testing System (IELTS) – Test of English as a Foreign Language (TOEFL) – Graduate Record Examination (GRE) – Civil Service, Indian Economic Service Examination, Indian Statistical Service Examination, Combined Defence Services Examination, Staff Selection- (Language Related) –Aptitude tests.		
<b>UNIT-IV</b>	<b>CORPORATE SKILLS</b>	<b>6</b>
<b>Critical Thinking and Problem Solving</b> – Case Study, Brainstorming, Q & A Discussion – <b>Team work and Collaboration</b> – Activities like Office Debates, Perfect Square, Blind Retriever, etc. – <b>Professionalism and Strong Work Ethics</b> – Integrity, Resilience, Accountability, Adaptability, Growth Mind set.		
<b>UNIT-V</b>	<b>PROJECT WORK</b>	<b>6</b>
Case Study based on the challenges faced by the employers and the employees – Devise Plan, Provide Solution.		
<b>Total Contact Hours: 30</b>		

Course Outcomes: After learning the course, the students should be able
<ul style="list-style-type: none"> <li>Interpret and respond appropriately in the listening and reading contexts.</li> </ul>
<ul style="list-style-type: none"> <li>Express themselves effectively in spoken and written communication</li> </ul>
<ul style="list-style-type: none"> <li>Apply their acquired language skills in writing the competitive examinations</li> </ul>
<ul style="list-style-type: none"> <li>Exhibit their professional skills in their work place</li> </ul>
<ul style="list-style-type: none"> <li>Identify the challenges in the work place and suggest strategies solutions</li> </ul>

SUGGESTED ACTIVITIES
<ul style="list-style-type: none"> <li>Online Quizzes on Vocabulary</li> <li>Online Quizzes on grammar</li> <li>Communication Gap Exercises</li> <li>Presentations</li> <li>Word Building Games</li> <li>Case study</li> </ul>

SUGGESTED EVALUATION METHODS
<ul style="list-style-type: none"> <li>Assignment topics</li> <li>Quizzes</li> <li>Class Presentation/Discussion</li> <li>Continuous Assessment Tests</li> </ul>

Course Code	Subject Name (Lab Courses)	Category	L	T	P	C
GE23122	ENGINEERING PRACTICES - ELECTRICAL AND ELECTRONICS	ES	0	0	2	1
<b>For B.E. Programme CSE, CSECS, CSD and B.Tech. Programme in IT, AIML &amp; AIDS</b>						

**Objectives:**

- To provide hands-on experience on various basic engineering practices in Electrical Engineering.
- To provide hands-on experience on various basic engineering practices in Electronics Engineering.

**List of Experiments**

**A. ELECTRICAL ENGINEERING PRACTICE**

1	Residential house wiring using switches, fuses, indicators, lamp and energy meter.
2	Fluorescent lamp wiring.
3	Stair case wiring.
4	Measurement of electrical quantities – voltage, current, power & power factor in RL circuit.
5	Measurement of earth resistance using Megger.
6	Study of Ceiling Fan and Iron Box

**B. ELECTRONICS ENGINEERING PRACTICE**

1	Study of electronic components and equipment – Resistor, colour coding, measurement of AC signal parameters (peak-peak, rms period, frequency) using CRO/DSO.		
2	(a) Measurement of electrical quantities using Multimeter (b) Testing of electronic components.		
3	Study of logic gates: AND, OR, EXOR and NOT.		
4	Generation of Clock Signals.		
5	Soldering practice – Components Devices and Circuits – Using general purpose PCB.		
6	Measurement of ripple factor of Half-wave and Full-wave Rectifiers.		
<b>Total Contact Hours</b>		<b>:</b>	<b>30</b>

**Course Outcomes: On completion of the course, the students will be able to**

- Fabricate the basic electrical circuits
- Implement the house wiring circuits
- Fabricate the electronic circuits
- Verify the truth table of logic gates
- Design the Half-wave and Full-wave Rectifiers using diodes and passive components

**Reference Books(s) / Web links:**

CS23221	PYTHON PROGRAMMING LAB	PC	0	0	4	2
<b>For B. E. Programme CSE, CSECS, CSD and B.Tech. Programme in IT, AIML &amp; AIDS</b>						

#### Objectives:

• Learn the basics of Python Programming and Control statements
• Demonstrate various Python data structures like Lists, Tuples, Sets and dictionaries
• Understand about Strings, Functions, Modules and Regular Expressions in Python Programming
• Understand the concepts of file handling using Python
• Understand the concepts of Numpy, Pandas, sciPy modules

#### Description of the Experiments

1. Experiments based on Variables, Datatypes and Operators in Python.	
2. Implement various control statements in python.	
3. Implement various String & List operations.	
4. Implement Inbuilt functions, User-defined functions and Lambda functions.	
5. Implementation of Tuples, sets, Dictionary and its operations.	
6. Implementation of Exception Handling and I/O files.	
7. Experiments based on Packages: math, datetime, platform.	
8. Experiments based on Packages: NumPy, pandas, matplotlib	
9. Experiments based on Packages: collections	
10. Experiments based on Packages: sciPy	
11. Mini Project	
<b>Total Contact Hours:</b>	<b>60</b>

#### Course Outcomes: On completion of the course students will be able to:

• Use the basics of Python Programming in problem solving and conditionals and loops.
• Use of Python Data structures such as List, Sets, Tuples, Dictionary for Compound Data
• Use Strings, Functions, Modules and Regular Expressions in Python Programming
• Implement the concepts of file handling and Exceptional handling.
• Apply Numpy, Pandas and SciPy for numerical and statistical data

#### Text Book(s):

Course Code	Subject Name (Theory Courses)	Category	L	T	P	C
MC23112	ENVIRONMENTAL SCIENCE AND ENGINEERING	MC	3	0	0	0
<b>For B.E. Programme CSE, CSECS, CSD and B.Tech. Programme in IT, AIML &amp; AIDS</b>						

**Objectives:**

<ul style="list-style-type: none"> <li>To develop the understanding of environmental and associated issues</li> </ul>
<ul style="list-style-type: none"> <li>To develop an attitude of concern for the environment</li> </ul>
<ul style="list-style-type: none"> <li>To promote enthusiasm in participating environmental protection initiatives</li> </ul>
<ul style="list-style-type: none"> <li>To develop skills to solve environmental degradation issues</li> </ul>

<b>UNIT-I</b>	<b>AIR AND NOISE POLLUTION</b>	<b>9</b>
Definition –sources of air pollution –chemical and photochemical reactions in the atmosphere - formation of smog, PAN, acid rain, ozone depletion, particulate pollutants-Air quality standards-Air quality indices - control of particulate air pollutants-gravitational settling chambers, cyclone separators, wet collectors, fabric filters (Bag-house filter), electrostatic precipitators (ESP)-catalytic converters. Noise pollution-Sources; Health Effects-Standards- Measurement and control methods		
<b>UNIT-II</b>	<b>WATER POLLUTION AND ITS MANAGEMENT</b>	<b>9</b>
Definition-causes-effects of water pollution-point and nonpoint sources of wastewater-marine pollution-thermal pollution-control of water pollution by physical, chemical and biological methods–wastewater treatment-primary, secondary and tertiary treatment-sources and characteristics of industrial effluents- zero liquid discharge		
<b>UNIT-III</b>	<b>SOLID WASTE AND HAZARDOUS WASTE MANAGEMENT</b>	<b>9</b>
Solid waste – types- municipal solid waste management: Sources, characteristics, collection, and transportation- sanitary landfill, recycling, composting, incineration, energy recovery options from waste - Hazardous waste – Types, characteristics, and health impact - Hazardous waste management: neutralization, oxidation reduction, precipitation, solidification, stabilization, incineration and final disposal. E-waste-definition-sources-effects on human health and environment- E-waste management- recovery of metals-Role of E-waste management within the initiatives of the Govt.of India- Swachh Bharat Mission.		
<b>UNIT-IV</b>	<b>SUSTAINABLE DEVELOPMENT</b>	<b>9</b>
Sustainable development- concept-dimensions-sustainable development goals-value education- gender equality-food security- poverty-hunger-famine-Twelve principles of green chemistry- green technology- definition, importance, cleaner development mechanism- carbon credits, carbon trading, carbon sequestration, eco labelling-International conventions and protocols-Disaster management.		
<b>UNIT-V</b>	<b>ENVIRONMENTAL MANAGEMENT AND LEGISLATION</b>	<b>9</b>
Environmental Management systems - ISO 14000 series- Environmental Audit-Environmental Impact Assessment-lifecycle assessment- human health risk assessment - Environmental Laws and Policy- Objectives - Polluter pays principle, Precautionary principle - The Environment (Protection) Act 1986 - Role of Information technology in environment and human health.		
<b>Total Contact Hours</b>		<b>: 45</b>

**Course Outcomes: On completion of the course, the students will be able to**

<ul style="list-style-type: none"> <li>Associate air and noise quality standards with environment and human health.</li> </ul>
<ul style="list-style-type: none"> <li>Illustrate the significance of water and devise control measures for water pollution.</li> </ul>
<ul style="list-style-type: none"> <li>Analyze solid wastes and hazardous wastes.</li> </ul>
<ul style="list-style-type: none"> <li>Outline the goals of sustainable development in an integrated perspective.</li> </ul>
<ul style="list-style-type: none"> <li>Comprehend the significance of environmental laws.</li> </ul>

## Semester - III

Course Code	Subject Name (Theory Courses)	Category	L	T	P	C
MA23312	FOURIER SERIES AND NUMBER THEORY	BS	3	1	0	4
<b>Common to III Sem. B.E. – Electrical and Electronics Engineering, Electronics and Communication Engineering, Biomedical Engineering, Computer Science and Engineering &amp; Computer Science and Engineering (Cyber Security) and B.Tech. – Information Technology</b>						

<b>Objectives:</b>
<ul style="list-style-type: none"> <li>● To express Fourier series to study the behaviour of periodic functions and their applications in system communications, digital signal processing and field theory.</li> </ul>
<ul style="list-style-type: none"> <li>● To represent continuous function arising in wave and heat propagation, signals and systems using Fourier Transforms</li> </ul>
<ul style="list-style-type: none"> <li>● To provide various numerical methods in solving problems that occurs in the field of Engineering and Technology.</li> </ul>
<ul style="list-style-type: none"> <li>● To introduce and apply the concepts of finite fields and congruences.</li> </ul>
<ul style="list-style-type: none"> <li>● To present a rigorous development of Number Theory using axioms, definitions, examples, theorems and their proofs.</li> </ul>

<b>UNIT-I</b>	<b>FOURIER SERIES</b>	12
Dirichlet's conditions – General Fourier series – Odd and even functions – Half range sine series – Half range cosine series – Parseval's identity – Harmonic analysis.		
<b>UNIT-II</b>	<b>FOURIER TRANSFORMS</b>	12
Statement of Fourier integral theorem – Fourier transform pair – Fourier sine and cosine transforms – Properties – Transforms of simple functions – Convolution theorem – Parseval's identity - Application to boundary value problems.		
<b>UNIT-III</b>	<b>NUMERICAL SOLUTIONS OF BOUNDARY VALUE PROBLEMS</b>	12
Finite difference method for solving second order differential equations - Finite difference techniques for the solution of two-dimensional Laplace and Poisson equations on rectangular domain – One dimensional heat flow equation by implicit and explicit methods – One Dimensional Wave Equation by Explicit method		
<b>UNIT-IV</b>	<b>CONGRUENCES</b>	12
Finite Fields -Linear Diophantine equations – Congruence 's – Linear Congruence 's – Applications: Divisibility tests – Modular exponentiation-Chinese remainder theorem – 2 x 2 linear systems.		
<b>UNIT-V</b>	<b>CLASSICAL THEOREMS IN NUMBER THEORY</b>	12
Wilson 's theorem – Fermat 's little theorem – Euler 's theorem – Euler 's Phi functions – Tau and Sigma functions.		
<b>Total Contact Hours:60</b>		

<b>Course Outcomes: On completion of the course, students will be able to</b>
<ul style="list-style-type: none"> <li>● Demonstrate Fourier series to study the behaviour of periodic functions and their applications in engineering problems such as system communications, digital signal processing and field theory.</li> </ul>
<ul style="list-style-type: none"> <li>● Apply the shifting theorems, Fourier integral theorems, Inverse Fourier sine and cosine transforms appropriate problems in engineering and technology.</li> </ul>
<ul style="list-style-type: none"> <li>● Solve differential equations numerically that arise in course of solving complex engineering problems.</li> </ul>
<ul style="list-style-type: none"> <li>● Explain the fundamental concepts of finite fields and congruence, and their role in modern mathematics and applied contexts.</li> </ul>
<ul style="list-style-type: none"> <li>● Work effectively as part of a group to solve challenging problems in Number Theory.</li> </ul>

<b>SUGGESTED ACTIVITIES</b>
<ul style="list-style-type: none"> <li>● Problem solving sessions</li> <li>● Tutorial Sessions by involving two faculty members</li> </ul>

**SUGGESTED EVALUATION METHODS**

- Problem solving in Tutorial sessions
- Assignment problems
- Quizzes and class test
- Discussion in classroom

Subject Code	Subject Name (Theory course)	Category	L	T	P	C
CS23311	COMPUTER ARCHITECTURE	PC	3	0	0	3
<b>B.E. Programme for CSE</b>						

<b>Objectives:</b>	
•	To learn the basic Instructions, its operations and the concept of runtime in a system.
•	To familiarize the students with arithmetic and logic unit and implementation of fixed point and floating-point arithmetic operations.
•	To create a pipelined MIPS processor with optimized data and control paths and how the pipeline processor works based on the execution of overlapping instructions
•	To explore instruction-level parallelism with the aim of comprehending and enhancing the efficiency of multicore processors.
•	To expose students to memory system design and methods of interfacing with I/O devices and standard I/O interfaces to facilitate learning and understanding.

<b>UNIT-I</b>	<b>PROCESSOR ARCHITECTURES &amp; PERFORMANCE</b>	<b>9</b>
RISC, CISC Architecture, Eight ideas, Technologies for Building Processors and Memory, Performance in a computer system – CPU Performance and its factors, Instruction Performance, Classic CPU Performance Equation, Power wall, Instructions – Operations & Operands, representing instructions, Logical operations, Instructions for decision making, Addressing Modes. Case Study: ARM Architecture.		
<b>UNIT-II</b>	<b>ALU DESIGN &amp; ARITHMETIC: INTEGER, FLOATING POINT</b>	<b>9</b>
Design of ALU, Integer Arithmetic: Addition, Subtraction, Multiplication-Sequential multiplication algorithm, Booth's algorithm- Recoding Technique, Bit pair Recoding Technique, and Division– Restoring and Non-Restoring algorithm, Floating Point Arithmetic: Representation, Addition, subtraction, Multiplication.		
<b>UNIT-III</b>	<b>MIPS IMPLEMENTATION &amp; PIPELINING</b>	<b>9</b>
MIPS implementation, building data path- Creating a Single Data path, Simple Data path with the Control Unit, Pipelining– Pipeline stages with advantages and its disadvantages, Pipelined data path, Pipeline Hazards and its types- Data hazards and its types, Methods of minimizing data hazards, Control Hazard- schemes for resolving control hazards, Branch prediction algorithms, Exceptions.		
<b>UNIT-IV</b>	<b>ADVANCED TECHNIQUES OF PARALLELISM</b>	<b>9</b>
Instruction level parallelism, Superscalar processors–Policies in Instruction Issue, Register renaming, Superscalar Implementation, VLIW processors-Planning by the compiler, Comparison Superscalar vs. VLIW processor– Flynn's classification, The difficulty of parallel programs, Shared memory multiprocessors, Introduction to graphics processors, Case Study: Optimizing Performance in AMD Ryzen Processors.		
<b>UNIT-V</b>	<b>MEMORY ORGANIZATION AND STRUCTURE: CACHES AND VIRTUAL MEMORY</b>	<b>9</b>
Memory hierarchy - Memory technologies, Basic principles of the cache, multi-level cache, Organizations: fully associative, direct mapped and set associative, Replacement algorithms, Virtual memory – Operation of virtual memory: paging, segmentation, paged segments, Translation of virtual addresses to physical or real addresses, Translation Look-aside Buffer (TLB), Input/output system, programmed I/O, DMA and interrupts, I/O processors. Case Study: multicore processors in modern smartphones.		
		<b>Contact Hours : 45</b>

<b>Course Outcomes: On completion of the course, the students will be able to</b>	
•	Understand the impact of instruction set architecture on cost-performance of computer design.
•	Perform computer arithmetic operations.
•	Design and analyze pipelined control units and hazards.
•	Develop the system skills in parallelism and multithreading.
•	Evaluate the performance of memory systems.

Subject Code	Subject Name (Lab Oriented Theory course)	Category	L	T	P	C
CS23331	DESIGN AND ANALYSIS OF ALGORITHMS	PC	3	0	2	4
<b>For B.E. Programme CSE, CSECS, CSD and B.Tech. Programme in IT, AIML &amp; AIDS</b>						

<b>Objectives:</b>
<ul style="list-style-type: none"> <li>Learn and understand the algorithm analysis techniques and complexity notations</li> <li>Become familiar with the different algorithm design techniques for effective problem solving in computing.</li> <li>Learn to apply the design techniques in solving various kinds of problems in an efficient way.</li> <li>Understand the limitations of Algorithm power.</li> <li>Solve variety of problems using different design techniques</li> </ul>

<b>UNIT I</b>	<b>INTRODUCTION TO ANALYSIS OF ALGORITHMS AND EXHAUSTIVE SEARCH</b>	<b>9</b>
Introduction- Algorithm-Fundamentals of Algorithmic Problem Solving-Analysis: Space Complexity - Time Complexity: Counter method, Mathematical Analysis of non-recursive algorithms- Asymptotic Notations - Using Limits for Comparing Orders of Growth – Basic Efficiency Classes-Brute Force Technique-Exhaustive Search-Travelling Salesperson Problem-Knapsack Problem		
<b>UNIT II</b>	<b>RECURRENCE RELATION AND GREEDY TECHNIQUE</b>	<b>10</b>
Mathematical Analysis of Recursive algorithms -Recurrence Relation-Solving Recurrence Relations: Substitution methods and Master Theorem Method. Greedy Method – Minimum Spanning Trees: Kruskal’s Algorithm– Fractional Knapsack - Huffman Codes-Activity Selection Problem.		
<b>UNIT-III</b>	<b>DIVIDE AND CONQUER TECHNIQUE</b>	<b>7</b>
Divide and Conquer Method-Introduction-Binary Search-Finding Min Max-Maximum Subarray Problem-Towers of Hanoi Problem-Finding the kth element-Analysis of Quick and Merge Sort.		
<b>UNIT IV</b>	<b>DYNAMIC PROGRAMMING TECHNIQUE</b>	<b>9</b>
Dynamic Programming-Rod Cutting-Longest Common Subsequence-Traveling Sales Person Problem-String Editing-Longest Common Substring-Longest non-decreasing subsequence-Stair Case Problem.		
<b>UNIT-V</b>	<b>BACKTRACKING BRANCH AND BOUND AND NP COMPLETE &amp; NP HARD</b>	<b>10</b>
Backtracking-Graph Coloring-n Queen’s Problem-Branch and Bound-Knapsack Problem-- NP Complete and NP Hard Problems: Basic Concepts - Non-Deterministic Algorithms - Class of NP Complete and NP Hard Problems- Approximation Algorithm- TSP.		
<b>Total Contact Hours</b>		<b>: 45</b>

<b>List of Experiments</b>		
1	Finding Time Complexity of algorithms	
2	Design and implement algorithms using Divide and Conquer Technique	
3	Design and implement algorithms using Greedy Technique	
4	Design and implement algorithms using Dynamic Programming	
5	Competitive Programming-Certain Techniques	
<b>Contact Hours:</b>		<b>30</b>
<b>Total Contact Hours:</b>		<b>75</b>

<b>Course Outcomes: On completion of course, you will be able to</b>
<ul style="list-style-type: none"> <li>Analyse the time and space complexity of various algorithms and compare algorithms with respect to complexities.</li> <li>Decide and apply Divide and Conquer design strategy to Synthesize algorithms for appropriate computing problems.</li> <li>Decide and Apply Greedy technique to Synthesize algorithms for appropriate computing problems.</li> <li>Decide and Apply Dynamic Programming technique to Synthesize algorithms for appropriate computing problems.</li> <li>Decide and Apply Backtracking and Branch and Bound techniques to Synthesize algorithms for appropriate computing problems.</li> </ul>

**Suggested Activities:**

- Complexity Analysis Exercises: Assign exercises where students practice calculating the space and time complexity of given algorithms using the counter method and mathematical analysis.
- Asymptotic Notations Quiz: Organize quizzes focusing on understanding and applying asymptotic notations to compare algorithm efficiency.
- Greedy technique and Divide and Conquer Technique-Problem-Solving Contests-Host contests where students solve problems like the activity selection problem using greedy techniques, encouraging competitive learning.
- Dynamic Programming-Case Studies on Optimization Problems-Discuss in-depth various optimization problems solved using dynamic programming, highlighting the strategy and solution steps.
- Approximation Algorithm Projects: Assign projects where students explore and implement approximation algorithms for problems

Subject Code	Subject Name (Lab Oriented Theory course)	Category	L	T	P	C
CS23332	DATABASE MANAGEMENT SYSTEMS	PC	3	0	4	5
<b>For B.E. Programme CSE, CSECS, CSD and B.Tech. Programme in IT ,AIML &amp; AIDS</b>						

Objectives:
<ul style="list-style-type: none"> <li>Understand the role of a database management system and construct simple and moderately advanced database queries using Structured Query Language (SQL).</li> </ul>
<ul style="list-style-type: none"> <li>Apply logical database design principles, including E-R diagrams, Relational Algebra, Tuple Relational calculus Representation and Query Processing</li> </ul>
<ul style="list-style-type: none"> <li>Know the importance of functional dependency and normalization, and what role it plays in the database design process and File Organization.</li> </ul>
<ul style="list-style-type: none"> <li>Understand the concept of a database transaction including concurrency control, backup and recovery, and data object locking and handling deadlocks.</li> </ul>
<ul style="list-style-type: none"> <li>Work with the foundation for No SQL technologies and web page designing</li> </ul>

UNIT I	DATABASE SYSTEMS AND SQL QUERY	9
Introduction – Purpose of Database Systems - View of Data –Database Architecture -Database Schema – Keys – Codd’s Rule –RDBMS- SQL: Data Definition – Domain types – Structure of SQL Queries - Modifications of the database – Set Operations – Aggregate Functions – Null Values- SQL Nested Subqueries – Complex Queries – Views – Joined relations – Complex Queries.		
UNIT II	PL/SQL, DATA MODEL AND QUERY PROCESSING	9
PL/SQL: Functions, Procedures, Triggers, Cursors –Dynamic SQL–Relational Algebra-Tuple Relational calculus-Domain Relational Calculus– Entity Relationship Model – Constraints -Entity Relationship Diagram - Design Issues of ER Model – Extended ER Features – Mapping ER Model to Relational Model– Query Processing – Heuristics for Query Optimization.		
UNIT- III	NORMAL FORMS AND INDEXING	9
Motivation for Normal Forms – Functional dependencies – Armstrong’s Axioms for Functional Dependencies – Closure for a set of Functional Dependencies – Definitions of 1NF-2NF-3NF and BCNF – Multivalued Dependency 4NF - Joint Dependency- 5NF-File Organization-Indexing B+ tree ,B-Tree		
UNIT IV	TRANSACTIONS	9
Transaction Concepts – ACID Properties – Schedules – Serializability – Transaction support in SQL – Need for Concurrency – Concurrency control –Two Phase Locking- Timestamp – Multiversion – Validation and Snapshot isolation– Multiple Granularity locking – Deadlock Handling – Recovery Concepts – Recovery based on deferred and immediate update – Shadow paging – ARIES Algorithm.		
UNIT-V	NOSQL DATABASE	9
NoSQL Database vs.SQL Databases – CAP Theorem –Migrating from RDBMS to NoSQL – MongoDB – CRUD Operations– MongoDB Sharding – MongoDB Replication – Web Application Development using MongoDB with Python and Java.		
<b>Total Contact Hours</b>		<b>: 45</b>

<b>List of Experiments</b>		
1	Introduction to SQL: DDL, DML, DCL, TCL. SQL clause: SELECT FROM WHERE GROUPBY, HAVING, ORDERBY Using SQLite/MySQL/Oracle	
2	Creation of Views, Synonyms, Sequence, Indexes, Save point.	
3	Creating an Employee database to set various constraints and subqueries.	
4	Optimize a SQL query construct considering time complexity.	
5	Write a PL/SQL block to specify constraints by accepting input from the user.	
6	Implementation of PL/SQL Procedure (IN, OUT, INOUT) with Exception Handling.	
7	Implementation of PL/SQL Function.	
8	Implementation of PL/SQL Cursor.	
9	Implementation of PL/SQL Trigger, Packages.	
10	Implementation of NoSQL basic commands using Cassandra/Mongo DB.	
11	Implementation of Data Model in NoSQL.	
12	Implementation of Aggregation, Indexes in NoSQL.	
13	<p><b>MINI PROJECT</b></p> <p>Database Connectivity with Front End Tools (Python/C/C++/JAVA) and Back End Tools (MySQL/SQLite/CASSANDRA/MONGO DB)</p> <p>For any problem selected, write the ER Diagram, apply ER mapping rules, normalize the relations, and follow the application development process.</p> <p>Make sure that the application should have five or more tables, at least one trigger and one stored procedure, using suitable frontend tool.</p> <p>Indicative areas include</p> <ol style="list-style-type: none"> <li>a) Inventory Control System.</li> <li>b) Material Requirement Processing.</li> <li>c) Hospital Management System.</li> <li>d) Railway Reservation System.</li> <li>e) Personal Information System.</li> <li>f) Web Based User Identification System.</li> <li>g) Timetable Management System.</li> <li>h) Hotel Management System</li> <li>i) Library Management System.</li> </ol>	
<b>Contact Hours:</b>		<b>60</b>
<b>Total Contact Hours:</b>		<b>105</b>

<b>Course Outcomes: On completion of course, you will be able to</b>	
•	Understand the use of the Relational model and apply SQL Queries
•	Apply PL/SQL, Dynamic SQL, understand the representation of Relational Algebra, Calculus and Query Processing
•	Understand the concept of normalization, Indexing and apply as a case study
•	Understand concurrency control and recovery mechanisms.
•	Use MongoDB NoSQL Database to Maintain Data of an Enterprise

Subject Code	Subject Name (Lab Oriented Theory course)	Category	L	T	P	C
CS23333	OBJECT ORIENTED PROGRAMMING USING JAVA	PC	1	0	6	4
<b>For B.E. Programme CSE, CSECS, CSD, CSBS and B.Tech. Programme in IT, AIML &amp; AIDS</b>						

Objectives:
<ul style="list-style-type: none"> <li>To understand Object Oriented Programming concepts and characteristics of Java.</li> </ul>
<ul style="list-style-type: none"> <li>To know the principles of classes, abstraction and inheritance.</li> </ul>
<ul style="list-style-type: none"> <li>To create packages, define exceptions and use interface.</li> </ul>
<ul style="list-style-type: none"> <li>To use I/O streams and collections in applications.</li> </ul>
<ul style="list-style-type: none"> <li>To design and build simple programs using Streams, Lambda and JDBC</li> </ul>

<b>UNIT I</b>	<b>INTRODUCTION TO OOP AND JAVA FUNDAMENTALS</b>	<b>3</b>
Introduction to Object Oriented Programming – An overview of Java - Java Architecture - Data Types - Variables- Operators.		
<b>UNIT II</b>	<b>CLASSES AND INHERITANCE</b>	<b>3</b>
Classes – Class Fundamentals - A Simple Class - Declaring Objects - Methods – Constructors Inheritance - Inheritance Basics - Member Access - Method Overriding - Abstract Classes - Object Class		
<b>UNIT-III</b>	<b>PACKAGES, INTERFACE &amp; EXCEPTION HANDLING</b>	<b>3</b>
Packages - Defining a Package - Access Protection - Imports - Interfaces - Implements - Nested Interfaces - Exception Handling - Types - try - catch - throw - throws – finally.		
<b>UNIT IV</b>	<b>I/O AND COLLECTIONS</b>	<b>3</b>
Input / Output Basics – Streams – Byte streams and Character streams – Collection Interfaces – Collection Classes.		
<b>UNIT-V</b>	<b>STREAMS API, LAMBDA AND JDBC</b>	<b>3</b>
Stream API – Reduction – Parallel – mapping – Collecting – Iterator - Lambda Expressions Functional Interfaces - Predefined Functional Interfaces - Accessing Databases with JDBC		
<b>Total Contact Hours</b>		<b>: 15</b>

<b>List of Experiments</b>		
1	Programs using control structures.	
2	Programs using arrays.	
3	Programs using strings and string buffer.	
4	Programs using classes and objects.	
5	Programs using inheritance.	
6	Programs using default & static methods in interfaces.	
7	Programs using functional interface.	
8	Programs to create user defined exceptions.	
9	Programs to implement Object Serialization.	
10	Programs using collections-LIST.	
11	Programs using collections-SET.	
12	Programs using collections-MAP.	
13	Programs using STREAMS.	
14	Programs using LAMBDA.	
15	Simple applications using JDBC.	
<b>Contact Hours:</b>		<b>90</b>
<b>Total Contact Hours:</b>		<b>105</b>

<b>Course Outcomes: On completion of the course, the students will be able to</b>	
•	Develop Java programs using OOP principles and Strings.
•	Develop Java programs with the concept's inheritance.
•	Build Java applications using exceptions and interfaces.
•	Develop Java applications using I/O and collections.
•	Develop interactive Java applications using Streams and JDBC.

<b>Suggested Activities:</b>	
•	<b>Quizzes</b> – basic concepts of JAVA & language basics.
•	<b>Tutorial</b> – Class & Inheritance.
•	<b>Flipped Classroom</b> – Packages & Interface.
•	<b>Mind Map, Poster Design</b> – IO & Collections.
•	<b>Implementation of small Systems</b> - JDBC.

Subject Code	Subject Name (Lab Oriented Theory course)	Category	L	T	P	C
CS23334	FUNDAMENTALS OF DATA SCIENCE	PC	3	0	2	4
<b>B.E Programme in CSE</b>						

Objectives:
• To understand the fundamental concepts of data science.
• To understand data cleaning and processing for data science.
• To learn the fundamentals of exploratory data analysis (EDA).
• To understand inferential data analytics
• To understand the Machine Learning concepts.

UNIT I	INTRODUCTION TO DATA SCIENCE	9
Evolution of Data Science-Data Science Roles-Variou fields of application- Types of Data- Introduction and Terminology -Classification and characteristics of data types-Understanding structured, unstructured, and semi-structured data- Data Security Issues- Example applications showcasing real-world scenarios.		
UNIT II	DATA CLEANING AND DATA PRE-PROCESSING	7
Data Collection and Data Pre-Processing Data Collection Strategies – Data Pre-Processing Overview–Data Cleaning–Data Integration and Transformation–Data Reduction–Data Discretization.		
UNIT-III	EXPLORATORY DATA ANALYTICS FUNDAMENTALS	9
EDA Significance and Comparison- Tools and Visual Aids for EDA-Data Transformation Techniques-Grouping and Aggregating Datasets-Pivot Tables, Cross-Tabulations, Heat Maps.		
UNIT IV	STATISTICAL INFERENCE AND ANALYSIS	11
Populations, Samples, and Random Sampling- Sampling Distribution and Standard Error of the Mean -Hypothesis Testing: Z-Test, Procedure, Decision Rule, Interpretations - One-tailed and Two-tailed Tests- T-Test: One Sample, Two Independent Samples, Two Related Samples - F-Test and ANOVA: One-way and Two-way - Introduction to Chi-square Tests.		
UNIT-V	MACHINE LEARNING BASICS	9
Introduction to Machine Learning- supervised, unsupervised, and semi-supervised learning- Model Evaluation and Validation- Overfitting, Underfitting, Bias-Variance Tradeoff- Linear regression, Logistic regression for classification tasks, Time Series Analysis- Techniques for analyzing time series data.		
<b>Total Contact Hours</b>		<b>45</b>

<b>List of Experiments</b>	
1. Do a data exploratory analysis to develop deep insights from a dataset.	
2. A python program to perform pre-processing on tabular and text data.	
3. A python program to perform augmentation on Image data.	
4. A python program to compute outlier in a given data set.	
5. A python program to handle Missing and inappropriate data in a given data set.	
6. A python program to perform EDA-Quantitative and Qualitative analysis.	
7. A python program to perform Random Sampling and Sampling Distribution.	
8. A python program to perform Z test, T test and Annova Test.	
9. Time Series Analysis - sentimental Analysis.	
10. A python program to analyse Linear & logistic Regression.	
11. A python program to do classification using Support Vector Machines.	
12. A python program to analyse KNN and K-means clustering.	
<b>Contact Hours:</b>	<b>30</b>
<b>Total Contact Hours:</b>	<b>75</b>

<b>Course Outcomes: On completion of course, students will be able to</b>	
●	Explore the fundamental concepts of data science
●	Explain how data is collected, managed and processed for data science
●	Understand the fundamentals of exploratory data analysis.
●	Perform Statistical Inference and Analyze Variance in Data
●	Understand various machine learning algorithms used in data science process.

**Suggested Activities:**

- Assignment problems, Quiz.
- Class presentation/Discussion

**Textbooks:**

## Semester – IV

Course Code	Subject Name (Lab Oriented Theory course)	Category	L	T	P	C
MA23435	PROBABILITY, STATISTICS AND SIMULATION	BS	3	0	2	4
<b>Common to IV Sem. B.E. – Computer Science and Engineering &amp; Computer Science and Engineering (Cyber Security) and B.Tech. – Information Technology</b>						

### Objectives:

- To introduce the basic concepts of probability, one dimensional random variable.
- To solve the problems those are faced in testing of a hypothesis with reference to the errors in decision making.
- To construct and analyse models using Markov Chains.
- To acquire skills in analysing queuing models.
- To set up appropriate simulation models together with their parameterization and the analysis of simulator output data.

<b>UNIT-I</b>	<b>PROBABILITY</b>	<b>9</b>
One dimensional Discrete and continuous random variables – Moments – Moment generating functions – Binomial, Poisson, Uniform and Normal distributions, Two dimensional Discrete and continuous random variables – Conditional and Marginal densities.		
<b>UNIT-II</b>	<b>STATISTICAL TESTING</b>	<b>9</b>
Maximal Likelihood estimation – Parameters of Binomial and Poisson distribution - Tests of significance – Z test: Single mean, difference of means- Chi square - F test.		
<b>UNIT-III</b>	<b>MARKOV MODELS</b>	<b>9</b>
Introduction to Discrete stochastic process - Definition and examples - Markov Process – Discrete Parameter Markov chain – Chapman Kolmogorov theorem (without proof) -State transitions- state probabilities - properties – steady state analysis – absorbing chains – Case study: Markov Analysis of Dynamic memory allocations, Markov models for Manufacturing production capability.		
<b>UNIT-IV</b>	<b>QUEUING THEORY</b>	<b>9</b>
Markovian queues – Birth and Death processes – Queueing Models - (M/M/1):(GD/∞/∞), (M/M/1):(GD/K/∞), (M/M/C):(GD/∞/∞), (M/M/C):(GD/K/∞), (M/G/1):(GD/∞/∞).		
<b>UNIT-V</b>	<b>SIMULATION</b>	<b>9</b>
Simulation: simulation concepts, simulation of a queuing system using event list - Pseudo random numbers - Multiplication Congruential Algorithm - Inverse transformation method - Basic ideas of Monte-Carlo simulation.		
<b>Total Contact Hours: 45</b>		

S.No	List of Experiment (using R Software)	Total Contact Hours: 30
1	Basic Functions in R and plotting	
2	Mathematical functions in R – Integration	
3	Control flow – Loops in R	
4	Probability Distributions using R- PDF, CDF for Binomial, Poisson, Exponential, Uniform and Normal Distributions.	
5	Testing of Hypothesis – Z and t testing	
6	Testing of Hypothesis – F and chi square testing	
7	Markov chains analysis – using ‘markovchain’ package in R	
8	Queueing model analysis – using ‘queuing’ package in R	
9	Monte Carlo simulation –predicting stock prices using package ‘MonteCarlo’ in R	
10	Reading, Writing data in R and working with inbuilt data sets in R	

<b>Course Outcomes: On completion of the course, the students will be able to</b>	
●	Apply the basic concepts of probability, one dimensional random variables in engineering and technology problems.
●	Use different testing tools like t-test, F-test, chi-square test to analyse the relevant problems in engineering and technology.
●	Construct and analyse models using Markov Chains.
●	Characterize features of a queuing system and analyse different queuing models.
●	Practice critical work skills in a controlled environment.

<b>SUGGESTED ACTIVITIES</b>	
●	Problem solving sessions
●	Smart Class room sessions

<b>SUGGESTED EVALUATION METHODS</b>	
●	Assignment problems
●	Quizzes
●	Class Presentation
●	Discussion

Subject Code	Subject Name (Lab Oriented Theory course)	Category	L	T	P	C
CS23431	OPERATING SYSTEMS	PC	3	0	4	5
<b>For B.E. Programme CSE, CSECS, CSD and B.Tech. Programme in IT, AIML &amp; AIDS</b>						

<b>Objectives:</b>
• To study the basic concepts and functions of operating systems.
• To learn about Processes, Threads, Scheduling algorithms
• To understand the process of synchronization and deadlock issues
• To learn and understand the Memory management systems.
• To learn I/O Management and File Systems.

<b>UNIT I</b>	<b>OPERATING SYSTEMS OVERVIEW</b>	<b>9</b>
Introduction – Computer System Organization – Computer System Architecture – Operations – Resource Management – Security and Protection – Virtualization – Computing Environments. Operating Systems Structures: Services – User and OS Interface – System Calls – Linkers and Loaders – Operating system Structure – Building and Booting OS.		
<b>UNIT II</b>	<b>PROCESS MANAGEMENT</b>	<b>9</b>
Process Concepts– Process Scheduling - Operations – Inter process Communication- Shared Memory and Message Passing Systems Threads: Overview- multithreading models-issues. CPU Scheduling: – FCFS – SJF – Priority – RR – Multilevel Queue Scheduling - Multilevel Feedback Queue.		
<b>UNIT-III</b>	<b>PROCESS SYNCHRONIZATION AND DEADLOCKS</b>	<b>9</b>
Process Synchronization – Critical Section Problem – Peterson’s Solution – Hardware Synchronization – Semaphores- Monitors - Classic Problems of Synchronization, Deadlocks: Characterization-Prevention – Avoidance – Detection – Recovery.		
<b>UNIT IV</b>	<b>MEMORY MANAGEMENT</b>	<b>9</b>
Main Memory: Background - Contiguous Memory Allocation – Paging - Structure of a page table – Segmentation - Virtual Memory – Demand Paging - Page Replacement-FIFO-LRU-Optimal - Allocation of Frames – Thrashing - Mass Storage Management-Disk scheduling.		
<b>UNIT-V</b>	<b>FILE MANAGEMENT</b>	<b>9</b>
File System -Concepts - Access Methods- Directory Structure - Protection - Discretionary Access control and Mandatory Access Control - File System structure– Directory Implementation – Allocation Methods – Free-Space Management-Virtual File System. Case studies: Linux		
<b>Total Contact Hours</b>		<b>: 45</b>

<b>List of Experiments</b>		
1	Basic Unix/Linux commands	
2	Study of Unix editors: sed,vi,emacs	
3	Text processing using Awk script	
4	System calls –fork(), exec(), getpid(),opendir(), readdir()	
5	Scheduling algorithms – FCFS, SJF, Priority and RR	
6	Inter-process Communication using Shared Memory	
7	Producer Consumer Problem Solution using Semaphore	
8	Bankers Deadlock Avoidance algorithm	
9	Contiguous Memory Allocation - First Fit and Best Fit	
10	Page Replacement Algorithms - FIFO & LRU	
11	File Organization Technique- single- and Two-level directory	
12	Installation and Configuration of Linux in a Virtual Machine	
13	Schedule Cron Tasks – scripts to run on boot, backup and shutdown at a particular time	
14	Building a Simple Loadable Kernel Module for basic operations	
15	Building Linux RPM package from source	
<b>Contact Hours</b>		<b>60</b>
<b>Total Contact Hours</b>		<b>105</b>

<b>Course Outcomes: On completion of course, students will be able to</b>
● Interpret the evaluation OS functionality, structure and layers.
● Analyze the various Scheduling algorithms and design a model scheduling algorithm.
● Apply and analyze Intercrosses communications, synchronization and Deadlock
● Compare and contrast various memory management schemes.
● Mount file systems and evaluate various disk scheduling techniques.

<b>Suggested Activities:</b>
● Compare the DOS and Linux Commands
● Design and Analysis of various CPU scheduling algorithm
● Implement an algorithm for synchronization
● Analysis various page replacement algorithms
● Study the various management algorithms used in Windows, Linux am Android OS

CS23432	SOFTWARE CONSTRUCTION	PC	3	0	2	4
<b>For B.E. Programme CSE, CSECS, CSD and B.Tech. Programme in IT, AIML &amp; AIDS</b>						

<b>Objectives:</b>
<ul style="list-style-type: none"> <li>Students can gain a comprehensive understanding of Azure's infrastructure, including virtual machines, networking, storage, and security services, to effectively deploy and manage software applications.</li> <li>Students can learn cloud-native development practices and principles, leveraging Azure services such as Azure App Service, Azure Functions for building scalable and resilient software solutions.</li> <li>Students can explore CI/CD pipelines using Azure DevOps, GitHub Actions, or Azure Pipelines to automate the build, test, and deployment processes, ensuring rapid and reliable software delivery.</li> <li>Students can develop skills in monitoring and diagnostics using Azure Monitor and Application Insights, enabling proactive identification and resolution of performance issues and errors in software applications.</li> <li>Students can understand security best practices for software construction in Azure, including identity and access management (IAM), data encryption, network security to build secure and compliant software solutions.</li> </ul>

<b>UNIT I</b>	<b>INTRODUCTION TO SOFTWARE ENGINEERING</b>	<b>9</b>
Software Process-Requirements to Maintenance-Perspective and Specialized Process Models-Projects on On-Prem/On Cloud (Azure, AWS, GCP)-Projects on cloud (cloud providers AWS, Azure)-Agile methods with associated metrics-Software metrics -AI and Data Science -Software Security- DevOps /DevSecOps.		
<b>UNIT II</b>	<b>SOFTWARE REQUIREMENTS</b>	<b>9</b>
How to do Requirements in Agile-Understand Themes, Epic, Features, User Stories and Tasks-How to identify Themes, Epics, Features, User Stories-How to document the same in Microsoft Azure Boards-How to use Poker Planning Estimation Technique -Non-Functional Requirements - its purpose, different attributes of the same, and examples - Document the same in Microsoft Azure Boards.		
<b>UNIT-III</b>	<b>SYSTEM MODELING</b>	<b>9</b>
System Modeling-Context Model-Interaction Model-Interaction Model-Structural Model-Behavioral Model-Architectural Patterns-Architectural patterns-continuation-Data Flow Diagrams-ER Diagram-Tools Practice (Azure) - Prototypes / MVP.		
<b>UNIT IV</b>	<b>TESTING</b>	<b>9</b>
Testing Using AZURE-AZURE Test Plan Preparation-Manual and Exploratory Testing-Automated Testing-Traceability-Reporting and Analysis.		
<b>UNIT-V</b>	<b>SOFTWARE CONFIGURATION MANAGEMENT</b>	<b>9</b>
Software Configuration Management-Introduction-Tools for SCM and Version Control-Visual Source Safe (VSS) – Introduction-Advanced Software Engineering Models-Case Study		
<b>Total Contact Hours</b>		<b>: 45</b>

<b>List of Experiments</b>		
1	Develop User Stories for the respective projects that has been assigned (both FR and NFR) in Azure Board	
2	Develop the Business Architecture, Conceptual and Logical Model for the entities defined in the project	
3	Develop the Class Diagram for these defined entities with all attributes and the associated methods	
4	Develop the Sequence diagram for atleast 2 use stories for the respective project	
5	Develop the Architecture diagram (using MVC) for the respective project (picking a template for Azure Architecture Center)	
6	Identify which SOLID design principles would be applicable and write the design document for the same	
7	Develop a view of the github repository in terms of code, design, test plans, test cases etc and showcase the same in Azure Repos	
8	Develop Test Plans, test cases for the user stories	
9	Develop a CI/CD pipeline using Azure DevOps to test the Architecture and Design	
10	Showcase the CI/CD pipeline using Azure DevOps for a single user story	
<b>Contact Hours</b>		<b>: 30</b>
<b>Total Contact Hours</b>		<b>: 75</b>

<b>Course Outcomes: On completion of course, students will be able to</b>	
•	Demonstrate proficiency in leveraging Azure services and tools for software construction, including virtual machines, containers, serverless computing, and databases, enabling them to design and deploy scalable and resilient applications on the Azure platform.
•	Implement end-to-end CI/CD pipelines using Azure DevOps, GitHub Actions, or Azure Pipelines, automating the build, test, and deployment processes for software applications, resulting in increased efficiency and reliability of software delivery.
•	Optimizing software applications for performance and scalability on Azure, employing techniques such as auto-scaling, caching strategies, and performance tuning to ensure optimal performance under varying workloads.
•	Develop skills in monitoring and diagnostics using Azure Monitor and Application Insights, enabling them to proactively monitor the health, performance, and availability of software applications, and diagnose and troubleshoot issues efficiently.
•	Deeply understand security best practices for software construction in Azure, including identity and access management, data encryption, network security, and compliance standards, enabling them to build secure and compliant software solutions. Gain practical experience in designing, developing, and deploying software applications on Azure, preparing them for real-world scenarios and equipping them with the skills needed to succeed in software development roles in industry.

<b>Suggested Activities:</b>	
•	Assignment problems, Quiz.
•	Class presentation/Discussion

<b>Textbooks:</b>

1: Slight (Low)    2: Moderate (Medium)    3: Substantial (High)    No correlation: “-“

Subject Code	Subject Name (Project based learning)	Category	L	T	P	C
GE23627	<b>Design Thinking and Innovation (Type - Project based learning)</b>	EEC	0	0	4	2
<b>For B.E. Programme CSE, CSECS, CSD, CSBS and B.Tech. Programme in IT, AIML &amp; AIDS</b>						

Objectives:
<ul style="list-style-type: none"> <li>To understand the design thinking concepts and deep understanding of user needs and experiences.</li> <li>To find the problem statement and to develop innovative design solutions that address identified user challenges</li> <li>To master the process of prototyping and iterating on designs</li> <li>To conduct thorough market analysis and financial planning</li> <li>To effectively communicate design concepts and findings.</li> </ul>

UNIT I	Introduction to Design Thinking	12
The design thinking concepts - Different design thinking models - Details of Stanford Design thinking process: Empathize, Define, Ideate, Prototype, Test. <b>Activities:</b> <ul style="list-style-type: none"> <li>Case studies of successful domain-based Design Thinking and Innovative projects</li> <li>Group discussions on design thinking</li> </ul>		
UNIT II	Empathize and Define	12
User research methods (interviews, surveys, observation, contextual inquiry) - Persona development- Journey mapping – Brainstorming Defining the design problem statement. <b>Activities:</b> <ul style="list-style-type: none"> <li>Conducting user interviews and surveys</li> <li>Creating user personas and journey maps</li> <li>Identifying key user needs and pain points</li> <li>Analyze the user needs and brainstorming to define problem statement.</li> </ul>		
UNIT-III	Ideate and create	12
Brainstorming techniques (e.g., mind mapping, SCAMPER) - Ideation tools (e.g., design thinking tools, concept sketching) - Concept generation and evaluation (e.g. Brainstorming). <b>Activities:</b> <ul style="list-style-type: none"> <li>Group brainstorming sessions to select the best idea</li> <li>Creating concept sketches and prototypes</li> <li>Evaluating ideas based on user needs and feasibility.</li> </ul>		
UNIT IV	Prototype and Test	12
Low, Medium and high-level fidelity for Prototyping-Usability testing -Iterative design. <b>Activities:</b> <ul style="list-style-type: none"> <li>Building low-fidelity prototypes (e.g., paper prototypes)</li> <li>Conducting usability tests with users</li> <li>Iterating on designs based on feedback.</li> </ul>		
UNIT-V	Market Analysis and Implementation	12
Market research and analysis - Business model development- Financial Planning-Implementation strategies. <b>Activities:</b> <ul style="list-style-type: none"> <li>Conducting market research</li> <li>Developing a business model canvas</li> <li>Creating a financial projection</li> <li>Developing an implementation plan</li> </ul>		
<b>Total Contact Hours</b>		<b>: 60</b>

<b>Course Outcomes: On completion of the course, the students will be able to</b>	
CO1	Construct design challenge and reframe the design challenge into design opportunity.
CO2	Interview the user, and know the feelings of users to foster deep user understanding and be able to uncover the deep user insights and needs.
CO3	Develop ideas and prototypes by brainstorming.
CO4	Organize the user walkthrough experience to test prototype
CO5	Develop smart strategies and implementation plan that will deliver/achieve the idea/solution deduced from earlier phases.

<b>Assessment:</b>	
	<ul style="list-style-type: none"> <li>Encourage students to work on real-world design challenges based on the user needs</li> <li>Group presentations</li> <li>Quizzes and exams</li> <li>Evaluation of Project report and viva and also encourage the students for filing patent/ copyright / presenting in conference / publishing in journal</li> </ul>

<b>Objectives:</b>
<ul style="list-style-type: none"> <li>To help students break out of shyness.</li> </ul>
<ul style="list-style-type: none"> <li>To build confidence</li> </ul>
<ul style="list-style-type: none"> <li>To enhance English communication skills.</li> </ul>
<ul style="list-style-type: none"> <li>To encourage students' creative thinking to help them frame their own opinions.</li> </ul>

### Learning and Teaching Strategy:

The program is completely student centric where the focus is on activities led by students which include role plays, discussions, debates other games as well. These activities would be supplemented by interactive use of technology and brief trainer input.

Week	Activity Name	Description	Objective
1	Introduction	The trainer and the college facilitator talk to the students about the course and in turn the students introduce themselves.	To set expectations about the course and the students are made aware of the rules and regulations involved in this program
2	If I ruled the world	This is a quick and useful game by getting students to form a circle and provide their point of view. Each student then repeats what the other has said and comes up with their own opinion.	The aim of this activity is to for students to get to know each other and also develop their listening skills as well as learning how to agree and disagree politely.
3	Picture Narrating	This activity is based on several sequential pictures. Students are asked to tell the story taking place in the sequential pictures by paying attention to the criteria provided by the teacher as a rubric. Rubrics can include the vocabulary or structures they need to use while narrating.	The aim of this activity is to make the students develop creative way of thinking.
4	Brainstorming	On a given topic, students can produce ideas in a limited time. Depending on the context, either individual or group brainstorming is effective and learners generate ideas quickly and freely. The good characteristics of brainstorming are that the students are not criticized for their ideas so students will be open to sharing new ideas.	The activity aims at making the students speak freely without the fear of being criticized. It also encourages students to come up with their own opinions.
5	Debate	Is competition necessary in regards to the learning process?	The aim of this activity is to develop the students ability to debate and think out of the box
6	Short Talks	Here the students are given topics for which they take one minute to prepare and two minutes to speak. They can write down points but can't read them out they can only use it as a reference.	The activity aims at breaking the students' shyness and encouraging them to standup in front of the class and speak. It also aims at creating awareness that they are restricted for time so they only speak points that are relevant and important.
7	Debate	Will posting students' grades on bulletin boards publicly motivate them to perform better or is it humiliating?	This activity aims at enhancing the students unbiased thought process when it comes to exams and grades as well as develop their skills to debate
8	The Art of diplomacy	The facilitator proceeds to share multiple concepts of conversation and helps the participants to identify the various methods of being diplomatic and how do deal with misinformation.	The aim of the lesson is to provide an opportunity for the participants to learn about body language and choosing the appropriate words for conversation.
9	Debate	Are humans too dependent on computers?	The aim of this activity is to test the students debating skills and thought process with a topic that affects everybody in daily life.

10	Story Completion	The teacher starts to tell a story but after 2 sentences he/she asks students to work in groups to create the rest of the story which includes the plot and the ending.	This activity aims at building their narrating skills as well as their creativity and ability to work in a team.
11	Roleplay debate	Students scrutinize different points of view or perspectives related to an issue. For example, a debate about the question “Should students be required to wear uniforms at school?” might yield a range of opinions. Those might include views expressed by a student (or perhaps two students – one representing each side of the issue), a parent, a school principal, a police officer, a teacher, the owner of a clothing store, and others.	The aim of this activity is to get students to speak based on other people’s perspective instead of their own. The students take the role of various characters and debate accordingly.
12	I Couldn’t Disagree More	This is a game where students practice rebuttal techniques where one student provides a thought or an idea and the other students starts with the phrase I couldn’t disagree more and continues with his opinion	The aim of this activity is to improve general communication skills and confidence.
	Feedback	At the end of the session in the final week (12) the trainer would provide feedback to the students on best practices for future benefits	The aim is to do both give feedback to students as well as obtain feedback on the course from them.

**Course Outcomes: On completion of the course, the students will be able to**

• Be more confident
• Speak in front of a large audience
• Be better creative thinkers
• Be spontaneous.
• Know the importance of communicating in English.

CS23511	Theory of Computation	PC	3	1	0	4
<b>For B.E Programme CSE</b>						

Objectives:
<ul style="list-style-type: none"> <li>To understand basic concepts of formal languages of automata.</li> <li>To build regular expression and language models.</li> <li>To construct context-free grammar and automata</li> <li>To comprehend Turing machines and their capabilities.</li> <li>To evaluate a computing problem's decidability and intractability</li> </ul>

<b>UNIT I</b>	<b>INTRODUCTION TO FINITE AUTOMATA</b>	<b>9+3</b>
Introduction to formal proof - Central Concepts of Finite Automata Theory - Finite Automata - Deterministic Finite Automata - Non-deterministic Finite Automata - Equivalence of NFA and DFA - Equivalence of NDFA's with and without Epsilon moves		
<b>UNIT II</b>	<b>REGULAR EXPRESSION AND LANGUAGES</b>	<b>9+3</b>
Regular expressions - Finite Automata and Regular Expressions - Equivalence of Regular Expressions and Finite Automata -Equivalence and minimization of automata - Regular languages - Proving languages not to be regular languages - Closure properties of regular languages - Case Study: JFLAP Tool.		
<b>UNIT-III</b>	<b>CONTEXT FREE GRAMMAR AND PUSH DOWN AUTOMATA</b>	<b>9+3</b>
Context-free Grammars – Derivations: Leftmost, Rightmost – Ambiguity, Inherent Ambiguity - Parse Trees, Normal Forms: CNF, GNF - Pushdown Automata - PDA String Acceptance by Empty Stack, and Acceptance by Final State - Equivalence of PDAs and Context-free Grammars - Closure Properties of Context-free Languages - Pumping Lemma for Context-free Languages		
<b>UNIT IV</b>	<b>TURING MACHINES</b>	<b>9+3</b>
Definition of Turing Machine - Programming Techniques for Turing Machine Construction - Modifications of the Basic Turing Machine Model - Multi Tape - Non-deterministic Turing Machines - Chomskian hierarchy of languages.		
<b>UNIT-V</b>	<b>RECURSIVELY ENUMERABLE LANGUAGES AND UNSOLVABLE PROBLEMS</b>	<b>9+3</b>
Recursive And Recursively Enumerable Languages -Diagonalization Language -Universal Turing Machine - Code for Turing Machine - Halting problem- Post's Correspondence Problem –The Classes of P and NP – Problems solvable in Polynomial Time with examples		
<b>Total Contact Hours</b>		<b>: 60</b>

Course Outcomes: On completion of course, you will be able to
<ul style="list-style-type: none"> <li>Utilize fundamental principles of finite automata formal languages</li> <li>Create Finite Automata for various Regular Expressions and Languages</li> <li>Construct context free grammar for context free languages.</li> <li>Solve various problems by applying normal form techniques, push down automata and Turing Machines</li> <li>Identify the issues with decidability and undecidability.</li> </ul>

UNIT-I	WEB BASICS, HTML AND CSS	4
Introduction World wide web and its evolution - E-mail, Telnet, FTP, E-commerce, Cloud Computing, Video conferencing - Internet service providers, IP Address, URL, Domain Name Servers - Web Browsers, Search Engine -Web Server vs Application Server, HTML Tags, Structure - Block Elements, Text Elements- Lists, Images, section, article, and aside Elements ,CSS Overview - CSS Rules, CSS Syntax and Style - Class Selectors, ID Selectors, span and div Elements - Cascading, style Attribute, style Container, External CSS Files - CSS Properties: Color Properties, Font Properties, line-height Property, Text Properties, Border Properties. Element Box, padding Property, margin Property - Hosting a Website and GIT		
UNIT-II	Client-Side Programming - Java Script	2
Hello World Web Page - Buttons, Functions, Variables, Identifiers - Assignment Statements and Objects - Document Object Model, Forms: form Element, Controls, Text Control Accessing a Form's Control Values, reset and focus Methods - Event Handler Attributes: onchange, onmouseover, onmouseout. While Loop, External JavaScript Files, do Loop, Radio Buttons, Checkboxes, for Loop - fieldset and legend Elements- Manipulating CSS with JavaScript- Using z-index to Stack Elements-Textarea Controls - Pull-Down Menus- List Boxes- Canvas and Drawing - Event Handler and Listener.		
UNIT-III	Server-Side Programming - PHP	5
Introduction- Working principle of PHP -Variables - Constants - Operators - Flow Control and Looping - Arrays - Strings - Functions - File Handling -PHP and HTML - Simple PHP scripts - Databases with PHP. Bootstrap Background and Features - Getting Started with Bootstrap - Grids - Components - Menus and Navigations - Plugins - Flexbox& Layouts.		
UNIT-IV	REACTJS	2
React Environment Setup - ReactJS Basics - React JSX - React Components: React Component API - React Component Life Cycle - React Constructors - React Dev Tools - React Native vs ReactJS.		
UNIT-V	REACT DATAFLOW	2
React Dataflow: React State - React Props - React Props Validation - Styling React - Hooks and Routing - Deploying React - Case Studies for building dynamic web applications.		
<b>Total Contact Hours:</b>		<b>15</b>

List of Experiments	
1	Explore various terminologies related to Internet (ISP, Email, Telnet, FTP, Web browsers, Search Engines)
2	Experiment the use of basic HTML elements.
3	Demonstrate the applications of Lists, Tables, Images, Section, article and aside elements.
4	Investigate the various components of CSS.
5	Develop web pages using HTML and various elements of CSS.
6	Designing simple dynamic webpages using Javascript.
7	Build web pages using While Loop, External JavaScript Files, do Loop, Radio Buttons, Checkboxes, for Loop - fieldset and legend Elements.
8	Manipulating CSS with JavaScript- Using z-index to Stack Elements-Textarea Controls - Pull-Down Menus- List Boxes- Canvas and Drawing - Event Handler and Listener.
9	React Environment Setup - ReactJS Basics - React JSX - React Components: React Component API.
10	Understand React Component Life Cycle and apply React Constructors - React Dev Tools - React Native vs ReactJS
11	Envisage React Dataflow: React State - React Props - React Props Validation - Styling React - Hooks and Routing
12	Deploying React - Case Studies for building dynamic web applications.
<b>Contact Hours: 90</b>	
<b>Total Contact Hours: 105</b>	

<b>Course Outcomes: At the end of this course students will be able to</b>
• Apply various elements of HTML and CSS.
• Design interactive web pages using JavaScript.
• Create Dynamic Web Applications using ReactJS.
• Deploy and host web applications in Local Servers or Cloud platforms.
• Building React Applications

<b>For B.E. Programme CSE, CSECS, CSD and B.Tech. Programme in IT, AIML &amp; AIDS</b>						

<b>Objectives:</b>
<ul style="list-style-type: none"> <li>Understand the concepts of computer networks and error detection-correction of data.</li> <li>Be exposed to various addressing schemes and routing protocols.</li> <li>Learn the Transport Layer, flow control and congestion control algorithms</li> <li>Be familiar with real time applications of networking devices and tools.</li> <li>To configure different devices and trace the flow of information between nodes in the network using various tools</li> </ul>

<b>UNIT I</b>	<b>FUNDAMENTALS AND DATA LINK LAYER</b>	<b>9</b>
Building a network – Requirements – Layering and protocols – Internet Architecture – Network software – Application Programming Interface (sockets) – Performance – Link layer Services - Framing - Error Detection and Correction – Reliable Transmission		
<b>UNIT II</b>	<b>MEDIA ACCESS AND INTERNETWORKING</b>	<b>9</b>
Media Access Protocols – ALOHA - CSMA/CA/CD –Ethernet – Wireless LANs - 802.11- Bluetooth - Switching and Forwarding - Bridges and LAN Switches – Basic Internetworking- IP Service Model – IP Fragmentation - Global Addresses – ARP– DHCP – ICMP		
<b>UNIT-III</b>	<b>ROUTING</b>	<b>9</b>
Routing – Network as Graph - Distance Vector – Link State – Global Internet –Subnetting - Classless Routing (CIDR) – BGP– IPv6 – Multicast routing - DVMRP- PIM – Case Study-Software Defined Networking (SDN)		
<b>UNIT IV</b>	<b>TRANSPORT LAYER</b>	<b>9</b>
Overview of Transport layer – UDP – TCP - Segment Format - Connection Management – Adaptive Retransmission – TCP Congestion control – Congestion avoidance (DECbit, RED) – QoS – Application requirements.		
<b>UNIT-V</b>	<b>APPLICATION LAYER</b>	<b>9</b>
E-Mail (SMTP, MIME, POP3, IMAP), HTTP – DNS - FTP - Telnet – Web Services – SNMP - MIB – RMON– SIP		
<b>Total Contact Hours</b>		<b>: 45</b>

<b>List of Experiments</b>	
1	Basic Networking Commands in Linux and Windows operating systems
2	Learning and Assignment of IP Address manually to computers
3	Study of different types of Network Cables and Crimping of cable with RJ45 connector
4	Implement packet sniffing using raw sockets in python
5	Develop a customized ping command to test the server connectivity
6	Building anonymous FTP Scanner using ftplib module
7	Develop a simple calculator using XMLRPC
8	Develop a program to create reverse shell using TCP sockets
9	Design a simple topology and configure with one router, two switches and PCs using Cisco Packet Tracer
10	Customize Switch with Network Modules using Cisco Packet Tracer
11	Examine Network Address Translation (NAT) using Cisco Packet Tracer
12	Nmap to discover live hosts using ARP scan, ICMP scan, and TCP/UDP ping scan in TryHackMe Platform.
13	Demonstrate network forensics using PcapXray tool
14	To capture, save, and analyze network traffic on TCP / UDP / IP / HTTP / ARP /DHCP /ICMP /DNS using Wireshark Tool
15	To Analyze the different types of servers using Webalizer tool
<b>Contact Hours: 60</b>	
<b>Total Contact Hours: 105</b>	

<b>Course Outcomes: On completion of course, you will be able to</b>
<ul style="list-style-type: none"> <li>Choose the required functionality at each layer for given application</li> </ul>
<ul style="list-style-type: none"> <li>Trace the flow of information from one node to another node in the network</li> </ul>
<ul style="list-style-type: none"> <li>Apply the knowledge of addressing scheme and various routing protocols in data communication to select optimal path.</li> </ul>
<ul style="list-style-type: none"> <li>Monitor the traffic within the network and analyze the transfer of packets.</li> </ul>
<ul style="list-style-type: none"> <li>Develop real time applications of networks using different tools</li> </ul>

<b>Suggested Activities:</b>
<ul style="list-style-type: none"> <li>Assignment problems based on GATE, Quiz.</li> <li>Class presentation/Discussion</li> </ul>

Subject Code	Subject Name (Lab oriented Theory Courses)	Category	L	T	P	C
CS23533	FOUNDATIONS OF ARTIFICIAL INTELLIGENCE	PC	3	0	2	4
<b>For B.E Programme CSE</b>						

<b>Objectives:</b>						
• Understand the fundamental characteristics of problem-solving agents.						
• Explore various problem-solving strategies and their applications.						
• Develop the ability to solve problems under different constraints.						
• Apply AI techniques to real-world applications such as expert systems.						
• Gain a comprehensive understanding of different learning models in AI.						

<b>UNIT-I</b>	<b>FOUNDATIONS OF ARTIFICIAL INTELLIGENCE AND PROBLEM-SOLVING AGENTS</b>	<b>9</b>
Problems of AI, AI technique, Intelligent Agents, Agents & environment, nature of environment, structure of agents, goal-based agents, utility-based agents, learning agents. Defining the problem as state space search, production system, problem characteristics, Issues in the design of search programs		
<b>UNIT-II</b>	<b>AI SEARCH TECHNIQUES</b>	<b>9</b>
Problem solving agents, searching for solutions; uniform search strategies: breadth first search, depth first search, depth limited search, bidirectional search, comparing uniform search strategies. Heuristic search strategies Greedy best-first search, A* search, AO* search, memory bounded heuristic search: local search algorithms & optimization problems: Hill climbing search, simulated annealing search, local beam search		
<b>UNIT-III</b>	<b>GAME THEORY AND STATISTICAL REASONING</b>	<b>9</b>
Game theory - Adversarial search – optimal decisions in games – alpha-beta search –. Constraint satisfaction problems – constraint propagation – backtracking search for CSP – Statistical Reasoning: Probability and Bays’ Theorem, Certainty Factors and Rule-Based Systems, Bayesian Networks, Dempster-Shafer Theory		
<b>UNIT-IV</b>	<b>KNOWLEDGE REPRESENTATION AND REASONING</b>	<b>9</b>
Propositional Logic: Syntax, semantics, inference rules-Modus Ponens-Resolution- First-Order Logic (FOL): Syntax, semantics, quantifiers, unification. -Predicate Logic: Representing facts and rules, inference in FOL-Semantic Networks: Representing relationships between concepts- inferences in first-order logic – forward chaining – backward chaining - Fuzzy Logic- Natural Language Processing (NLP): Basic concepts, text representation, parsing		
<b>UNIT-V</b>	<b>INTRODUCTION TO MACHINE LEARNING</b>	<b>9</b>
Exploring sub-discipline of AI: Machine Learning, Supervised learning, unsupervised learning, Reinforcement learning: Active and Passive Learning, Classification problems, Regression problems, clustering problems, Introduction to neural networks and deep learning		
<b>Contact Hours</b>		<b>: 45</b>

<b>List of Experiments</b>			
<b>1</b>	Programs on Problem Solving		
	a. Write a program to solve N Queens problem.		
	b. Solve any problem using uninformed search		
	c. Solve the water jug/8 puzzle problem with depth first search		
	d. Implement MINIMAX algorithm		
	e. Implement A* algorithm		
<b>2</b>	Programs on Decision Making and Knowledge Representation		
	a. Introduction to PROLOG		
	b. Implementation of Unification and Resolution Algorithm		
	c. Implementation of Backward Chaining and Forward Chaining		
<b>3</b>	Programs on Planning and Learning.		
	Implementing Artificial Neural Networks for an application using Python.		
	Implementation of Decision Tree.		
	Implementation of K-mean algorithm		
<b>Contact Hours</b>		<b>:</b>	<b>30</b>
<b>Total Contact Hours</b>		<b>:</b>	<b>75</b>

**Lab Specifications:**

- The lab can be implemented using Python or C.
- Knowledge representation experiments can be performed using a PROLOG TOOL.

**Course Outcomes: On completion of the course, the students will be able to**

- Understand fundamental concepts of knowledge representation, problem-solving, and learning methods in AI.
- Identify and apply the appropriate agent strategy to solve a given problem
- Represent problems using First-Order Logic and Predicate Logic
- Develop AI applications such as expert systems and chatbots
- Recommend suitable learning algorithms (supervised, unsupervised, or semi-supervised) based on problem requirements

Subject Code	Subject Name (Employability Enhancement Courses)	Category	L	T	P	C
GE23521	Soft Skills - II	PC	0	0	2	1
<b>For B.E. Programme CSE, CSBS, CSD and B.Tech. Programme in IT, AIML &amp; AIDS</b>						

<b>Objectives:</b>
<ul style="list-style-type: none"> <li>To help students break out of shyness.</li> <li>To build confidence</li> <li>To enhance English communication skills.</li> <li>To encourage students' creative thinking to help them frame their own opinions.</li> </ul>

### Learning and Teaching Strategy:

The program is completely student centric where the focus is on activities led by students which include role plays, discussions, debates other games as well. These activities would be supplemented by interactive use of technology and brief trainer input.

Week	Activity Name	Description	Objective
1	The News hour	Students are made to read news articles from the English newspapers. The students also have to find words and their meaning from the article they have not come across before and share it with the group. They then use these words in sentences of their own	The aim of this activity is not only to get the students to read the newspaper but also aims at enhancing the students' vocabulary.
2	Court Case	The facilitator provides the participants the premise of a story and proceeds to convert the story into a court case. The students are required, department-wise to debate and provide their points to win the case for their clients.	The aim of the lesson is to encourage creative and out-of-the -box thinking to ensure a good debate and defense skills.
3	The ultimate weekend	The students design activities they are going to do over the weekend and they have to invite their classmates to join in the activity. The students move around the class and talk to other students and invite them.	The aim of this activity is to develop the art of conversation among students. It also aims at practicing the grammatical structures of "going to" "have to" and asking questions.
4	The Four Corners	This is a debate game that uses four corners of the classroom to get students moving. The following is written on the 4 corners of the room "Strongly Agree, Somewhat Agree, Somewhat Disagree and Strongly Disagree". The topics are then given to the class and students move to the corner that they feel best explains their opinions	This activity aims at getting students to come up with their own opinions and stand by it instead of being overshadowed by others and forcing themselves to change based on others' opinions.
5	Debate	Boarding school or day school? Which is more beneficial for a student?	The aim of this activity is to encourage students to draw up feasible points on the advantages and benefits of both. And enhance their debating ability
6	Grand Master	The facilitator starts the session by keeping an individual in mind, upon which the students guess it only through "Yes or No" questions. Post few trials the students are given same opportunity to do the same with the crowd.	The aim of the lesson is designed to teach the art of questioning. It also helps to enhance the students' speaking and listening skills.
7	Debate	Does violence on the TV and Video games influence children negatively?	This activity aims at encouraging the students to debate on real life scenarios that most students spend a lot of time on.
8	Turn Tables	This is a speaking activity where the students need to speak for and against the given topics when the facilitator shouts out 'Turn Table'.	The aim of this activity is to make the participants become spontaneous and have good presence of mind.

9	Debate	Do marks define the capabilities of a student?	This debate activity aims at allowing the students to argue on this worrisome adage of marks.
10	FictionAD	The Participants are asked to create an Ad for a challenging topic only using fictional characters.	The activity aims at developing their creativity and presentation skills.
11	Debate	Are social networking sites effective, or are they just a sophisticated means for stalking people?	This activity aims at refining the students debating skills on a very real life situation
12	Talent Hunt	Talent Hunt is a fun activity where the students are selected at random and supported to present any of their own skills.	The aim of this activity is designed to evoke their inner talents and break the shyness and the fear of participating in front of a crowd
	Feedback	At the end of the session in the final week (12) the trainer would provide feedback to the students on best practices for future benefits.	The aim is to do both give feedback to students as well as obtain feedback on the course from them.

<b>Course Outcomes: On completion of course, you will be able to</b>
• Be more confident
• Speak in front of a large audience without hesitation
• Think creatively
• Speak impromptu
• Communicate in English

Subject Code	Subject Name (Lab Oriented Theory Course)	Category	L	T	P	C
CS23634	Fundamentals of GenAI and Prompt Engineering	PC	2	0	2	3
<b>For B.E Programme CSE</b>						

Objectives:
<ul style="list-style-type: none"> <li>Gain a solid understanding of Generative AI, its applications, and ethical considerations.</li> </ul>
<ul style="list-style-type: none"> <li>Learn the foundations of NLP and how transformer models work</li> </ul>
<ul style="list-style-type: none"> <li>Develop the skills to design, refine and optimize prompts for various tasks</li> </ul>
<ul style="list-style-type: none"> <li>Create practical AI powered tools like chatbots and content generators</li> </ul>
<ul style="list-style-type: none"> <li>Analyze and mitigate ethical and technical challenges in Generate AI</li> </ul>

UNIT-I	INTRODUCTION TO GENERATIVE AI	6
What is Generative AI – Definition and key concepts, difference between Gen and Discriminative AI, Popular models (GPT, DALL-E etc), Applications of Gen AI – Text, Image, Code Generation, Audio/Video synthesis. Ethics and Challenges of Gen AI – Bias in AI models, Misinformation and deepfakes and Intellectual Property and Copyright issues		
UNIT-II	FOUNDATIONS OF NATURAL LANGUAGE PROCESSING (NLP)	6
What is NLP, Key NLP tasks (text classification, sentiment analysis, summarization), Tokenization and Text Representation – Word embeddings, Transformers and attention mechanisms. Introduction to Transformer Models – Architecture of Transformers, Overview of BERT, GPT and other transformer-based models		
UNIT-III	PROMPT ENGINEERING BASICS	6
Prompt Engineering – Definition and Importance, Role of prompts in guiding AI behaviour. Types of Prompts – Zero-shot, few-shot and chain of thought programming, Instruction-based prompts Vs open-ended prompts. Best practices of Prompt Design – clarity, specificity and context, iterative refinements of prompts, Handling ambiguous or complex queries		
UNIT-IV	ADVANCED PROMPT ENGINEERING TECHNIQUES	6
Prompt Engineering for Specific Domains. Customizing prompts for technical, creative or business use cases, Domain-specific fine tuning. Handling Edge Cases – Dealing with ambiguous or incomplete inputs, Avoiding biased or harmful output. Prompt Chaining and Multi Step Reasoning – Breaking down complex tasks into smaller prompts, Using chain of thought prompt for logical reasoning		
UNIT-V	BUILDING REAL WORLD APPLICATIONS WITH GENERATIVE AI	6
Integrating Gen AI into workflows – API's for Gen AI models (OpenAI API, Hugging Face), Automating tasks using AI. Building Custom Apps – Chatbots and Virtual Assistants, Content generation tools (blog writing, marketing copy), Code generation and debugging tools. Evaluating and Optimizing AI outputs – Metrics for evaluating AI performance, Iterative improvement of prompts and models		
<b>Contact Hours:</b>		<b>30</b>

List of Experiments	
<b>1</b>	<b>Generative AI</b>
a	Explore Pre-Trained Gen AI Tools <ul style="list-style-type: none"> <li>Use ChatGPT to generate text and DALL-E to create images</li> <li>Analyze the outputs and discuss their quality and limitations</li> </ul> Ethical Implications Exercise <ul style="list-style-type: none"> <li>Identify potential ethical issues in AI-generated content</li> <li>Write a short report on how to mitigate these issues</li> </ul>
<b>2</b>	<b>Foundations of NLP</b>
a	Text processing with Python <ul style="list-style-type: none"> <li>Use libraries like spaCy or NLTK to tokenize and preprocess text data</li> </ul> Fine Tune a Pre-Trained Model <ul style="list-style-type: none"> <li>Use Hugging Face to fine-tune a transformer model to simple NLP task(eg sentimental analysis)</li> </ul>

<b>3</b>	<b>Prompt Engineering Basics</b>
a	Experiment with Different Prompts – Use ChatGPT to test zero-shot, few-shot and chain-of-thought prompts – Compare outputs and analyze their effectiveness Design Prompts for Specific Tasks – Create prompts for tasks like summarization, code generation and creating writing
<b>4</b>	<b>Advanced Prompt Engineering Techniques</b>
a	Multi-Step Prompt workflow – Design a workflow for a complex task (eg. Writing a research paper or debugging code) Evaluate and Refine Prompts – Test prompts on ChatGPT and refine them based on the outputs
<b>5</b>	<b>Building Real-World applications with Gen AI</b>
a	Build a Chatbot – Use Open API or Hugging Face to create a simple chatbot Develop a Content Generation Tool – Build a tool that generates social media posts or blog articles
	<b>Contact Hours: 30</b>
	<b>Total Contact Hours: 60</b>

<b>Course Outcomes: On completion of the course, the students will be able to</b>	
●	<b>Understand Generative AI Fundamentals:</b> Gain a solid understanding of Generative AI, its applications, and ethical considerations.
●	<b>Master NLP Basics:</b> Learn the foundations of NLP and how transformer models work.
●	<b>Become Proficient in Prompt Engineering:</b> Develop the skills to design, refine, and optimize prompts for various tasks.
●	<b>Build Real-World Applications:</b> Create practical AI-powered tools like chatbots and content generators.
●	<b>Develop Critical Thinking:</b> Analyze and mitigate ethical and technical challenges in Generative AI.

3: Substantial (High)

No correlation: "-"

Course Code	Subject Name (Lab Oriented Theory course)	Category	L	T	P	C
CS23631	Compiler Design	PC	3	0	2	4
<b>For B.E Programme CSE</b>						

Objectives:
• To provide fundamental knowledge of various language translators
• To make students familiar with lexical analysis and parsing techniques.
• To understand the various actions carried out in semantic analysis
• To make the students get familiar with how the intermediate code is generated.
• To understand the principles of code optimization techniques.

<b>UNIT I</b>	<b>INTRODUCTION TO COMPILATION AND LEXICAL ANALYSIS</b>	<b>9</b>
Introduction to programming language translators-Structure and Phases of a Compiler-Design Issues-Patterns-Lexemes-Tokens-Attributes-Specification of Tokens-Regular Expression- Regular expression to Deterministic Finite Automata - Lex		
<b>UNIT II</b>	<b>SYNTAX ANALYSIS</b>	<b>9</b>
Role of Parser- Parse Tree - Elimination of Ambiguity - Top Down Parsing - Recursive Descent Parsing - Predictive Parsing - LL(1) Grammars.		
<b>UNIT-III</b>	<b>SEMANTICS ANALYSIS</b>	<b>9</b>
Bottom Up Parsing-Shift Reduce Parsers- Operator Precedence Parsing -LR Parsers,Construction of SLR Parser Tables and Parsing, CLR Parsing, LALR Parsing - SEMANTICS ANALYSIS : Syntax Directed Definition – Evaluation Order - Applications of Syntax Directed Translation - Syntax Directed Translation Schemes - Implementation of L attributed Syntax Directed Definition.		
<b>UNIT IV</b>	<b>INTERMEDIATE CODE GENERATION</b>	<b>9</b>
Variants of Syntax trees - Three Address Code- Types – Declarations - Procedures - Assignment Statements - Translation of Expressions - Control Flow - Back Patching- Switch Case Statements.		
<b>UNIT-V</b>	<b>CODE OPTIMIZATION</b>	<b>9</b>
Loop optimizations- Principal Sources of Optimization -Introduction to Data Flow Analysis - Basic Blocks - Optimization of Basic Blocks - Peephole Optimization- The DAG Representation of Basic Blocks - CODE GENERATION: Issues in the design of a code generator- Target Machine- Next-Use Information - Register Allocation and Assignment, Runtime Organization, Activation Records.		
<b>Total Contact Hours</b>		<b>: 45</b>

Course Outcomes: On completion of course you will be able to
• Demonstrate the functioning of a Compiler and to develop a firm and enlightened grasp of concepts such as higher level programming, assemblers, automata theory, and formal languages, language specifications.
• Develop language specifications using context free grammars (CFG).
• Apply the ideas, the techniques, and the knowledge acquired for the purpose of developing software systems.
• Constructing symbol tables and generating intermediate code. 5. Obtain insights on compiler optimization and code generation.
• Obtain insights on compiler optimization and code generation.

Text Book(s):

3	Torbengidius Mogensen, Basics of Compiler Design, Springer, 2011
4	Charles N, Ron K Cytron, Richard J LeBlanc Jr., Crafting a Compiler, Pearson Education, 2010.

List of Experiments	
1	Write a LEX program to recognize valid arithmetic expressions. Identifiers in the expression could be only integers and operators could be + and *. Count the identifiers & operators present and print them separately.
2	Write a LEX program to eliminate comment lines in a C program and copy the resulting program into a separate file
3	Write a YACC program to recognize all strings for which starts with n number of "a" followed by n number of "b".
4	Write a YACC program to recognize valid identifiers, operators and keywords in the given text (C program) file.
5	Implementation of calculator using lex and yacc.
6	Convert the bnf rules into yacc form and write code to generate abstract syntax trees.
7	Write a scheme expression that evaluates the polynomial. Write $5*(4.5 - 8.5) + 77$ as a scheme expression, and find its value. Define a function middle that takes five numbers as argument and returns the middle of the five.
8	Intro to Flex and Bison: Modify the scanner and parser so that terminating a statement with ";" instead of ";" results in the output being printed in binary.
9	Write a recursive descent parser for the CFG language and implement it using LLVM
10	Write a LR parser for the CFG language and implement it in the using LLVM
<b>Contact Hours : 30</b>	
<b>Total Contact Hours : 75</b>

CS23632	Cryptography and Network Security	PC	2	0	2	3
<b>For B.E. Programme CSE, CSD and B.Tech. Programme IT</b>						

Objectives:
<ul style="list-style-type: none"> <li>Learn basics of encryption and Number Theory.</li> </ul>
<ul style="list-style-type: none"> <li>Understand the methods of public key encryption.</li> </ul>
<ul style="list-style-type: none"> <li>Acquire knowledge of hash functions and digital signatures.</li> </ul>
<ul style="list-style-type: none"> <li>Apply techniques of system level securities.</li> </ul>
<ul style="list-style-type: none"> <li>Know the current trends in e-mail, IP and web security</li> </ul>

UNIT I	INTRODUCTION AND NUMBER THEORY	6
OSI security architecture-Network security model-Classical Encryption techniques (Symmetric cipher model, Substitution techniques, Transposition techniques, Steganography)-Number Theory: Modular arithmetic- Euclid's algorithm-Fermat's and Euler's theorem -The Chinese Remainder theorem		
UNIT II	BLOCK CIPHERS AND PUBLIC KEY CRYPTOGRAPHY	6
Data Encryption Standard (DES) – Advanced Encryption Standard (AES) – Triple DES – Public key cryptography- Principles of public key cryptosystems-The RSA algorithm-Key management-Attacks on RSA – Diffie Hellman Key exchange – Elliptic curve arithmetic-Elliptic Curve Cryptography (ECC)		
UNIT-III	HASH FUNCTIONS AND DIGITAL SIGNATURES	6
Authentication requirement – MAC – Hash function – MD5 - SHA - HMAC - Merkle Hash Tree--Digital signature and authentication protocols - DSS – Zero Knowledge Proofs (ZKP) and its Use Cases		
UNIT IV	SECURITY PRACTICE AND SYSTEM SECURITY	6
Kerberos – Firewall types and design - Intrusion detection system – Malicious software – Antivirus – Case Study - WannaCry Ransomware – Kaspersky Antivirus Scan Engine – Federated Identity Management		
UNIT-V	E-MAIL, IP AND WEB SECURITY	6
E-mail Security – Pretty Good Privacy-S/MIME – IPSecurity- Overview of IPSec - IP and IPv6-Authentication Header - Encapsulation Security Payload (ESP) – Web Security - SSL/TLS Basic Protocol-computing the keys- client authentication – Case Study - Unified Payment Interface (UPI)		
		<b>Contact Hours: 30</b>

List of Experiments	
1	Installation and Configuration of Kali Linux/Parrot OS in a VMware/VirtualBox.
2	Encryption Crypto 101 in TryHackMe Platform
3	Perform Man-in-the-middle (MITM) attacks using the Ettercap tool.
4	Demonstrate hash cracking using John the Ripper tool.
5	Perform various configurations of Iptables Firewall in Linux.
6	Snort IDS/IPS to detect and prevent real time threats in TryHackMe Platform.
7	Perform Code Injection on Application Process using Ptrace.
8	Privilege Escalation in TryHackMe Platform
9	Demonstrate various exploits of Window OS using Metasploit Framework
10	Perform Wireless Audit on routers and decrypt the WPA keys using Aircrack-ng
<b>Contact Hours: 30</b>

Subject Code	Subject Name (Lab Oriented Theory Course)	Category	L	T	P	C
CS23633	CLOUD COMPUTING	PC	2	0	2	3
<b>For B.E Programme CSE</b>						

Objectives:
<ul style="list-style-type: none"> <li>To learn the fundamentals of Cloud Computing and designing Private Cloud and Public Cloud Environment.</li> </ul>
<ul style="list-style-type: none"> <li>Understand Virtual Machines and workload, Cloud Infrastructure</li> </ul>
<ul style="list-style-type: none"> <li>To learn the cloud management and cloud native.</li> </ul>
<ul style="list-style-type: none"> <li>To gain knowledge on various cloud computing architecture</li> </ul>
<ul style="list-style-type: none"> <li>To learn the cloud security</li> </ul>

<b>UNIT-I</b>	<b>INTRODUCTION</b>	<b>6</b>
Basic concepts and terminology-roles and boundaries-cloud characteristics-cloud delivery model and deployment Model (Public, Private and Hybrid models). Understand Cloud computing models IaaS, SaaS and PaaS and its differences and when to use what model		
<b>UNIT-II</b>	<b>VIRTUAL MACHINES AND WORKLOADS, UNDERSTAND CLOUD INFRASTRUCTURE</b>	<b>6</b>
Virtual Private Server (VPS), difference between dedicated and VPS server. Cloud Migration: Backup, Restore of the same and its associated costing. Cloud Infrastructure Resources: File, Block, Object Storage and CDN (Content Delivery Networks)		
<b>UNIT-III</b>	<b>CLOUD MANAGEMENT AND CLOUD NATIVE</b>	<b>6</b>
Understand how to maintain control and oversight of cloud computing infrastructure, resources, and services in public, private, or hybrid cloud environments – Interoperability, Cloud Sprawl, Automation, Cloud Governance, Monitoring and Logging, Performance and Cost Reporting		
<b>UNIT-IV</b>	<b>CLOUD COMPUTING ARCHITECTURE</b>	<b>6</b>
Understand the services like storage, databases, software, analytics, and other platforms that are accessible via the internet. Understand how to build, design, and manage applications on the cloud platform.		
<b>UNIT-V</b>	<b>CLOUD SECURITY</b>	<b>6</b>
AWS and the shared responsibility model, Azure and the shared responsibility model, GCP and the shared responsibility model. Command-Line tools: AWS CLI, Azure CLI, Google Cloud SDK.		
<b>Contact Hours:</b>		<b>30</b>

<b>List of Experiments</b>	
<b>1</b>	<b>Private Cloud</b>
a	Setup a Private Cloud by performing the procedure using a Single node OPENSTACK implementation.
<b>2</b>	<b>Public Cloud</b>
a	Develop a simple application to understand the concept of PAAS using GAE/Amazon Elastic Beanstalk/IBM Blue Mix/GCC and launch it.
<b>3</b>	<b>Hybrid Cloud</b>
a	Setting Up Hybrid Connectivity Experiment with setting up a secure VPN connection between an on-premises data center and a public cloud provider such as AWS or Azure. Configure a hybrid network topology using virtual private clouds (VPCs), subnets, and route tables.
<b>4</b>	<b>Basic VPS Server Setup</b>
a	Provision a VPS instance from a cloud provider or set up a virtual machine on your local system using software like VirtualBox or VMware. Install a Linux distribution such as Ubuntu, CentOS, or Debian as the operating system. Configure network settings, including IP address, subnet mask, gateway, and DNS.
<b>5</b>	<b>Cloud Migration-Backup Setup:</b>

a	Choose a cloud storage service provider such as Amazon S3, Google Cloud Storage, or Azure Blob Storage for storing backups. Set up a backup schedule to regularly back up critical data and configurations from your on-premises or existing cloud environment. Utilize backup tools or scripts to automate the backup process and ensure consistency.
6	<b>CDN Service Selection, CDN Configuration</b> Research and select a CDN provider such as Cloudflare, Akamai, or Amazon CloudFront. Sign up for a CDN account or utilize free trial options if available. Configure your CDN account settings, including domain setup and DNS configuration. Create CDN distributions or zones to specify which content will be cached and delivered through the CDN network.
	<b>Contact Hours: 30</b>
	<b>Total Contact Hours: 60</b>

<b>Course Outcomes: On completion of the course, the students will be able to</b>	
•	Demonstrate the cloud, its characteristics, various delivery and deployment models and designing Private Cloud and Public Cloud Environment.
•	The strength of virtualization, workload its role in enabling the cloud cloud infrastructure
•	Recognize the scope cloud management and cloud native
•	The fundamental cloud components mechanism with cloud computing architecture
•	Analyse the core issue of cloud such as security. Provide an insight into future prospects of computing in the cloud.

Subject Code	Subject Name (Lab oriented Theory Courses)	Category	L	T	P	C
AI23331	FUNDAMENTALS OF MACHINE LEARNING	PC	3	0	2	4
<b>For B.E. Programme CSE, CSECS, CSD and B.Tech. Programme in IT, AIML, AIDS</b>						

<b>Objectives:</b>	
•	To know the fundamentals of machine learning.
•	Be exposed to linear models.
•	Be familiar with basic machine learning algorithms with classification.
•	To understand machine learning algorithms with clustering.
•	To learn and apply reinforcement learning techniques.

<b>UNIT-I</b>	<b>FOUNDATIONS OF LEARNING</b>	<b>8</b>		
Components of learning – learning models – geometric models – probabilistic models – logical models – grouping and grading – learning versus design – types of learning – supervised – unsupervised – reinforcement – theory of learning – feasibility of learning – error and noise – training versus testing – theory of generalization – generalization bound – approximation generalization trade off – bias and variance – learning curve.				
<b>UNIT-II</b>	<b>LINEAR MODELS</b>	<b>9</b>		
Linear classification – univariate linear regression - bivariate regression – multivariate linear regression – regularized regression – Logistic regression. Naïve Baye’s – Discriminant Functions -Probabilistic Generative Models -Probabilistic Discriminative Models – Bayesian Logistic Regression.				
<b>UNIT-III</b>	<b>SUPERVISED LEARNING</b>	<b>10</b>		
Perceptron: – multilayer neural networks – back propagation - learning neural networks structures – support vector machines: – soft margin SVM – going beyond linearity – generalization and over fitting – regularization – validation. Decision trees: Training and Visualizing a Decision Tree - Making Predictions - Estimating Class Probabilities - The CART Training Algorithm - Computational Complexity - Gini Impurity or Entropy - Ensemble methods: Bagging- Boosting- Boosting AdaBoost - Gradient Boosting – Xg boost.				
<b>UNIT-IV</b>	<b>UNSUPERVISED LEARNING</b>	<b>10</b>		
<b>Clustering:</b> Nearest neighbor models – K-means – clustering around medoids – silhouettes – hierarchical clustering – k-d trees. <b>Dimensionality Reduction:</b> – Linear Discriminant Analysis – Principal Component Analysis – Factor Analysis – Independent Component Analysis.				
<b>UNIT-V</b>	<b>REINFORCEMENT LEARNING</b>	<b>8</b>		
Passive reinforcement learning – direct utility estimation – adaptive dynamic programming – temporal-difference learning – active reinforcement learning – exploration – learning an action utility function – Generalization in reinforcement learning – policy search – applications in game playing – applications in robot control.				
		<b>Contact Hours</b>	<b>:</b>	<b>45</b>

<b>List of Experiments</b>				
<b>1</b>	A python program to implement univariate regression, bivariate regression and multivariate regression.			
<b>2</b>	A python program to implement Simple linear regression using Least Square Method			
<b>3</b>	A python program to implement logistic model.			
<b>4</b>	A python program to implement single layer perceptron.			
<b>5</b>	A python program to implement multi-layer perceptron with back propagation.			
<b>6</b>	A python program to do face recognition using SVM classifier.			
<b>7</b>	A python program to implement decision tree.			
<b>8</b>	A python program to implement boosting.			
<b>9</b>	A python program to implement KNN and K-means.			
<b>10</b>	A python program to implement dimensionality reduction – PCA.			
<b>11</b>	Mini project – develop a simple application using tensorflow / keras.			
		<b>Contact Hours</b>	<b>:</b>	<b>30</b>
		<b>Total Contact Hours</b>	<b>:</b>	<b>75</b>

<b>Course Outcomes:On completion of the course, the students will be able to</b>	
•	Understand fundamentals of machine learning.
•	Apply the linear models for tuning parameters.
•	Understand and explore the machine learning algorithms with classification.
•	Apply machine learning algorithms with clustering and feature extraction.
•	Apply reinforcement learning techniques for various applications.

CS23621	Mobile Application Development Laboratory	PC	0	0	4	2
<b>For B.E. Programme CSE, CSECS and B.Tech. Programme in IT</b>						

**Objectives:**

- Get started developing in Kotlin, and learn the basics of the Kotlin programming language: data types, operators, variables, control structures, and nullable versus non-nullable variables.
- Get an introduction to Android development and UI basics.
- Learn Android app architecture using Kotlin.
- Learn best practices, guidelines, and tools for effective Android app design.
- To understand the capabilities and limitations of mobile devices

**List of Experiments**

1.	Kotlin Basics	
2.	Functions	
3.	Classes and Objects	
4.	Build First Android App	
5.	Layouts	
6.	App Navigation	
7.	Activity and Fragment Lifecycles	
8.	App Architecture (UI Layer)	
9.	App Architecture (Persistence)	
10.	Advanced RecyclerView Use Cases	
11.	Connect to the Internet	
12.	Repository Pattern and WorkManager	
13.	App UI Design	
14.	Mini Project	
<b>Total Contact Hours :</b>		<b>60</b>

**Course Outcomes: On completion of the course, students will be able to**

- Learn the basics of Kotlin, including data types, operators, variables, control structures, and handling nullable and non-nullable variables.
- Develop Android apps and the basics of user interface design.
- Become familiar with the architecture of Android apps and how to structure them using Kotlin.
- Learn the best practices, guidelines, and essential tools needed for designing effective Android apps.
- Develop an understanding of what mobile devices can and cannot do, which is crucial for mobile app development.

**Text Books:**

1.	Head First Android Development: A Learner's Guide to Building Android Apps with Kotlin, by Dawn Griffiths, David Griffiths, Shroff/O'Reilly, Third Edition.
2.	Learn Kotlin for Android Development: The Next Generation Language for Modern Android Apps Programming, Peter Späth, Apress, First Edition.

<b>Reference Books:</b>	
1	Android Development with Kotlin: Enhance your skills for Android development using Kotlin, Marcin Moskala, Igor Wojda, Packt Publishing Limited, 2017.
2	Learn Android Studio 3 with Kotlin: Efficient Android App Development, Ted Hagos, Apress, First Edition.
3	How to Build Android Apps with Kotlin: A hands-on guide to developing, testing, and publishing your first apps with Android, Alex Forrester, Eran Boudjnah, Alexandru Dumbravan, Jomar Tigcal, Packt Publishing Limited, 2021.
4	Mastering Android Development with Kotlin, Milos Vasic, Packt Publishing Limited, 2017.

Correlation levels 1, 2 or 3 are as defined below:

1: Slight (Low)      2: Moderate (Medium)      3:Substantial (High)      No correlation:"-"

<b>Course Code</b>	<b>Subject Name (Employment Enhancement Course)</b>	<b>Category</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
GE23621	Problem Solving Techniques	EEC	0	0	2	1
<b>For B.E Programme CSE ,CSBS,CSD and B.Tech Programme in IT,AIDS</b>						

**Objectives:**

- To improve the numerical ability
- To improve problem-solving skills.

**Course topics:**

S.No.	Topics
1	Numbers system
2	Reading comprehension
3	Data arrangements and Blood relations
4	Time and Work
5	Sentence correction
6	Coding & Decoding, Series, Analogy, Odd man out and Visual reasoning
7	Percentages, Simple interest and Compound interest
8	Sentence completion and Para-jumbles
9	Profit and Loss, Partnerships and Averages
10	Permutation, Combination and Probability
11	Data interpretation and Data sufficiency
12	Logarithms, Progressions, Geometry and Quadratic equations.
13	Time, Speed and Distance

**Course Outcomes: On completion of the course, students will be able to**

- Have mental alertness
- Have numerical ability
- Solve quantitative aptitude problems with more confident

## **PROFESSIONAL ELECTIVES(PE)**

Subject Code	Subject Name (Theory course)	Category	L	T	P	C
CR23A11	Security Assessment and Risk Analysis	PE	3	0	0	3
<b>For B.E. Programme CSE, CSD, CSECS and B.Tech. Programme in IT, AIML, AIDS</b>						

<b>Objectives:</b>	
•	Understand the fundamental principles of information security and the threat landscape.
•	Understand various security assessment methodologies.
•	Develop the ability to identify, assess, and manage information security risks through risk profiling and risk management concepts.
•	Learn risk evaluation and mitigation strategies.
•	Gain an introduction to common security frameworks and standards (NIST CSF and ISO 27001).

<b>UNIT I</b>	<b>INTRODUCTION</b>	<b>9</b>
Fundamentals of information security- CIA triad: Confidentiality, Integrity, Availability. Threat landscape overview: Common security threats, actors, and motivations. Introduction to vulnerability management.		
<b>UNIT II</b>	<b>SECURITY ASSESSMENT METHODOLOGIES</b>	<b>9</b>
Security assessment methodologies: Penetration testing - Vulnerability scanning - Security audits. Penetration testing types: White-box, black-box, grey-box testing. Vulnerability scanning tools and their functionalities.		
<b>UNIT-III</b>	<b>RISK ANALYSIS AND RISK MANAGEMENT</b>	<b>9</b>
Risk Profiling - Formulating the Risk - Risk Exposure Factors. Risk management concepts: Risk identification- assessment - mitigation and acceptance. Case Study - Work in groups to develop a risk register for a fictional company, identifying potential security risks, their likelihood, and impact.		
<b>UNIT IV</b>	<b>RISK ASSESSMENT AND ANALYSIS</b>	<b>9</b>
Risk Evaluation and mitigation strategies - Reports and Consulting - Risk Assessment Techniques. Project: Conduct a risk assessment for a specific department within your organization (if applicable) or a chosen cloud service platform.		
<b>UNIT-V</b>	<b>SECURITY FRAMEWORKS AND STANDARDS</b>	<b>9</b>
Introduction to security frameworks and standards (NIST CSF, ISO 27001) -Aligning security assessments and risk analysis with frameworks - Implementing security controls based on identified risks.		
		<b>Total Contact Hours : 45</b>

<b>Course Outcomes: On completion of course you will be able to</b>	
•	Understand the CIA triad and identify common security threats, actors, and their motivations.
•	Distinguish between penetration testing, vulnerability scanning, and security audits.
•	Describe the four main risk management concepts: identification, assessment, mitigation, and acceptance
•	Explain risk profiling and risk evaluation techniques.
•	Summarize the purpose and benefits of security frameworks like NIST CSF and ISO 27001

<b>Suggested Activities:</b>	
•	Quizzes
•	Class presentation/Discussion
•	Group Presentation

<b>Course Code</b>	<b>Subject Name (Theory course)</b>	<b>Category</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
CS23A11	Malware Detection and Analysis	PE	3	0	0	3
<b>For B.E Programme CSE, CSD, CSECS</b>						

<b>Objectives:</b>
<ul style="list-style-type: none"> <li>To introduce the malware components and behaviour</li> </ul>
<ul style="list-style-type: none"> <li>To detect and analyze malware affected documents.</li> </ul>
<ul style="list-style-type: none"> <li>To introduce malware fundamentals and basic analysis.</li> </ul>
<ul style="list-style-type: none"> <li>To enable to identify and analyze various malware types by static analysis.</li> </ul>
<ul style="list-style-type: none"> <li>To enable to identify and analyze various malware types by dynamic analysis.</li> </ul>

<b>UNIT I</b>	<b>MALWARE COMPONENTS AND FUNCTIONALITY</b>	<b>9</b>
Malware Components-Payload, Packers, Persistence, Communication, Propagation, Armoring, Stealth, Distribution Mechanisms, Downloaders and Launchers, Backdoors, Credential Stealers, Persistence Mechanisms, Handles, Mutexes, Privilege Escalation, Covert malware launching- Launchers, Process Injection, Process Replacement, Hook Injection, Detours, APC injection		
<b>UNIT II</b>	<b>MALWARE DETECTION AND REVERSE ENGINEERING</b>	<b>9</b>
Antivirus Engines-Main Components, Signatures and Signature Modules, File Scanner, Unpacker Module, Memory Scanner, Hook and Rootkit detection Modules, Next Generation Antiviruses, Malware Sandbox Internals, Reverse engineering malicious code - Identifying malware passwords - Bypassing authentication -Advanced malware analysis: Virus, Trojan and APK Analysis - Reverse Engineering Tools: IDA Pro and OLLYDBG		
<b>UNIT-III</b>	<b>BASIC MALWARE ANALYSIS</b>	<b>9</b>
Objective of Malware Analysis, Malware Analysis techniques, Types of Malwares, General Rules for Malware Analysis, Antivirus scanning, Hashing, Finding Strings, Packed and Obfuscated Malware, Portable Executable File Format, Linked Libraries and Functions, Static Analysis tools, Virtual Machines and their usage in malware analysis, Sandboxing, Basic dynamic analysis, Malware execution, Process Monitoring, Viewing processes, Registry snapshots.		
<b>UNIT IV</b>	<b>MODERN MALWARE STATIC ANALYSIS</b>	<b>9</b>
Levels of Abstraction, Reverse-Engineering, The x86 Architecture, Simple Instructions, The Stacks, Conditionals, Branching, Rep Instructions, Disassembly, Global and local variables, Arithmetic operations, Loops, Function Call Conventions, C Main Method and Offsets. Portable Executable File Format, The PE File Headers and Sections, IDA Pro, Function analysis, Graphing, The Structure of a Virtual Machine, Analyzing Windows programs, Anti-static analysis techniques, obfuscation, packing, metamorphism, polymorphism		
<b>UNIT-V</b>	<b>MODERN MALWARE DYNAMIC ANALYSIS</b>	<b>9</b>
Live malware analysis, dead malware analysis, analyzing traces of malware, system calls, api calls, registries, network activities. Anti-dynamic analysis techniques, VM detection techniques, Evasion techniques, Malware Sandbox, Monitoring with Process Monitor, Packet Sniffing with Wire shark, Kernel vs. User-Mode Debugging, OllyDbg, Breakpoints, Tracing, Exception Handling, Patching		
<b>Total Contact Hours:</b>		<b>45</b>

<b>Course Outcomes: On completion of course, you will be able to</b>
<ul style="list-style-type: none"> <li>Understand the various components of malware analysis and their functionalities.</li> </ul>
<ul style="list-style-type: none"> <li>Understand the malware detecting methods and reverse engineering.</li> </ul>
<ul style="list-style-type: none"> <li>Understand the various concepts of malware analysis and their technologies used.</li> </ul>
<ul style="list-style-type: none"> <li>Possess the skills necessary to carry out independent analysis of modern malware samples using both static and dynamic analysis techniques</li> </ul>
<ul style="list-style-type: none"> <li>To be able to safely analyze, debug, and disassemble any malicious software by malware analysis</li> </ul>

<b>Subject Code</b>	<b>Subject Name (Lab Oriented Theory course)</b>	<b>Category</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
CR23A31	Ethical Hacking and Security	PE	2	0	2	3
<b>For B.E. Programme CSE, CSD, CSECS and B.Tech. Programme in IT, AIML, AIDS</b>						

<b>Objectives:</b>	
•	To understand the ethical hacker's role, the hacking methodology, and the legal boundaries distinguishing ethical from malicious hacking.
•	To identify system weaknesses, network vulnerabilities, and use scanning tools to find security gaps.
•	To understand using ethical hacking tools and techniques to simulate real-world attacks for defensive purposes.
•	To learn how to prioritize risks, recommend security measures and report vulnerabilities.
•	To understand social engineering tactics, zero-day vulnerabilities.

<b>UNIT I</b>	<b>INTRODUCTION</b>	<b>6</b>
Overview of Ethical Hacking- Importance of ethical hacking for Businesses-Key concepts of Ethical Hacking- Difference between Ethical Hacking and Malicious Hacking-Most used tools in Ethical Hacking Incidents (NMAP, Metasploit)-Ethical hacking challenges and their solutions.		
<b>UNIT II</b>	<b>NETWORK VULNERABILITIES AND VARIOUS SCANNING TOOLS</b>	<b>6</b>
Overview of Network vulnerability scanning- Types of network vulnerability scanning-Key features of network vulnerability scanner-Network vulnerability scanning vs network scanning- Network scanning tools (Burp Suite)		
<b>UNIT-III</b>	<b>ETHICAL HACKING TOOLS AND TECHNIQUES</b>	<b>6</b>
Overview, Tools and Techniques in Ethical Hacking (Metasploit Framework, Nessus, Wireshark, Burp Suite, Nmap, John-the-Ripper, OWASP Zap.		
<b>UNIT IV</b>	<b>RISK ASSESSMENT AND TYPES OF SYSTEM HARDENING</b>	<b>6</b>
Overview, Types of system hardening (Network hardening, Server hardening, Application hardening, Database hardening, Operating system hardening), Types of Security Risk assessments (Physical security assessment, IT security assessment, Data security assessment, Application security assessment, Insider Threat assessment)		
<b>UNIT-V</b>	<b>SOCIAL ENGINEERING AND ZERO DAY ATTACKS</b>	<b>6</b>
Overview of Social Engineering and zero-day attacks, Impact of social Engineering and zero-day attacks, Prevention and mitigation techniques, Best practices for protecting against social engineering and zero day attacks.		
<b>Total Contact Hours</b>		<b>: 30</b>

<b>List of Experiments</b>		
1	Conduct a basic penetration test using Metasploit to exploit a known vulnerability in a controlled environment.	
2	Use NMAP to scan a network and identify open ports and services.	
3	Perform a web vulnerability scan using Burp Suite and document the identified vulnerabilities and their potential impacts.	
4	Perform a vulnerability scan using Nessus and generate a detailed report on the findings, including recommended remediation steps.	
5	Conduct a web application security test using OWASP ZAP. Document vulnerabilities and provide remediation recommendations.	
6	Assess the security of a sample application and provide a detailed report on vulnerabilities and recommended hardening measures.	
7	Perform a risk assessment on a sample IT system and present a risk management plan.	
8	Perform Social Engineering attack	
9	View and capture network traffic using Wireshark	
10	Explore dig tool for vulnerabilities	
<b>Contact Hours:</b>		<b>30</b>
<b>Total Contact Hours:</b>		<b>60</b>

Course Outcomes: On completion of course, you will be able to	
•	Grasp Core Ethical Hacking Concepts includes exploring the ethical hacker's role, the hacking methodology and the legal boundaries of ethical hacking.
•	Learn in detail about common system weaknesses, network vulnerabilities, and various scanning tools to pinpoint security gaps
•	Able to Understand ethical hacking tools and techniques
•	Gain knowledge in risk assessment and types of system hardening
•	Understand topics like social engineering tactics, zero-day vulnerabilities, and keeping abreast of industry best practices.

Suggested Activities:	
•	Code implementing sessions in NMAP, Metasploit, Burp Suite
•	Mini projects

Course Outcomes: On completion of course you will be able to	
•	Tutorial problems.
•	Assignment problems.
•	Quizzes
•	Class presentation/Discussion

Average	2.6	2.8	2	2.8	2.4	1.8	1.5	2	2.6	2.2	1	2.8	3	13	2.2

Correlation levels 1, 2 or 3 are as defined below:

1: Slight (low)    2: Moderate (Medium)    3: Substantial (High)    No correlation:"-"

Subject Code	Subject Name (Lab Oriented Theory course)	Category	L	T	P	C
CR23A32	Digital and Mobile Forensics	PE	2	0	2	3
<b>For B.E. Programme CSE, CSD, CSECS and B.Tech. Programme in IT, AIML, AIDS</b>						

<b>Objectives:</b>	
•	To understand basic digital forensics and techniques.
•	To understand digital crime and investigation.
•	To understand how to be prepared for digital forensic readiness.
•	To understand and use forensics tools for Android devices.
•	To understand and use Anti Forensics.

<b>UNIT I</b>	<b>INTRODUCTION</b>	<b>6</b>
Forensic Science – Digital Forensics – Digital Evidence – The Digital Forensics Process: Introduction – The Identification Phase – The Collection Phase – The Examination Phase – The Analysis Phase – The Presentation Phase.		
<b>UNIT II</b>	<b>DIGITAL CRIME AND INVESTIGATION</b>	<b>6</b>
The International Legal Framework of Cybercrime Law - Digital Crime – Substantive Criminal Law – General Conditions – Offenses – Investigation Methods for Collecting Digital Evidence – International Cooperation to Collect Digital Evidence		
<b>UNIT-III</b>	<b>DIGITAL FORENSIC READINESS</b>	<b>6</b>
Introduction – Law Enforcement versus Enterprise Digital Forensic Readiness – Rationale for Digital Forensic Readiness – Frameworks, Standards and Methodologies – Enterprise Digital Forensic Readiness – Challenges in Digital Forensics		
<b>UNIT IV</b>	<b>ANDROID FORENSICS</b>	<b>6</b>
Android basics – Key Codes – ADB – Rooting Android – Boot Process – File Systems – Security – Tools – Android Forensics – Forensic Procedures – ADB – Android Only Tools – Dual Use Tools – Oxygen Forensics – MobilEdit – Android App Decompiling		
<b>UNIT-V</b>	<b>SQLITE DATABASE FORENSICS AND ANTI FORENSICS</b>	<b>6</b>
Sqlite Database Forensics: Relational Databases - Other Viewers - Anti Forensics: Introduction - Steganography – Cryptography - Password Cracking.		
<b>Total Contact Hours</b>		<b>: 30</b>

<b>List of Experiments</b>		
1	Installation of Sleuth Kit on Linux. List all data blocks. Analyze allocated as well as unallocated blocks of a disk image.	
2	Data extraction from call logs using Sleuth Kit.	
3	Data extraction from SMS and contacts using Sleuth Kit.	
4	Extract installed applications from Android devices.	
5	Extract diagnostic information from Android devices through the adb protocol.	
6	Generate a unified chronological timeline of extracted records,	
7	Implement the sql query database and to handle sqlite in browser	
8	Hide InvisibleSecrets in the initial screen using Steganography	
<b>Contact Hours:</b>		<b>30</b>
<b>Total Contact Hours:</b>		<b>60</b>

<b>Course Outcomes: On completion of course, you will be able to</b>	
•	Have knowledge on digital forensics.
•	Know about digital crime and investigations.
•	Be forensic ready
•	Investigate, identify and extract digital evidence from Android devices.
•	Know about Anti Forensics.

<b>Suggested Activities:</b>	
•	Assignment problems, Quiz.
•	Class presentation/Discussion

<b>Textbooks:</b>

Subject Code	Subject Name (Lab oriented Theory course)	Category	L	T	P	C
CR23A33	CRYPTOCURRENCY AND BLOCKCHAIN TECHNOLOGIES	PE	2	0	2	3
<b>For B.E. Programme CSE, CSECS, CSD and B.Tech. Programme in IT, AIML, AIDS</b>						

**Objectives:**

•	To understand how blockchain operates and its potential applications beyond cryptocurrency
•	To understand various types of cryptocurrencies, mining processes, wallets, and their economic principles
•	To understand how smart contracts and decentralized applications transform the Ethereum
•	To understand common security challenges in cryptocurrencies and blockchain
•	Explore in setting up a cryptocurrency wallet, interacting with blockchain platforms, and exploring dApps for diverse applications.

<b>UNIT I</b>	<b>INTRODUCTION</b>	<b>9</b>
Overview, distributed ledger, how it works, and its key components like blocks, hashing functions, and consensus mechanisms (Proof of Work, Proof of Stake). Blockchain operation and its potential to revolutionize various industries beyond just cryptocurrency.		
<b>UNIT II</b>	<b>CRYPTOCURRENCIES</b>	<b>9</b>
Overview of history and evolution of leading cryptocurrencies like Bitcoin and Ethereum, different types of cryptocurrencies available, the mining process that creates new coins, how to securely store them in wallets, and the economic principles that govern their value.		
<b>UNIT-III</b>	<b>SMART CONTRACTS AND DAPPS</b>	<b>9</b>
Overview of smart contracts and decentralized applications (dApps), Smart contracts functionalities, limitations, and real-world applications, dApp platforms like Ethereum and how these applications are transforming industries such as finance, supply chain management, and even voting systems.		
<b>UNIT IV</b>	<b>BLOCKCHAIN SECURITY, REGULATION, AND FUTURE APPLICATIONS</b>	<b>9</b>
Overview on common security challenges associated with cryptocurrencies and blockchain platforms, like hacking attempts and fraudulent activities, explore the current regulations and potential future frameworks being developed globally, Future applications of blockchain technology across different sectors like healthcare, data management, and the Internet of Things (IoT).		
<b>UNIT-V</b>	<b>BLOCKCHAIN IN PRACTICE</b>	<b>9</b>
Provide practical experience with blockchain and cryptocurrency tools, Set up a cryptocurrency wallet, interact with a blockchain platform like Ethereum or another chosen platform, or explore dApps for different purposes (e.g., decentralized finance applications or NFT marketplaces).		
<b>Total Contact Hours</b>		<b>: 45</b>

**List of Experiments**

1	Simulate a Simple Blockchain creation	
2	Simple implementation of Proof of Work	
3	Simulate Bitcoin Mining	
4	Creating a Crypto-currency Wallet	
5	Creating and Deploying a Simple Smart Contract on Ethereum (Remix)	
6	Developing a Simple App with Web3 and Python	
7	Writing a Simple Smart Contract with Python or Solidity	
8	Public and Private key generation and basic encryption for Wallet security	
9	Creating a cryptocurrency wallet on a platform like MetaMask or Trust Wallet, and perform transactions on a testnet	
10	Exploring and Interacting with a Decentralized Finance (DeFi) Application or NFT Marketplace	
<b>Contact Hours:</b>		<b>30</b>
<b>Total Contact Hours:</b>		<b>75</b>

Course Outcomes: On completion of course, you will be able to	
•	Develop knowledge in the core concepts of blockchain technology, including distributed ledgers, hashing functions, and consensus mechanism
•	Focus on understanding history and evolution of cryptocurrencies, such as Bitcoin and Ethereum
•	Understand the concept of smart contracts and their functionalities on a blockchain platform
•	Understand the potential future applications of blockchain technology across various industries
•	Demonstrate practical skills through hands-on activities, such as setting up a cryptocurrency wallet or interacting with a blockchain platform

Suggested Activities:	
•	Problem solving sessions
•	Mini projects

Course Outcomes: On completion of course, you will be able to	
•	Tutorial problems.
•	Assignment problems.
•	Quizzes
•	Class presentation/Discussion

<b>Average</b>	<b>2.2</b>	<b>2</b>	<b>2.6</b>	<b>-</b>	<b>1.6</b>	<b>-</b>	<b>-</b>	<b>-</b>	<b>1</b>	<b>-</b>	<b>1</b>	<b>2</b>	<b>2</b>	<b>1</b>	<b>2</b>

Correlation levels 1, 2 or 3 are as defined below:

1: Slight (Low) 2: Moderate (Medium) 3: Substantial (High) No correlation: “-“

Subject Code	Subject Name (Lab Oriented Theory Course)	Category	L	T	P	C
CR23A34	Security and Privacy in Cloud	PE	2	0	2	3
<b>For B.E Programme CSE ,CSECS,CSD and B.Tech Programme in IT,AIML,AIDS</b>						

<b>Objectives:</b>	
<input type="checkbox"/>	To learn the fundamentals of Cloud Computing.
<input type="checkbox"/>	To learn the infrastructure security in cloud environment.
<input type="checkbox"/>	To learn the cloud application.
<input type="checkbox"/>	To learn the data life cycle and privacy in cloud.
<input type="checkbox"/>	To learn the cloud privacy and risk management.

<b>UNIT-I</b>	<b>FUNDAMENTALS OF CLOUD CONCEPTS</b>	<b>6</b>
Cloud Computing-Cloud computing technology components, Cloud services delivery, Cloud Deployment Model, Key drivers for adopting the cloud.		
<b>UNIT-II</b>	<b>INFRASTRUCTURE SECURITY</b>	<b>6</b>
Infrastructure Security: The Host Level-The Network Level, Ensuring Data Confidentiality and Integrity, Ensuring Proper Access Control, SaaS and PaaS Host Security, IaaS Host Security, Virtualization Software Security, Threats to the hypervisor, Virtual Server Security, Securing virtual servers.		
<b>UNIT-III</b>	<b>CLOUD APPLICATION</b>	<b>6</b>
Application-Level Security Threats, DoS and EDoS, End User Security, End User Security, PaaS Application Security, Customer-Deployed Application Security, IaaS Application Security, Public Cloud Security Limitations.		
<b>UNIT-IV</b>	<b>CLOUD PRIVACY</b>	<b>6</b>
Privacy: Data Life Cycle, Key Privacy Concerns in the Cloud, Protecting Privacy.		
<b>UNIT-V</b>	<b>CLOUD PRIVACY RISK MANAGEMENT</b>	<b>6</b>
Privacy Risk Management: Collection Limitation Principle, Use Limitation Principle, Security Principle, Transfer Principle, Accountability Principle, Legal and Regulatory Implications.		
<b>Contact Hours</b>		<b>: 30</b>

<b>List of Experiments</b>			
<b>1.</b>	<b>Private Cloud</b>		
a	Setup a Private Cloud by performing the procedure using a Single node OPENSTACK implementation.		
b	Perform Creation, Management and Termination of a CirrOS instance in OPENSTACK.		
c	Show the virtual machine migration based on certain conditions from one node to the other.		
<b>2</b>	<b>Public Cloud</b>		
a	Develop a simple application to understand the concept of PAAS using GAE/Amazon Elastic Beanstalk/IBM Blue Mix/GCC and launch it.		
b	Test how a SaaS applications scales in response to demand.		
c	Find the procedure to launch a Cloud instance using a Public IaaS cloud like AWS/GCP.		
<b>3</b>	<b>Data Encryption</b>		
a	Encrypt data both in transit and at rest using robust encryption algorithms.		
b	Implement Transport Layer Security (TLS) for securing communication channels.		
c	Use disk encryption to protect data stored on physical or virtual disks.		
<b>4</b>	<b>Access Control Policies</b>		
a	Develop access control policies defining who can access what resources.		
b	Implement role-based access control (RBAC) to assign permissions based on roles.		
<b>5</b>	<b>Identity Access Management</b>		
a	Capture all the flags in AWS bigiam challenges that consists of common misconfigurations in IAM.		
<b>Contact Hours</b>		<b>:</b>	<b>30</b>
<b>Total Contact Hours</b>		<b>:</b>	<b>60</b>

<b>Course Outcomes: On completion of the course, the students will be able to</b>	
•	Understand the cloud concepts and fundamentals.
•	Explain the infrastructure security in cloud
•	Define cloud application.
•	Understand various privacy in the cloud.
•	Define the various privacy risk management.

Correlation levels 1, 2 or 3 are as defined below:

1: Slight (low)      2: Moderate (Medium)      3: Substantial (High)      No correlation:”-“

Subject Code	Subject Name (Lab Oriented Theory course)	Category	L	T	P	C
CR23A35	Social Network Security	PE	2	0	2	3
<b>For B.E. Programme CSE, CSECS, CSD and B.Tech. Programme in IT, AIML, AIDS</b>						

Objectives:	
•	To understand and develop semantic web related applications
•	To understand privacy and security issues in Social Networking
•	To learn about the data extraction and mining of social networks
•	To discuss the prediction of human behaviour in social communities
•	To learn about the Access Control and identity management

<b>UNIT I</b>	<b>FUNDAMENTALS OF SOCIAL NETWORKING</b>	<b>6</b>
Introduction to Semantic Web, Limitations of current Web, Development of Semantic Web, Emergence of the Social Web, Social Network analysis, Development of Social Network Analysis, Key concepts and measures in network analysis, Historical overview of privacy and security, Major paradigms, for understanding privacy and security.		
<b>UNIT II</b>	<b>PRIVACY AND SECURITY ISSUES</b>	<b>6</b>
The evolution of privacy and security concerns with networked technologies, Contextual influences on privacy attitudes and behaviours, Anonymity in a networked world.		
<b>UNIT-III</b>	<b>EXTRACTION AND MINING IN SOCIAL NETWORKING DATA</b>	<b>6</b>
Extracting evolution of Web Community from a Series of Web Archive, detecting communities in social networks, Definition of community, evaluating communities, Methods for community detection and mining, Applications of community mining algorithms, Tools for detecting communities social network infrastructures and communities, Big data and Privacy.		
<b>UNIT IV</b>	<b>PREDICTING HUMAN BEHAVIOUR AND PRIVACY ISSUES</b>	<b>6</b>
Understanding and predicting human behaviour for social communities, User data Management, Inference and Distribution, Enabling new human experiences, Reality mining, Context, Awareness, Privacy in online social networks, Trust in online environment, What is Neo4j, Nodes, Relationships, Properties.		
<b>UNIT-V</b>	<b>ACCESS CONTROL AND IDENTITY MANAGEMENT</b>	<b>6</b>
Understand the access control requirements for Social Network, Enforcing Access Control Strategies, Authentication and Authorization, Roles-based Access Control, Host, storage and network access control options, Firewalls, Authentication, and Authorization in Social Network, Identity & Access Management, Single Sign-on, Identity Federation, Identity providers and service consumers, The role of Identity provisioning.		
		<b>Total Contact Hours : 30</b>

List of Experiments	
1	Developing a social media application.
2	Create a Network model using Neo4j.
3	Read and write Data from Graph Database.
4	Find "Friend of Friends" using Neo4j.
5	Implement secure search in social media.
6	Create a simple Security & Privacy detector.
<b>Contact Hours: 30</b>	
<b>Total Contact Hours: 60</b>	

Course Outcomes: On completion of course, you will be able to	
•	Develop a semantic web related application
•	Address Privacy and Security issues in Social Networking
•	Extract and mine the social networks data
•	To predict human behaviour in social communities
•	To enforce access control mechanism and do identity management

Suggested Activities:	
•	Assignment problems.
•	Class presentation/Discussion

<b>Average</b>	2	3	2.4	2.3	2.8	2.5	-	2.5	1	1.2	2	1.8	2.8	2.2	1.4

Correlation levels 1, 2 or 3 are as defined below:

1: Slight (low)      2: Moderate (Medium)      3: Substantial (High)      No correlation:"-"

Subject Code	Subject Name (Lab Oriented Theory course)	Category	L	T	P	C
CS23A35	Web Application Security	PE	2	0	2	3
<b>For B.E. Programme CSE, CSECS, CSD and B.Tech. Programme in IT, AIML &amp; AIDS</b>						

Objectives:
<ul style="list-style-type: none"> <li>● To understand the fundamentals of Web Application Security</li> <li>● To know about web application authentication and authorization mechanism</li> <li>● To identify common web application vulnerabilities</li> <li>● To focus on wide aspects of secure development and deployment of web applications</li> <li>● To get insight about mitigations and countermeasures against web application attacks</li> </ul>

<b>UNIT I</b>	<b>INTRODUCTION</b>	<b>6</b>
History of Software Security – OWASP Top Ten List 2021 – Input Validation – Attack Surface Reduction – Classifying and Prioritizing Threats		
<b>UNIT II</b>	<b>WEB APPLICATION SECURITY PRINCIPLES</b>	<b>6</b>
Authentication - Access Control Overview - Two Factor and Three Factor Authentication - Web Application Authentication – Authorization - Session Management Fundamentals - Securing Web Application Session Management		
<b>UNIT-III</b>	<b>COMMON WEB APPLICATION VULNERABILITIES</b>	<b>6</b>
Cross Site Scripting- Reflected XSS- Stored XSS- DOM based XSS- Mutation based XSS – Cross Site Request Forgery - SQL Injection – Code Injection – Insecure Direct Object References (IDOR)		
<b>UNIT IV</b>	<b>SECURE DEVELOPMENT AND DEPLOYMENT</b>	<b>6</b>
Application Security- Training- Threat Modelling- Secure Coding Libraries- Code Review- Security Testing- Security Incident Response Planning – Microsoft Security Development Lifecycle (SDL) – OWASP Comprehensive Lightweight Application Security Process (CLASP) – Software Assurance Maturity Model (SAMM)		
<b>UNIT-V</b>	<b>MITIGATIONS AND COUNTERMEASURES</b>	<b>6</b>
Anti XSS Coding Best Practices- Sanitizing User Input – Anti CSRF Coding Best Practices – Mitigating Against SQL Injection – Generic Injection Defenses – Defending Against IDOR – Architecture Level Mitigations		
<b>Total Contact Hours</b>		<b>: 30</b>

<b>List of Experiments</b>		
1	Identify security issues in web application – Walking an Application in TryHackMe Platform	
2	Burp Suite Basics in TryHackMe Platform	
3	OWASP ZAP to scan authenticated web application in TryHackMe Platform	
4	SQL Injection Lab in TryHackMe Platform	
5	Explore OWASP Top Ten -2021 Vulnerabilities in TryHackMe Platform	
6	SQLmap to exploit web application in TryHackMe Platform	
7	Exploit File Inclusion and Path Traversal Vulnerabilities in TryHackMe Platform	
8	Server-Side Template Injection in TryHackMe Platform	
9	DejaVu Code Injection Vulnerability in TryHackMe Platform	
10	NoSQL Injection on MongoDB in TryHackMe Platform	
<b>Contact Hours:</b>		<b>30</b>
<b>Total Contact Hours:</b>		<b>60</b>

<b>Course Outcomes: On completion of course, you will be able to</b>
<ul style="list-style-type: none"> <li>• Understand the fundamentals of web application security</li> <li>• Apply security principles in developing a secure web application</li> <li>• Identify common web vulnerabilities that are exploited by hackers</li> <li>• Identify the secure model for web application development and deployment</li> <li>• Apply best practices for mitigations of vulnerabilities</li> </ul>

<b>Suggested Activities:</b>
<ul style="list-style-type: none"> <li>• Assignment problems, Quiz.</li> <li>• Class presentation/Discussion</li> </ul>

Subject Code	Subject Name (Lab Oriented Theory Course)	Category	L	T	P	C
CR23A36	INFORMATION SECURITY AND MANAGEMENT	PE	2	0	2	3
<b>For B.E. Programme CSE, CSECS, CSD and B.Tech. Programme in IT, AIML &amp; AIDS</b>						

<b>Objectives:</b>	
•	To understand the basics of Information Security and legal and ethical issues in Information Security.
•	To understand the information security policy and concepts of access control.
•	To learn about intrusion detection and prevention techniques and tools.
•	To learn about auditing techniques and tools.
•	To Learn to analyze and validate forensics data

<b>UNIT-I</b>	<b>INTRODUCTION</b>	<b>6</b>
Security Trends, OSI security architecture, Security attacks, security services, security mechanisms, Security System Development Life cycle – Legal, Ethical and Professional issues.		
<b>UNIT-II</b>	<b>SECURITY ANALYSIS</b>	<b>6</b>
Risk Management - Identifying and Assessing Risk - Assessing and Controlling Risk. Blueprint for Information Security - Information Security Policy. Case Study: Healthcare Data Security		
<b>UNIT-III</b>	<b>SECURITY TECHNOLOGY</b>	<b>6</b>
Intrusion Detection and Prevention Systems (IDPS)-Terminology-Types-Detection methods. Honeypots, Honeynets and padded cell systems. Scanning and Analysis Tools-Port Scanners-Firewall analysis tools, Operating system detection tools-Vulnerability scanners-Packet Sniffers-Wireless security Tools		
<b>UNIT-IV</b>	<b>AUDITING</b>	<b>6</b>
Overview, Access control, IT Audit, Authentication. Open Web Application Security Project (OWASP), Web Site Audit and Vulnerabilities assessment- Case Study: Web Application Security Assessment for Online Retailer		
<b>UNIT-V</b>	<b>ANALYSIS AND VALIDATION</b>	<b>6</b>
Validating Forensics Data – Data Hiding Techniques – Performing Remote Acquisition – Network Forensics – Email Investigations – Cell Phone and Mobile Devices Forensics. –Case Study: WannaCry Ransomware Attack		
<b>Contact Hours</b>		<b>:</b>
		<b>30</b>

<b>List of Experiments</b>			
1	Implementation to gather information from any PC's connected to the LAN using whois, port scanners, network scanning, Angry IP scanners etc.		
2	Implementation of Steganography		
3	Implementation of Mobile Audit and generate the report of the existing Artifacts.		
4	Implementation of IT Audit, malware analysis and Vulnerability assessment and generate the report.		
5	Implementation of Cyber Forensics tools for Disk Imaging, Data acquisition, Data extraction and Data Analysis and recovery.		
6	Perform mobile analysis in the form of retrieving call logs, SMS log ,all contacts list using the forensics tool like SAFT		
7	Implementation to identify web vulnerabilities, using OWASP project.		
<b>Contact Hours</b>		<b>:</b>	<b>30</b>
<b>Total Contact Hours</b>		<b>:</b>	<b>60</b>

<b>Course Outcomes:On completion of the course, the students will be able to</b>	
<input type="checkbox"/>	Discuss the basics of information security and legal and ethical issues in Information Security.
<input type="checkbox"/>	Analyze the risk management and information security policy.
<input type="checkbox"/>	Implement intrusion detection and prevention techniques using different tools.
<input type="checkbox"/>	Perform auditing of logs.
<input type="checkbox"/>	Analyze and validate forensics data

Correlation levels 1, 2 or 3 are as defined below:

1: Slight (low) 2: Moderate (Medium) 3: Substantial (High) No correlation:”-“

Subject Code	Subject Name (Lab Oriented Theory Course)	Category	L	T	P	C
AI23A31	Social Network Analysis	PE	2	0	2	3
<b>For B.E. Programme CSE, CSECS and B.Tech. Programme in IT, AIML</b>						

<b>OBJECTIVES:</b>
<ul style="list-style-type: none"> <li>● To understand the concept of semantic web and social network analysis</li> <li>● To apply ontology for knowledge representation and integration of social network data</li> <li>● To identify and analyse communities within social networks using various detection methods</li> <li>● To examine human behaviour in social web and related communities</li> <li>● To analyse various visualizing tools for social networks.</li> </ul>

<b>UNIT I</b>	<b>INTRODUCTION</b>	<b>6</b>
Introduction to Semantic Web: Limitations of current Web - Development of Semantic Web - Emergence of the Social Web - Social Network analysis: Development of Social Network Analysis - Key concepts and measures in network analysis - Electronic sources for network analysis: Electronic discussion networks, Blogs and online communities - Web-based networks - Applications of Social Network Analysis.		
<b>UNIT II</b>	<b>MODELLING, AGGREGATING AND KNOWLEDGE REPRESENTATION</b>	<b>6</b>
Ontology and their role in the Semantic Web: Ontology-based knowledge Representation - Ontology languages for the Semantic Web: Resource Description Framework - Web Ontology Language - Modelling and aggregating social network data: State-of-the-art in network data representation - Ontological representation of social individuals - Ontological representation of social relationships - Aggregating and reasoning with social network data - Advanced representations.		
<b>UNIT III</b>	<b>EXTRACTION AND MINING COMMUNITIES IN WEB SOCIAL NETWORKS</b>	<b>6</b>
Extracting evolution of Web Community from a Series of Web Archive - Detecting communities in social networks - Definition of community - Evaluating communities - Methods for community detection and mining - Applications of community mining algorithms - Tools for detecting communities social network infrastructures and communities - Decentralized online social networks - Multi-Relational characterization of dynamic social network communities – Web analytics – Page ranking algorithm.		
<b>UNIT IV</b>	<b>PREDICTING HUMAN BEHAVIOUR AND PRIVACY ISSUES</b>	<b>6</b>
Understanding and predicting human behaviour for social communities - User data management - Inference and Distribution - Enabling new human experiences - Reality mining - Context - Awareness - Privacy in online social networks - Trust in online environment - Trust models based on subjective logic - Trust network analysis - Trust transitivity analysis - Combining trust and reputation - Trust derivation based on trust comparisons - Attack spectrum and countermeasures.		
<b>UNIT V</b>	<b>VISUALIZATION AND APPLICATIONS OF SOCIAL NETWORKS</b>	<b>6</b>
Graph Networks- Centrality - Clustering - Node-Edge Diagrams - Matrix representation - Visualizing online social networks, Visualizing social networks with matrix-based representations - Matrix and Node-Link Diagrams - Hybrid representations - Applications - Cover networks - Community welfare - Collaboration networks - Co-Citation networks.		
<b>TOTAL: 30 PERIODS</b>		

<b>List of Experiments (can be implemented using any tools: Python (NetworkX), MATLAB,Gephi.</b>		
<ol style="list-style-type: none"> <li>1) Implement a program to compute centrality measures</li> <li>2) Implementation of community detection using various algorithms</li> <li>3) Simulation of Diffusion of Information or Influence</li> <li>4) Implementation of Link Prediction</li> <li>5) Write a program and analyse Network Resilience and Robustness</li> <li>6) Simulation of Opinion Dynamics</li> <li>7) Simulation of Social Influence in Marketing Campaigns</li> <li>8) Implementation of Sentiment Analysis in Social Media Networks</li> <li>9) Creation of Network Visualization using different Layouts</li> <li>10) Mini Project -Modelling and tracking the evolution of a network over time, studying the addition of nodes and edges based on specific growth models (e.g., preferential attachment).</li> </ol>		
<b>Contact Hours</b>	<b>:</b>	<b>30</b>
<b>Total Contact Hours</b>	<b>:</b>	<b>60</b>

<b>Suggested Activities:</b>	
•	Role play- Social Media creation (Unit 1).
•	Mind Map, Poster Design - Ontology (Unit 2).
•	Flipped Classroom – Web creation (Unit 3).
•	Poster Design – Cyber Security (Unit4).
•	Implementation of small module- Community Channel (Unit5).

<b>COURSE OUTCOMES: On completion of the course, the students will be able to:</b>	
•	Develop semantic web related applications.
•	Represent knowledge using ontology.
•	Predict human behaviour in social web and related communities.
•	Visualize social networks.
•	Social awareness and its laws

AD23A32	Explorative and Forecasting Analytics	PE	2	0	2	3
For B.E. Programme CSE, CSECS and B.Tech. Programme in IT, AIDS						

Objectives:	
•	To acquire proficiency in preparing datasets and applying Python-based techniques for exploratory data visualization.
•	To gain expertise in performing univariate, bivariate, and multivariate data analyses using advanced EDA techniques.
•	To develop a comprehensive understanding of time series data processing, analysis, and visualization.
•	To understand and apply statistical and machine learning models for time series forecasting.
•	To explore and implement cutting-edge forecasting models, leveraging tools like auto ARIMA, Facebook Prophet, and deep learning architectures.

<b>UNIT-I</b>	<b>EXPLORATORY DATA ANALYSIS</b>	<b>6</b>
Generating Summary Statistics- Preparing Data for EDA- Visualizing Data in Python- Preparing for visualization- Visualizing data in Matplotlib-Visualizing data in Seaborn-Visualizing data in GGLOT		
<b>UNIT-II</b>	<b>ADVANCED EXPLORATORY DATA ANALYSIS TECHNIQUES</b>	<b>6</b>
Performing Univariate Analysis in Python- Performing Bivariate Analysis in Python- Performing Multivariate Analysis in Python- Dealing with Outliers and Missing Values- Automated EDA using pandas profiling		
<b>UNIT-III</b>	<b>TIME SERIES DATA ANALYSIS</b>	<b>6</b>
Introducing time series-Acquiring and processing time series data-Analyzing and visualizing time series data-Generating strong baseline forecast-Accessing forecasting of a time series.		
<b>UNIT-IV</b>	<b>FORECASTING MODELS</b>	<b>6</b>
Forecasting as regression-Feature engineering for time series forecasting-Target Transformations-Forecasting time series with Machine Learning models-Time series models using statistical methods-Plotting ACF and PACF-Exponential Smoothing-ARIMA-SARIMA.		
<b>UNIT-V</b>	<b>ADVANCED FORECASTING MODELS</b>	<b>6</b>
Forecasting with auto ARIMA, Facebook Prophet-Forecasting multivariate time series using VAR models-Forecasting with RNN using Keras-Forecasting with LSTM using Keras.		
<b>Contact Hours</b>		<b>: 30</b>

List of Experiments	
1	Clean and analyze the Bitcoin Historical Data from Kaggle to calculate daily summary statistics and identify any missing values. <b>Evaluation Parameters:</b> Accuracy in handling time-specific missing values and the relevance of summary statistics generated.
2	Create line plots and decompose the Daily Temperature of Major Cities dataset from Kaggle to reveal trends, seasonality, and residuals. <b>Evaluation Parameters:</b> Effectiveness in revealing underlying patterns and anomalies in data.
3	Develop a series of box plots and violin plots for the Global Financial Indices dataset from the Data Market repository, focusing on capturing distribution variations over time. <b>Evaluation Parameters:</b> Ability to interpret and articulate findings from the distribution shapes and their changes over time.
4	Visualize the correlation matrix for multiple time series variables from the Multivariate Economic Statistics dataset using heat maps and network diagrams, emphasizing the strength and direction of relationships. <b>Evaluation Parameters:</b> Clarity in displaying correlations, effectiveness in using colors and layout to represent data complexities.
5	Perform data cleaning, transformation, and feature engineering on the Stock Market Data from Kaggle to prepare it for time series modeling. <b>Evaluation Parameters:</b> Creativity in feature engineering and thoroughness in preprocessing steps.
6	Apply Moving Average and Exponential Smoothing models to establish baseline forecasts using the Electricity Consumption Data from Kaggle. <b>Evaluation Parameters:</b> Accuracy of forecasts and suitability of the model chosen for the data's nature.
7	Construct and tune an ARIMA model using Daily Financial Market Data from Quandl, focusing on optimal parameter selection.

	<b>Evaluation Parameters:</b> Model's fit to the data and predictive accuracy.		
8	Implement LSTM networks to forecast future patient admissions using the Hourly Patient Admission Data from the PhysioNet database. <b>Evaluation Parameters:</b> Effectiveness of the neural network architecture and its tuning.		
9	Forecast a system of multiple interrelated economic indicators using Vector Autoregression (VAR) with the Multivariate Economic Statistics from the Data Market repository. <b>Evaluation Parameters:</b> Integration of multiple time series inputs and forecasting accuracy.		
10	<p><b>Mini Project: Time Series Forecasting</b></p> <p><b>Objective:</b> Develop predictive models to forecast future values in a time series dataset, utilizing historical data patterns and trends. The project aims to enhance understanding and predictive accuracy for various applications.</p> <p><b>Task:</b> In this project, the student will gather historical time series data from a relevant domain, clean and preprocess the data to address issues like missing values and anomalies, conduct exploratory data analysis to uncover trends, seasonality, and cyclic behaviour, derive new features that may enhance predictive capabilities, construct various statistical and machine learning models for time series forecasting, and evaluate these models using appropriate metrics to determine their accuracy and reliability.</p> <p><b>Datasets:</b></p> <ol style="list-style-type: none"> <li>1. Global Development Data: Comprehensive datasets on development indicators like health, education, and economic metrics from countries worldwide, provided by the World Bank.</li> <li>2. Climate Data: Detailed climatological datasets including temperature, precipitation, and more from the Global Historical Climatology Network.</li> <li>3. International Economic Data: Extensive time series data covering global economic indicators like GDP, inflation rates, and employment figures from the International Monetary Fund (IMF).</li> <li>4. Global Commodity Prices: Time series data on prices of various commodities such as food, metals, and agricultural products from the Food and Agriculture Organization (FAO).</li> <li>5. Consumer Price Indexes (CPIs): Monthly time series data on consumer price indices, capturing inflation trends across various Indian cities and categories. Available on the Open Government Data (OGD) Platform India.</li> <li>6. Tourism Statistics: "Monthly Foreign Tourist Arrivals" from the Ministry of Tourism, which provides data on the number of foreign tourists visiting India each month.</li> <li>7. Agricultural Production Data: "Monthly Crop Production Statistics" from the Ministry of Agriculture and Farmers Welfare, detailing production volumes of major crops like wheat, rice, and sugarcane.</li> <li>8. Water Reservoir Levels: "Weekly Reservoir Level Data" from the Central Water Commission, which monitors water levels in major reservoirs across India, crucial for managing irrigation and drinking water supply.</li> <li>9. Air Quality Index (AQI) Data: "Daily Air Quality Index" from the Central Pollution Control Board (CPCB), which provides daily AQI readings from multiple cities across India.</li> <li>10. Stock Market Data: "National Stock Exchange (NSE) Historical Data" from the NSE of India, including daily stock prices, trading volumes, and market indices.</li> </ol>		
		<b>Contact Hours</b>	<b>: 30</b>
		<b>Total Contact Hours</b>	<b>: 60</b>

<b>Course Outcomes:At the end of the course the student will be able to:</b>	
•	Understand the exploratory data analysis
•	Apply Univariate and multivariate analysis
•	Analyse and visualize time series data to derive insights and establish baseline forecasts.
•	Analyse the forecasting techniques to model and predict time series data
•	Design and implement robust forecasting solutions using statistical and deep learning methodologies.

AI23A35	RECOMMENDATION SYSTEMS	PE	2	0	2	3
<b>For B.E Programme CSE ,CSECS and B.Tech Programme in IT</b>						

<b>Objectives: This course will enable students</b>
<ul style="list-style-type: none"> <li>● To understand the goals and models of the recommender systems</li> <li>● To analyse the different neighbor recommendation and models</li> <li>● To understand the basic components of content-based systems</li> <li>● To evaluate Knowledge based recommendation and Hybrid approaches</li> <li>● To evaluate the recommender system by design and metrics.</li> </ul>

<b>UNIT-I</b>	<b>Introduction</b>	<b>6</b>
Introduction: Goals of Recommender System, Basic models of Recommender Systems, Domain-Specific Challenges in Recommender System, Applications		
<b>UNIT-II</b>	<b>Collaborative Filtering</b>	<b>6</b>
User-based nearest neighbour recommendation, Item based nearest neighbour recommendation, Clustering and Neighbourhood-Based Model, Graph models for Neighbourhood-Based Model		
<b>UNIT-III</b>	<b>Content-based recommendation</b>	<b>6</b>
Basic components of content-based systems, Preprocessing and Feature Extraction, Learning User Profiles and Filtering, Content based versus Collaborative Filtering		
<b>UNIT-IV</b>	<b>Knowledge based recommendation and Hybrid approaches</b>	<b>6</b>
Knowledge based recommendation: Constraint based recommenders; Case based recommenders. Hybrid approaches: Weighted, Switching, Cascade, Meta-level Hybrids, Mixed Hybrids		
<b>UNIT-V</b>	<b>Evaluating Recommender System</b>	<b>6</b>
Introduction, Evaluation Paradigms, General goals of evaluation Design, Design issues: Case Study of Netflix, Accuracy metrics, Limitations of Evaluation metrics.		
<b>Total Contact Hours: 30</b>		

<b>Text Book(s):</b>
1. Charu C. Aggarwal,,Recommender Systems: The Textbook., 1 <sup>st</sup> edition, Springer ,2016

<b>Reference Books(s) / Web links:</b>
1. Ricci F., Rokach L., Shapira D., Kantor B.P., Recommender Systems Handbook, 3 <sup>rd</sup> edition, Springer,2022
2. Manouselis N., Drachsler H., Verbert K., Duval E., Recommender Systems for Learning, 1 <sup>st</sup> edition, Springer, 2013.
3. Francesco Ricci, Lior Rokach, Bracha Shapira, Paul B. Kantor, Recommender Systems Handbook, 2 <sup>nd</sup> , Springer ,2010
4. Jannach D., Zanker M. and FelFering A., Recommender Systems: An Introduction, 1st edition, Cambridge University Press, 2011.

<b>List of Experiments</b>	
<b>1</b>	Implement Data similarity measures using Python
<b>2</b>	Implement dimension reduction techniques for recommender systems
<b>3</b>	Implement user profile learning
<b>4</b>	Implement content-based recommendation systems
<b>5</b>	Implement collaborative filter techniques
<b>6</b>	Create an attack for tampering with recommender systems
<b>7</b>	Implement accuracy metrics like Receiver Operated Characteristic curves
<b>Contact Hours</b>	
: <b>30</b>	
<b>Total Contact Hours</b>	
: <b>60</b>	

**Course Outcomes: At the end of the course, the students should be able to**

- To learn the goal and applicability of recommendation systems in various fields.
- To gain knowledge of model based collaborative filtering techniques used in recommendation system
- To acquire knowledge of basics of content-based recommendation system.
- To develop skills on knowledge based and hybrid recommendation systems.
- To understand the evaluation of the recommendation system.

**SUGGESTED ACTIVITIES**

- **Design Taxonomy:** Applications of recommendation systems in various domains (e.g., e-commerce, entertainment, social media, etc.). **(Unit 1).**
- **Flipped Classroom** - To explore and analyze graph models in collaborative recommender systems. **(Unit 2).**
- **Role play** –To represent different methods for learning user profiles (e.g., feature extraction, user feedback, demographic-based methods). **(Unit 3).**
- **Poster Design** – To create posters illustrating case-based recommenders and knowledge-based recommendation. **(Unit4).**
- **Implementation of small module-** Implement a small module to evaluate the accuracy metrics of a recommender system (such as Precision, Recall, and F1-Score). **(Unit5).**

**SUGGESTED EVALUATION METHODS**

- **Develop Case Studies** - Identify and analyze various issues associated with recommender systems, such as cold-start problems, scalability, bias, and privacy concerns. Example: A case study analyzing Netflix's cold-start problem or how Amazon handles recommendation bias. **(Unit 1).**
- **Tutorial problems** - To evaluate students' understanding of the vulnerabilities in collaborative recommender systems and methods of mitigating these vulnerabilities. Example Problem: How can an attacker exploit user ratings in a collaborative recommender system, and what countermeasures can be applied? **(Unit 2).**
- **Quiz** - Quiz will test students' understanding of the fundamental components and architecture of content-based recommender systems. **(Unit 3).**
- **Assignment problems-** To understand and implement constraint-based recommenders, where recommendations are made by satisfying a set of pre-defined constraints. Example Problem: Design a constraint-based recommender system that recommends a set of vacation destinations considering factors like budget, distance, weather, and user preferences. **(Unit 4).**
- **Quiz** – Quiz will evaluate students' knowledge on how to evaluate recommender systems using real historical datasets. **(Unit5).**

AD23B33	Text and Speech Analysis	PE	2	0	2	3
<b>For B.E. Programme CSE, CSECS and B.Tech. Programme in IT, AIDS</b>						

<b>Objectives:</b>						
• Gain foundational knowledge in natural language processing (NLP) and speech recognition.						
• Explore fundamental techniques used in speech processing.						
• Study various feature extraction methods, such as MFCC and LPC.						
• Evaluate techniques for speech recognition and synthesis, including algorithms and systems.						
• Acquire hands-on experience in implementing and applying text and speech analysis models and algorithms						

<b>UNIT I</b>	<b>INTRODUCTION TO TEXT AND SPEECH ANALYSIS</b>	<b>6</b>
Overview of Text and Speech Analysis-Applications of NLP and Speech Processing-Basic Concepts in Text Analysis and Speech Recognition.		
<b>UNIT II</b>	<b>INTRODUCTION TO STATISTICAL AND MACHINE</b>	<b>6</b>
Introduction to Language Models (N-grams, Bag of Words, TF-IDF)-Topic Modeling: Latent Dirichlet Allocation (LDA).		
<b>UNIT III</b>	<b>TEXT ANALYSIS</b>	<b>6</b>
Text Classification: Naive Bayes, Support Vector Machines, and Neural Networks-Word Embeddings: Word2Vec, GloVe, BERT.		
<b>UNIT IV</b>	<b>SPEECH SIGNAL PROCESSING</b>	<b>6</b>
Basics of Digital Speech Processing-Feature Extraction: Mel-Frequency Cepstral Coefficients (MFCC), Linear Predictive Coding (LPC)-Speech Recognition: Hidden Markov Models (HMM), Dynamic Time Warping (DTW)-Introduction to Automatic Speech Recognition (ASR) Systems.		
<b>UNIT V</b>	<b>ADVANCED TOPICS IN TEXT AND SPEECH ANALYSIS</b>	<b>6</b>
Deep Learning for NLP: Recurrent Neural Networks (RNNs), Transformers-Speech Synthesis: Text-to-Speech (TTS) Systems-Cross-lingual Text and Speech Analysis-Ethical Considerations in Text and Speech Processing.		
<b>Contact Hours</b>		<b>: 30</b>

<b>List of Experiments</b>	
<b>1</b>	Text Preprocessing and Analysis a. Implementing tokenization, stemming, and lemmatization. b. Performing POS tagging and NER on text data. c. Building a sentiment analysis classifier using machine learning.
<b>2</b>	Language Models and Text Classification a. Creating and analyzing N-gram models b. Training and evaluating text classification models. c. Applying word embeddings for semantic similarity tasks.
<b>3</b>	Speech Processing a. Extracting MFCC features from speech signals. b. Implementing basic speech recognition using HMM or DTW. c. Developing a simple ASR system using open-source tools.
<b>4</b>	Advanced Projects a. Building a text-to-speech synthesis system. b. Implementing a neural network model for text classification. c. Developing a cross-lingual NLP application.
<b>5</b>	Mini Project: 1. Automated Customer Feedback Analyzer A retail company wants to automatically analyze feedback from customers, which may come as text (emails or chat messages) or speech (voice calls). The goal is to classify feedback into actionable categories (e.g., "Product Complaint," "Service Feedback," "General Inquiry") and identify the sentiment (positive/negative/neutral) expressed. Datasets: a. Kaggle Sentiment Analysis Dataset. b. LibriSpeech Dataset for speech data. c. Custom recordings of feedback using PyAudio or mobile apps. 2. News Article Classification and Topic Analysis A news agency wants to automatically classify articles based on their content (e.g., Politics, Sports, Technology) and understand the underlying topics discussed in a collection of news articles.

<p>Datasets:</p> <ol style="list-style-type: none"> <li>BBC News Classification Dataset (pre-classified news articles).</li> <li>Newsgroups Dataset (multi-category news data).</li> </ol> <p>3. Spam Email Detection Using Machine Learning and Word Embeddings" An email service provider wants to automatically detect spam emails to prevent them from reaching users' inboxes. This system will classify emails as "Spam" or "Not Spam" using traditional and deep learning models, while experimenting with different word embedding techniques.</p> <p>Datasets:</p> <ol style="list-style-type: none"> <li>SpamAssassin Public Dataset.</li> <li>Kaggle SMS Spam Collection Dataset.</li> </ol>					
			<b>Contact Hours</b>	:	<b>30</b>
			<b>Total Contact Hours</b>	:	<b>60</b>

<b>Course Outcomes: On completion of the course, the students will be able to</b>	
•	Demonstrate an understanding of the basic principles of text and speech analysis, including NLP applications and speech recognition fundamentals.
•	Utilize statistical models such as N-grams, Bag of Words, and TF-IDF to analyze textual data and perform topic modeling using Latent Dirichlet Allocation (LDA).
•	Implement and evaluate machine learning methods like Naive Bayes, Support Vector Machines (SVM), and neural networks for text classification.
•	Implement speech recognition models using Hidden Markov Models (HMM) and Dynamic Time Warping (DTW).
•	Apply deep learning methods like RNNs and Transformers for advanced NLP tasks.

CS23A31	BUSINESS ANALYTICS	PE	2	0	2	3
<b>For B.E. Programme CSE, CSECS and B.Tech. Programme in IT, AIML</b>						

<b>Objectives:</b>
<ul style="list-style-type: none"> <li>• Understand the Fundamentals of Business Analytics.</li> <li>• Develop Spreadsheet Proficiency for Analytics.</li> <li>• Master Data Visualization Techniques.</li> <li>• Learn Descriptive Statistical Analysis.</li> <li>• Explore Probability Distributions and Data Modeling.</li> </ul>

UNIT-I	Introduction to Business Analytics	6
What Is Business Analytics? Evolution of Business Analytics, Scope of Business Analytics, Data for Business Analytics, Models in Business Analytics, Problem Solving with Analytics.		
UNIT-II	Analytics on Spreadsheets	6
Basic Excel Skills, Excel Functions, Using Excel Lookup Functions for Database Queries, Spreadsheet Add-Ins for Business Analytics.		
UNIT-III	Visualizing and Exploring Data	6
Data Visualization, Creating Charts in Microsoft Excel, Other Excel Data Visualization Tools, Data Queries: Tables, Sorting, and Filtering, Statistical Methods for Summarizing Data, Exploring Data Using PivotTables.		
UNIT-IV	Descriptive Statistical Measures	6
Populations and Samples, Measures of Location, Measures of Dispersion, Measures of Shape, Excel Descriptive Statistics Tools, Descriptive Statistics for Grouped Data, Descriptive Statistics for Categorical Data: The Proportion, Statistics in PivotTables. Measures of Association, Outliers, Statistical Thinking in Business Decisions		
UNIT-V	Probability Distributions and Data Modeling	6
Basic Concepts of Probability, Random Variables and Probability Distributions, Continuous Probability Distributions, Random Sampling from Probability Distributions, Data Modeling and Distribution Fitting.		
<b>Contact Hours:</b>		<b>30</b>

<b>List of Experiments</b>	
<b>1</b>	<b>Excel essentials:</b> Introduction to the Interface and Source Data Formatting Navigation Shortcuts Format Painter Insert Delete Rows and Columns Autofill Data Sorting Filtering Custom Lists
<b>2</b>	<b>Excel Formulas</b> Logical Formulas IF & IFS Formulas Statistical Formulas Lookup Formulas Index and Match Switch Text Formulas Date and Time Formulas
<b>3</b>	<b>Excel Data Visualization</b> Inserting a Chart in Excel Changing Elements in a Chart Select Data Method Format Chart Elements Line Chart, Area Chart, Pie Chart, Donut Chart, Histogram & Pareto Chart, Waterfall Chart, Heat Maps, Combo Chart, Sparkline Dynamic Charts Funnel Chart, Slope Chart, Dumbbell Chart Highlight Points in Time

	Highlight Min and Max Actual vs Target
4	<b>Excel Pivot Table</b> Introduction to the Source Data Inserting a Pivot Table Understanding the Field List Clear, Select and Move Functions Refreshing Pivot Table Number Formatting in Pivot Table Conditional Formatting in Pivot Table Sorting in Pivot Table Filtering in Pivot Table Grouping in Pivot Table Pivot Table Layouts Table Styles and Other Important Options Summarize Values By Calculated Fields Pivot Charts Slicers
5	<b>Mini Project</b>
	<b>Contact Hours: 30</b>
	<b>Total Contact Hours: 60</b>

<b>Course Outcomes: On completion of the course, the students will be able to</b>	
•	Apply Business Analytics Techniques.
•	Utilize Advanced Excel Functions.
•	Create and Interpret Data Visualizations.
•	Perform Descriptive Statistical Analysis.
•	Model Business Scenarios Using Probability.

AD23A37	Image and Video Analytics	PE	2	0	2	3
<b>For B.E. Programme CSE, CSECS and B.Tech. Programme in IT, AIDS</b>						

<b>Objectives:</b>						
• To Understand the basics of image processing techniques for computer vision and video analysis.						
• To Explain the techniques used for image pre-processing.						
• To Develop various object detection techniques.						
• To Understand the various face recognition mechanisms.						
• To Understand deep learning-based video analytics.						

<b>UNIT I</b>	<b>INTRODUCTION</b>	<b>6</b>
Computer Vision – Image representation and image analysis tasks - Image representations – digitization – properties – color images – Data structures for Image Analysis - Levels of image data representation - Traditional and Hierarchical image data structures.		
<b>UNIT II</b>	<b>IMAGE PRE-PROCESSING</b>	<b>6</b>
Local pre-processing - Image smoothing - Edge detectors - Zero-crossings of the second derivative - Scale in image processing - Canny edge detection - Parametric edge models - Edges in multispectral images - Local pre-processing in the frequency domain - Line detection by local preprocessing operators - Image restoration.		
<b>UNIT III</b>	<b>OBJECT DETECTION USING MACHINE LEARNING</b>	<b>6</b>
Object detection– Object detection methods – Deep Learning framework for Object detection– bounding box approach- Intersection over Union (IoU) –Deep Learning Architectures - R-CNN-Faster R-CNN-You Only Look Once (YOLO) - Salient features - Loss Functions - YOLO architectures.		
<b>UNIT IV</b>	<b>FACE RECOGNITION AND GESTURE RECOGNITION</b>	<b>6</b>
Face Recognition - Introduction - Applications of Face Recognition - Process of Face Recognition - DeepFace solution by Facebook - FaceNet for Face Recognition- Implementation using FaceNetGesture Recognition.		
<b>UNIT V</b>	<b>VIDEO ANALYTICS</b>	<b>6</b>
Video Processing – use cases of video analytics-Vanishing Gradient and exploding gradient problem - RestNet architecture-RestNet and skip connections-Inception Network-GoogleNet architecture Improvement in Inception v2- Video analytics-RestNet and Inception v3.		
<b>Contact Hours</b>		<b>: 30</b>

<b>List of Experiments</b>			
<b>1</b>	Write a program that computes the T-pyramid of an image.		
<b>2</b>	Write a program that derives the quad tree representation of an image using the homogeneity criterion of equal intensity		
<b>3</b>	Develop programs for the following geometric transforms: (a) Rotation (b) Change of scale (c) Skewing (d) Affine transform calculated from three pairs of corresponding points (e) Bilinear transform calculated from four pairs of corresponding points.		
<b>4</b>	Develop a program to implement Object Detection and Recognition		
<b>5</b>	Develop a program for motion analysis using moving edges and apply it to your image sequences.		
<b>6</b>	Develop a program for Facial Detection and Recognition		
<b>7</b>	Write a program for event detection in video surveillance system		
<b>Contact Hours</b>		<b>: 30</b>	
<b>Total Contact Hours</b>		<b>: 60</b>	

<b>Course Outcomes:</b>						
• To understand the basics of image processing techniques for computer vision.						
• To apply the techniques used for image pre-processing.						
• To analyze the various object detection techniques.						
• To apply the various Object recognition mechanisms.						
• To examine on the video analytics techniques.

Subject Code	Subject Name (Lab oriented Theory Courses)	Category	L	T	P	C
AD23B31	Image Processing and Computer Vision	PE	2	0	2	3
<b>For B.E. Programme CSE, CSECS and B.Tech. Programme in AIDS</b>						

<b>Objectives:</b>						
•	To Learn the basic concepts of image processing and computer vision.					
•	To explore the use of computer vision for object detection and image segmentation problems.					
•	To understand the ideas about image Recognition and Restoration					
•	Explore the ideas of object detection and Segmentation using Vision Datasets.					
•	To demonstrate the model prediction and to solve a variety of problems					

<b>UNIT I</b>	<b>INTRODUCTION</b>	<b>6</b>		
Introduction to Image Processing and Computer Vision-Features-Applications- Image formation -Geometric primitives and transformations - Photometric image formation - The digital camera- Image processing - Point operators - Linear filtering -More neighbourhood operators -Fourier transforms - Pyramids and wavelets - Geometric transformations - Global optimization - Feature detection and matching Points and patches - Edges – Lines				
<b>UNIT II</b>	<b>Image Segmentation and Alignment</b>	<b>6</b>		
Segmentation: Active contours - Split and merge - Mean shift and mode finding - Normalized cuts -Graph cuts and energy-based methods - Feature-based alignment - 2D and 3D feature-based alignment - -Geometric intrinsic calibration.				
<b>UNIT III</b>	<b>Object Detection, Recognition, and 3D Reconstruction</b>	<b>6</b>		
Object detection -Face recognition -Instance recognition - Category recognition -Context and scene understanding - Recognition databases and test set, 3D reconstruction: Shape from X - Active range finding - Surface representations - Point-based representations - Volumetric representations - Model-based reconstruction -Recovering texture maps and albedos				
<b>UNIT IV</b>	<b>Vision Datasets and Model Predictions</b>	<b>6</b>		
Object Detection – Segmentation. Creating Vision Datasets: Collecting Images – Data types – Manual Labeling – Labeling at Scale – Automated Labeling – Bias – Creating a Dataset -Model Predictions: Making Predictions – Online Prediction- Example				
<b>UNIT V</b>	<b>Object Measurement, Pose Estimation, and Image Understanding</b>	<b>6</b>		
Object Measurement – Counting – No-Code Computer Vision - Pose estimation- Image Search, Image and Text Generations: Image Understanding – Image Generation –Image Captioning.				
		<b>Contact Hours</b>	<b>:</b>	<b>30</b>

<b>List of Experiments</b>				
<b>1</b>	Installation of Open CV & To perform the basic image handling processing operation on the image			
<b>2</b>	Implement Edge Detection, Line Detection and Corner Detection			
<b>3</b>	Demonstrate Camera Calibration using python			
<b>4</b>	Implement Image Histogram and Histogram Equalization			
<b>5</b>	Develop a python program for Skin color Detection			
<b>6</b>	Create a python program for Warping and Estimation			
<b>7</b>	Develop a python program for Motion Tracking			
<b>8</b>	Design a program for Object Detection using YOLO			
<b>9</b>	Develop a python program for Stereo Vision and Depth Estimation			
<b>10</b>	Demonstrate Augmented reality using feature matching			
<b>11</b>	Mini Project: Real-Time Object Detection with YOLO (You Only Look Once) Camera Calibration and Stereo Vision for Depth Estimation Skin Color Detection and Tracking in Real-Time Augmented Reality using Feature Matching and Homography Motion Tracking System for Object Detection			
		<b>Contact Hours</b>	<b>:</b>	<b>30</b>
		<b>Total Contact Hours</b>	<b>:</b>	<b>60</b>

<b>Course Outcomes:</b>	
•	Understand the basic concepts and techniques of digital image processing.
•	Apply various image transformation and restoration techniques.
•	Extract features from images and perform image segmentation.
•	Gain familiarity with computer vision concepts like depth perception, motion estimation, and 3D vision.
•	Apply deep learning techniques for image classification and object detection.

**For B.E. Programme CSE, CSECS, CSBS and B.Tech. Programme in IT**

<b>Objectives:</b>						
•	To understand the basic concepts of big data and Hadoop.					
•	To have knowledge on accessing, storing and manipulating the huge data from different sources.					
•	To implement Map-Reduce programs for processing big data.					
•	To realize storage and processing of big data using MongoDB, Pig, Hive and Spark.					
•	To analyze big data using machine learning techniques.					

<b>UNIT-I</b>	<b>Introduction To Big Data</b>	<b>6</b>
<p>Classification of data, Characteristics, Evolution and definition of Big data, What is Big data, Why Big data, Traditional Business Intelligence Vs Big Data, Typical data warehouse and Hadoop environment.  <b>Big Data Analytics:</b> Classification of Analytics, Importance of Big Data Analytics, Technologies used in big data Environments, Few Top Analytical Tools, NoSQL, Hadoop.</p>		
<b>UNIT-II</b>	<b>Hadoop And Map Reduce</b>	<b>6</b>
<p><b>Introduction to Hadoop:</b> Introducing hadoop, Why hadoop, Why not RDBMS, RDBMS Vs Hadoop, History of Hadoop, Hadoop overview, Use case of Hadoop, HDFS (Hadoop Distributed File System), Processing data with Hadoop, Managing resources and applications with Hadoop YARN (Yet Another Resource Negotiator).  <b>Introduction to Map Reduce Programming:</b> Introduction, Mapper, Reducer, Combiner, Partitioner, Searching, Sorting, Compression.</p>		
<b>UNIT-III</b>	<b>MongoDB</b>	<b>6</b>
<p><b>Introduction to MongoDB:</b> What is MongoDB, Why MongoDB, Terms used in RDBMS and MongoDB, Data Types in MongoDB, MongoDB Query Language.</p>		
<b>UNIT-IV</b>	<b>FUNDAMENTALS OF APACHE PIG, HIVE</b>	<b>6</b>
<p><b>Introduction to Hive:</b> What is Hive, Hive Architecture, Hive data types, Hive file formats, Hive Query Language (HQL), RC File implementation, User Defined Function (UDF).  <b>Introduction to Pig:</b> What is Pig, Anatomy of Pig, Pig on Hadoop, Pig Philosophy, Use case for Pig, Pig Latin Overview, Data types in Pig, Running Pig, Execution Modes of Pig, HDFS Commands, Relational Operators, Eval Function, Complex Data Types, Piggy Bank, User Defined Function, Pig Vs Hive.</p>		
<b>UNIT-V</b>	<b>Spark And Data Analysis</b>	<b>6</b>
<p><b>Spark and Big Data Analytics:</b> Spark, Introduction to Data Analysis with Spark.  <b>Text, Web Content and Link Analytics:</b> Introduction, Text Mining, Web Mining, Web Content and Web Usage Analytics, Page Rank, Structure of Web and Analyzing a Web Graph</p>		
		<b>Contact Hours</b>
		<b>: 30</b>

<b>List of Experiments</b>						
1.	Install Hadoop and Implement the following file management tasks in Hadoop: Adding Files and directories Retrieving files Deleting files and directories. <b>Note:</b> A typical Hadoop workflow creates data files (such as log files) elsewhere and copies them into HDFS using one of the above command line utilities.					
2.	Develop a MapReduce program to implement Matrix Multiplication Suggested Dataset: Iris Dataset					
3.	Develop a Map Reduce program that mines weather data and displays appropriate messages indicating the weather conditions of the day.					
4.	Develop a MapReduce program to find the tags associated with each movie by analyzing movie lens data.					
5.	Implement Functions: Count – Sort – Limit – Skip – Aggregate using MongoDB					
6.	Pig Latin scripts to sort, group, join, project, and filter the data					
7.	Use Hive to create, alter, and drop databases, tables, views, functions, and indexes.					
8.	Implement a word count program in Hadoop and Spark.					
9.	Use CDH (Cloudera Distribution for Hadoop) and HUE (Hadoop User Interface) to analyze data and generate reports for sample dataset					
		<b>Contact Hours</b>	<b>:</b>	<b>30</b>		
		<b>Total Contact Hours</b>	<b>:</b>	<b>60</b>		

<b>Course Outcomes: On completion of the course, the students will be able to</b>	
•	Identify and list various Big Data concepts, tools and applications.
•	Develop programs using HADOOP framework.
•	Learn the working principles of big data management using MongoDB
•	Use Hadoop Cluster to deploy Map Reduce jobs, PIG,HIVE and Spark programs
•	Analyze the given data set and identify deep insights from the data set.

Subject Code	Subject Name (Lab oriented Theory Courses)	Category	L	T	P	C
AI23632	NATURAL LANGUAGE PROCESSING	PE	2	0	2	3
<b>For B.E. Programme CSE, CSECS, CSBS and B.Tech. Programme in IT, AIML, AIDS</b>						

Objectives:	
•	To introduce the fundamental concepts of Natural Language Processing (NLP for analysing words based on statistical measures and CORPUS.
•	To understand the principles of morphological analysis and language modelling using finite state machines and n-gram models.
•	To explore vector semantics and learn how to represent words and their relationships through embeddings and similarity measures.
•	To analyse and implement Hidden Markov Models (HMMs) and their applications in Part-Of-Speech (POS) tagging
•	To study the architecture of transformers and large language models, including pre-training and evaluation techniques.

<b>UNIT-I</b>	<b>INTRODUCTION TO NATURAL LANGUAGE PROCESSING</b>	<b>6</b>
Introduction to NLP - Various stages of NLP –NLP Pipeline, The Ambiguity of Language: Parts of Speech, Phrase Structure. Statistics Essential Information Theory: Entropy, perplexity, The relation to language: Cross entropy, Text Preprocessing: Character Encoding, Word Segmentation, Sentence Segmentation, Introduction to Corpora, Corpora Analysis		
<b>UNIT-II</b>	<b>MORPHOLOGY AND LANGUAGE MODELLING</b>	<b>6</b>
Inflectional and Derivation Morphology, Morphological analysis and generation using Finite State Automata and Finite State transducer. Bag of words, skip-gram, Continuous Bag-Of-Words, N gram model, n -gram Models over Sparse Data: Bins: Forming Equivalence Classes- - Statistical Estimators- Combining Estimators		
<b>UNIT-III</b>	<b>VECTOR SEMANTICS AND EMBEDDINGS</b>	<b>6</b>
Lexical Semantics-Vector Semantics-Words and Vectors-Cosine for measuring similarity- TF-IDF: Weighing terms in the vector- Pointwise Mutual Information (PMI) -Applications of the TF-IDF or PPMI vector models- Word2vec -Visualizing Embeddings-Semantic properties of embeddings-Bias and Embeddings-Evaluating Vector Models		
<b>UNIT-IV</b>	<b>MARKOV MODEL AND POS TAGGING</b>	<b>6</b>
Markov Model: Hidden Markov model, Three Fundamental questions of HMM, Implementation properties, and Variants of HMMs, Multiple input observation. <b>POS</b> : The Information Sources in Tagging: Markov model taggers, Viterbi algorithm, Applying HMMs to POS tagging, Applications of Tagging.		
<b>UNIT-V</b>	<b>TRANSFORMERS AND LARGE LANGUAGE MODELS</b>	<b>6</b>
The Transformer - Attention-Transformer Blocks- Parallelizing computation using a single matrix X , The input: embeddings for token and position-The Language Modelling Head - Large Language Models : Large Language Models with Transformers -Sampling for LLM Generation -Pretraining Large Language Models -Evaluating Large Language Models		
		<b>Contact Hours : 30</b>

List of Experiments	
1.	Develop a morphological analyser to process and analyse various sentence structures, including interrogative, declarative, and complex sentences with conjunctions. Perform word segmentation and sentence segmentation as part of the analysis. <b>Suggested Dataset/Corpus: Universal Dependencies (UD) English Treebank</b>
2.	Design a basic NLP pipeline to preprocess raw text data by performing tokenization, sentence segmentation, and part-of-speech (POS) tagging. Automate the pipeline to process large-scale text efficiently. <b>Suggested Dataset/Corpus: Universal Dependencies (UD) English Treebank</b>
3.	Implement a Named Entity Recognition (NER) system using Python libraries such as spaCy or NLTK. Utilize a pre-trained model to extract named entities, including people, organizations, and locations, from a text corpus. <b>Suggested Dataset/Corpus: CoNLL-2003 NER Dataset</b>

4.	Construct unigram, bigram, and trigram models to analyze their performance on sparse data. Compare the language models based on perplexity and their effectiveness in predicting word sequences. <b>Suggested Dataset/Corpus: The Brown Corpus</b>			
5.	Implement n-gram language models (unigram, bigram, trigram, etc.) and apply smoothing techniques like Laplace smoothing to address data sparsity. Evaluate the models on a large text corpus for accuracy and perplexity. <b>Suggested Dataset/Corpus: Google Ngram Dataset</b>			
6.	Design a spelling correction model using a combination of morphological rules and n-gram probabilities. Test the model on a dataset containing deliberately misspelled words and compare it to established spell-check systems. <b>Suggested Dataset/Corpus: Birkbeck Spelling Error Corpus</b>			
7.	Implement the Term Frequency-Inverse Document Frequency (TF-IDF) model and use cosine similarity to compare the similarity between documents in a given corpus. Visualize the similarity matrix for better insight. <b>Suggested Dataset/Corpus: 20 Newsgroups Dataset</b>			
8.	Train a Word2Vec model on a given text corpus and visualize the resulting word embeddings using dimensionality reduction techniques like t-SNE or PCA. Analyze the semantic relationships between words in the embeddings. <b>Suggested Dataset/Corpus: Text8 Dataset</b>			
9.	Build a Hidden Markov Model (HMM) for part-of-speech (POS) tagging. Train the model on a tagged corpus and evaluate its accuracy on a test dataset. <b>Suggested Dataset/Corpus: Universal Dependencies (UD) Treebank</b>			
10.	Use a pre-trained Transformer model (e.g., BERT) to build a sentiment analysis model. Fine-tune the model on a dataset of tweets, classify sentiment (positive, neutral, negative), and evaluate its performance using accuracy and F1-score. <b>Suggested Dataset/Corpus: Sentiment140 Dataset</b>			
11	Use a pre-trained language model to perform sentiment analysis or keyword extraction on a dataset of WhatsApp chat data. Analyze the conversational patterns, emotions, and key topics discussed in the chats. <b>Suggested Dataset/Corpus: WhatsApp Chat Export (User-Generated Data)</b>			
12	Implement a question-answering system using a pre-trained BERT model. Input a passage and a question, and use the model to extract the correct answer from the passage. Evaluate the system on accuracy and relevance of the answers. <b>Suggested Dataset/Corpus: SQuAD (Stanford Question Answering Dataset)</b>			
13	<b>Mini Project</b> <ul style="list-style-type: none"> <li>Choose a Topic: Identify a deep learning problem of interest, such as image classification, text generation, or anomaly detection.</li> <li>Research related works using platforms like Google Scholar.</li> <li>Dataset Selection: Find or collect a suitable dataset from sources like Kaggle or UCI. Ensure it is relevant, well-sized, and consider preprocessing requirements.</li> <li>Develop Methodology: Start with baseline models, then experiment with advanced architectures (e.g., CNNs, Transformers). Use frameworks like TensorFlow or PyTorch.</li> <li>Implementation &amp; Evaluation: Train models and evaluate performance using appropriate metrics (e.g., accuracy, F1-score). Document findings systematically.</li> <li>Discuss &amp; Present: Analyze results, highlight challenges, and present your work with clear insights and future directions.</li> </ul>			
		<b>Contact Hours</b>	:	<b>30</b>
		<b>Total Contact Hours</b>	:	<b>60</b>

<b>Course Outcomes: On completion of the course, the students will be able to</b>	
•	Analyse the different stages in the NLP pipeline and perform statistical analysis on the data.
•	Apply morphological analysis techniques and construct n-gram models for language processing.
•	Evaluate the effectiveness of word embeddings and semantic vector models
•	Implement and analyse Hidden Markov Models (HMMs) for Part-Of-Speech (POS) tagging and compare their effectiveness.
•	Design and evaluate transformer-based large language models for text generation and other NLP applications

Subject Code	Subject Name (Lab oriented Theory course)	Category	L	T	P	C
CS23C31	Data Analytics and Insights in MindSphere	PE	1	0	4	3
<b>Programme for B.E CSE</b>						

**OBJECTIVES:**

• To Understand MindSphere Architecture
• To Analyze data visualization and management in Mindsphere
• To Develop mindsphere application
• To Apply the Security and integration in Mindsphere
• To develop Final Project using Mindsphere kit

<b>UNIT-I</b>	<b>Introduction to IoT and MindSphere</b>	<b>3</b>
Understanding IoT, MindSphere architecture, and its components, Research and present examples of IoT applications in various industries, Exploring MindConnect devices and connectivity options, Set up a simulated device and establish its connection to MindSphere.		
<b>UNIT-II</b>	<b>Data Management and Visualization</b>	<b>3</b>
Data ingestion, storage, and basic visualization in MindSphere, Ingest sample data into MindSphere and create basic visualizations, Introduction to MindSphere APIs and development environment, Start building a simple application using MindSphere SDKs.		
<b>UNIT-III</b>	<b>Advanced Application Development</b>	<b>3</b>
Delving deeper into MindSphere APIs and development tools, Enhance the previously built application with more features or integrations. Understanding data analytics capabilities in MindSphere, Analyze the collected data, derive insights, and present findings.		
<b>UNIT-IV</b>	<b>Security and Integration</b>	<b>3</b>
Security protocols and compliance considerations in MindSphere, Perform a security assessment and propose improvements in a simulated MindSphere environment, Design an end-to-end IoT solution incorporating MindSphere, considering security measures.		
<b>UNIT-V</b>	<b>Project and Presentation</b>	<b>3</b>
Work on a final project (e.g., creating an innovative IoT application or solving a specific industry problem using MindSphere), Presentation: Present the project to the class, showcasing the application, findings, or proposed solution.		
<b>Total Contact Hours</b>		<b>15</b>

**List of Experiments**

1	Device Connectivity and Data Ingestion <b>Objective:</b> Connect a simulated or physical device to MindSphere and ingest data.	
2	<b>Data Storage and Model Definition</b> <b>Objective:</b> Organize and store collected data in MindSphere.	
3	Lab 3: Real-Time Data Monitoring <b>Objective:</b> Set up a dashboard for live data monitoring using MindSphere Visual Analyzer.	
4	<b>Lab 4: Anomaly Detection using Analytical Tools</b> <b>Objective:</b> Apply anomaly detection algorithms on collected data.	
5	<b>Lab 5: Data Insights and Reporting</b> <b>Objective:</b> Generate actionable insights and reports from the collected data.	
6	<b>Lab 6: Predictive Maintenance Model Development</b> <b>Objective:</b> Develop a predictive maintenance model for an industrial application.	
7	Lab 7: Data Integration with Third-Party Tools <b>Objective:</b> Integrate MindSphere with external analytical tools for advanced analytics.	
8	<b>Lab 8: Custom App Development on MindSphere</b> <b>Objective:</b> Create a custom analytics app using Mendix or MindSphere SDK.	
<b>Contact Hours</b>		<b>60</b>
<b>Total Contact Hours</b>		<b>75</b>

<b>Course Outcomes: On completion of the course, the students will be able to</b>
• Understanding basics of MindSphere Architecture
• Analyze data visualization and management in Mindsphere
• Develop mindsphere application
• Apply the Security and integration in Mindsphere
• Develop Final Project using Mindsphere kit

<b>Textbooks:</b>	
1.	Official Siemens MindSphere Documentation Siemens provides comprehensive online documentation on MindSphere through its MindSphere Academy and MindSphere Documentation Portal.
2.	"Industrial IoT: Challenges, Design Principles, Applications, and Security" by Sabina Jeschke, Christian K. Becker, and others.
3.	Machine Learning for the Internet of Things" by Nuno M. Garcia, Sergio V. Oliveira, and Joao P. Silva — addresses machine learning techniques designed for IoT applications, closely related to the analytics you can perform on MindSphere.

<b>Reference Books(s):</b>	
1	"Data Science for IoT Engineers" by Daniel K. Gardner.
2	"Applied Predictive Analytics: Principles and Techniques for the Professional Data Analyst" by Dean Abbott

Subject Code	Subject Name (Lab Oriented Theory Course)	Category	L	T	P	C
CS23A37	AUGMENTED REALITY AND VIRTUAL REALITY	PE	2	0	2	3
<b>For B.E. Programme CSE, CSECS and B.Tech. Programme in IT</b>						

Objectives:
<ul style="list-style-type: none"> <li>● To gain the knowledge of historical and modern overviews and perspectives on virtual reality.</li> <li>● To learn the fundamentals of sensation, perception, and perceptual training.</li> <li>● To have the scientific, technical, and engineering aspects of augmented and virtual reality systems.</li> <li>● To learn the Haptics and modelling from the lens of design.</li> <li>● To learn the technology of augmented reality and implement it various applications to have practical knowledge.</li> </ul>

UNIT-I	INTRODUCTION TO AUGMENTED REALITY AND VIRTUAL REALITY	6
Introduction to Virtual Reality and Augmented Reality – Definition – Introduction to Trajectories and Hybrid Space-Three I's of Virtual Reality – Virtual Reality Vs 3D Computer Graphics – Components of VR System – Introduction to AR-AR Technologies-Input Devices – 3D Position Trackers – Types of Trackers – Navigation and Manipulation Interfaces – Gesture Interfaces – Types of Gesture Input Devices – Output Devices – Graphics Display – Human Visual System – Personal Graphics Displays – Large Volume Displays – Sound Displays.		
UNIT-II	SENSATION AND PERCEPTION	6
Physiology of Perception, Cutaneous Senses, Pain, Olfaction, Gustation, Auditory System, Auditory Localization, Speech, Visual System, Object Perception, Motion Detection, Depth and Size Perception, psychophysical methods for computing perceptual thresholds.		
UNIT-III	MOBILE VR AND AR	6
VR UX with the Unity API, Interaction and Locomotion, Working with Mobile VR in Unity, Travel and Wayfinding in Virtual Environments, Strategies for Designing and Developing 3D UIs, Evaluation of 3D User Interfaces, Traditional and Emerging VR/AR applications.		
UNIT-IV	INTRODUCTION TO HAPTICS and MODELLING	6
Modeling – Geometric Modeling – Virtual Object Shape – Object Visual Appearance – Kinematics Modeling – Transformation Matrices – Object Position – Transformation Invariants – Object Hierarchies – Viewing the 3D World – Physical Modeling – Collision Detection – Surface Deformation – Force Computation – Force Smoothing and Mapping – Behavior Modeling – Model Management.		
UNIT-V	APPLICATIONS	6
Human Factors in VR – Methodology and Terminology – VR Health and Safety Issues – VR and Society-Medical Applications of VR – Education, Arts and Entertainment – Military VR Applications – Emerging Applications of VR – VR Applications in Manufacturing – Applications of VR in Robotics – Information Visualization – VR in Business – VR in Entertainment – VR in Education. Open-source toolkits/ libraries such as OpenScene Graph, Vega, VRML etc., Future AR/VR applications (holo teleportation, telepresence).		
<b>Contact Hours:</b>		<b>30</b>

List of Experiments		
1	Study of tools like Unity, Maya, 3DS MAX, AR toolkit, Vuforia and Blender	
2	Use the primitive objects and apply various projection types by handling camera. 3. Download objects from asset store and apply various lighting and shading effects	
3	Model three dimensional objects using various modelling techniques and apply textures over them.	
4	Create three dimensional realistic scenes and develop simple virtual reality enabled mobile applications which have limited interactivity.	
5	Develop VR enabled applications using motion trackers and sensors incorporating full haptic interactivity.	
6	Develop AR enabled applications with interactivity like E learning environment, Virtual walkthroughs and visualization of historic places.	
7	Develop AR enabled simple applications like human anatomy visualization, DNA/RNA structure visualization and surgery simulation.	
8	Develop simple MR enabled gaming applications.	
<b>Contact Hours:</b>		<b>30</b>
<b>Total Contact Hours:</b>		<b>60</b>

<b>Course Outcomes: On completion of the course, the students will be able to</b>	
●	Identify, examine, and develop software that reflects fundamental techniques for the design and deployment of VR and AR experiences.
●	The strength of how VR and AR systems work.
●	Choose, develop, explain, and defend the use of particular designs for AR and VR experiences.
●	Evaluate the benefits and drawbacks of specific AR and VR techniques on the human body.
●	Identify and examine state-of-the-art AR and VR design problems and solutions from the industry and academia.

CS23A39	GAME DEVELOPMENT	PE	2	0	2	3
<b>For B.E. Programme CSE, CSECS and B.Tech. Programme in IT</b>						

Objectives:
● To understand the history and overview of game design
● To develop the Game design document
● To apply the concepts of game loop, collision detection and Cameras
● To understand the concepts of graphics in game design
● To be able to incorporate various Mechanics in Developing game

UNIT-I	Introduction to Game Development	6
Games Overview; History of Games. Lecture: History and Generations of Video Games-Overview of Game Platforms-the Elements of Gameplay-Maths behind Game Development-Generic Programming		
UNIT-II	Game Design Document	6
Platforms-Input Devices-Game Genres-Game Design-Characters-Storyline-Levels and Environments-Game Play-Graphic Style and Art-Sound and Music-Game Controls-Accessibility-Marketing.		
UNIT-III	Concepts of Game Design	6
Game Loop-Collision Detection and Reaction-Common Issues with Collision Detection-Cameras-Screen Space Vs Game Space-Hybrid Approaches-Game Design-Game Mechanics-Rewarding the Player-Tips and Tricks-Virtual Resolution-Layering the Graphics-Palette Swapping		
UNIT-IV	Graphic Design for Game Development	6
Sound and Music-Digital Sound Processing-Fonts-Shaders-Patterns, containers and Classes-Design Pattern-Resource Manager-Ai in Video Games-Useful Algorithms		
UNIT-V	Mechanics in Developing in Game Design	6
Game Mechanics-I Frames-2D mechanics-RPG Like Games-Rhythm Games-Matchx Games-Cut Scenes-Testing your Game-Balancing your Game-No BS Principle-Managing Hype-Digital Rights Management-Game Jams		
<b>Contact Hours:</b>		<b>30</b>

List of Experiments		
1	Create a simple sprite animation using an open source tool.	
2	Narrate a simple game using scratch 2.0 (Character narration).	
3	Implement a scoring mechanism, such as collecting items or reaching certain milestones.	
4	Enhance the visual appeal of the game by adding animated sprites for player movement and other game elements.	
5	Implement basic AI behaviors, such as following the player when in range or patrolling between predefined points.	
6	Implement level transitions and progression.	
7	Incorporate sound effects for player movement, jumping, and interactions.	
8	Create menu screens for starting the game, pausing/resuming, and displaying game over information	
9	Optimize game performance, fix bugs, and polish game elements to improve the overall quality.	
<b>Contact Hours:</b>		<b>30</b>
<b>Total Contact Hours:</b>		<b>60</b>

<b>Course Outcomes:</b> On completion of the course, the students will be able to
● Understand the history and overview of game design
● Understand and develop the game design document
● Understand the collision mechanism, cameras and game loops
● Analyse and apply graphic design approaches for designing an game
● Choose efficient mechanic in developing and rolling out a game

CS23B31	Introduction to METAVERSE	PE	2	0	2	3
<b>For B.E. Programme CSE and B.Tech. Programme in IT</b>						

**Objectives:**

• To learn the basics of Metaverse characteristics, concepts and layers.
• To understand and analyse Metaverse technologies, tools and platforms.
• To discuss design theories and practices relevant to the Metaverse.
• To explore cybersecurity and cybercrime in the Metaverse.
• To explore metaverse applications and examine open challenges in the Metaverse.

<b>UNIT-I</b>	<b>Metaverse fundamentals</b>	<b>6</b>
Metaverse evolution-Metaverse importance and characteristics-The interdisciplinary nature of the Metaverse-Metaverse opportunities and risks- Computer-mediated communication -Avatar-mediated communication-layers of Metaverse: Experience-Discovery-Creator economy- Spatial computing- Decentralization - Human interface-Infrastructure		
<b>UNIT-II</b>	<b>Metaverse Technologies, Tools and Platforms</b>	<b>6</b>
<b>Metaverse Technologies:</b> AR/VR/MR/XR - 3D reconstruction - Game engines - Smart glasses- wearables, haptic devices, headsets and headwear -Blockchain, smart contracts, tokens, NFTs - Cryptography - Artificial Intelligence (AI) - Internet of Things (IoT) - Edge computing and 5G, 6G		
<b>Tools and technologies for Metaverse UX and UI:</b> Tools and services for avatar systems - Spatial user interface design - Cross-platform user experience design - Multimodal user interface- Technologies and devices for human computer interaction in Metaverse		
<b>Metaverse Platforms:</b> Decentraland, SANDBOX - Roblox, Axie Infinity- uHive, Hyper Nation - Nakamoto (NAKA), Metahero (HERO), Star Atlas (ATLAS)- Bloktopia (BLOK), Stageverse - Spatial, PalkaCity, Viverse -Sorare, Illuvium, Upland - Second Life, Sansar, Sensorium Galaxy		
<b>UNIT-III</b>	<b>Design theories and practices</b>	<b>6</b>
Social presence and co-presence - Motion sickness and cybersickness- Uncanny valley - Sense of self- location, sense of agency and sense of body ownership-Universal simulation principle- Prototyping- Evaluation techniques		
<b>UNIT-IV</b>	<b>Cybersecurity and Cybercrime in the Metaverse</b>	<b>6</b>
<b>Metaverse and cybersecurity:</b> Cybersecurity concerns in Metaverse: social engineering attacks, Data theft, Decentralization vs vulnerabilities - Cybersecurity risks in Metaverse: process, people, technology - Best practices for preventing cyberattacks in Metaverse: Risk assessment and mitigation, Physical security, Data encryption, Controlled access, Protect outbound data - Implementing cybersecurity in the Metaverse: Platform owners, Property owners/renters, Consumers/users		
<b>Metaverse and cybercrime:</b> Scam and theft- Rug pull- Money manipulation and wash trading- Money laundering		
<b>UNIT-V</b>	<b>Metaverse applications, challenges and open issues</b>	<b>6</b>
<b>Metaverse applications:</b> Gaming and entertainment- Travel and tourism - Education and learning- Real estate -Banking and Finance- Healthcare- social media- Fashion		
<b>Metaverse challenges and open issues:</b> Persistency - Interoperability and scalability- Maturity- Regulation- Usefulness and ease-of-use - Privacy and data security- Content creation- NFTs and creator economy - Social, legal and ethical issues in the Metaverse		
<b>Contact Hours</b>		<b>: 30</b>

<b>List of Experiments</b>	
<b>1</b>	Create and customize an avatar in a Metaverse platform (Decentraland, Second Life, or Roblox).
<b>2</b>	Analyze different layers of the Metaverse (Experience, Discovery, Creator Economy, etc.).
<b>3</b>	Build a simple AR application using WebAR or Unity.
<b>4</b>	Create a simple NFT and understand its role in the Metaverse.
<b>5</b>	Measure motion sickness symptoms when using VR applications.
<b>6</b>	Design a simple 3D virtual space.
<b>7</b>	Identify phishing and scam techniques used in the Metaverse.
<b>8</b>	Create a virtual classroom using a Metaverse platform.
<b>Tools:</b> Mozilla Hubs, Spatial.io, Gather.town. Unity, Unreal Engine, culus Quest 2, VRChat, Unity VR.	
<b>Contact Hours:</b>	
<b>Total Contact Hours:</b>	
<b>30</b>	
<b>60</b>	

<b>Course Outcomes: On completion of the course, the students will be able to</b>	
•	Understand the characteristics, and interdisciplinary nature of the Metaverse, the opportunities and risks it presents.
•	Analyze Metaverse layers, the technologies used in creating them, as well as design theories and practices for Metaverse.
•	Examine and discuss Metaverse platforms, applications and the latest technological developments in this area
•	Identify cybersecurity issues, understand cybercrime in the Metaverse
•	Discuss various applications and the open challenges in Metaverse

Correlation levels 1, 2 or 3 are as defined below:

1: Slight (Low)      2: Moderate (Medium)      3: Substantial (High)      No correlation”-“

Subject Code	Subject Name (Theory course)	Category	L	T	P	C
IT23E31	Graphics and Multimedia (Common to IT, CSE, CSE CS, CSD)	PE	2	0	2	3

Objectives:
• To gain knowledge about graphics hardware devices and software used.
• To understand the two-dimensional graphics and their transformations.
• To understand the three-dimensional graphics and their transformations.
• To appreciate illumination and color models
• To become familiar with hypermedia models

UNIT-I	INTRODUCTION	6
An Introduction Graphics System: Computer Graphics and Its Types, Application of computer graphics - Graphics Systems: Video Display Devices, Raster Scan Systems, Random Scan Systems, Graphics Monitors and Work Stations, Input Devices, Hard Copy Devices, Graphics Software - Scan Conversion Basics, Line, Circle and Ellipse drawing algorithms – Parallel Curve Algorithm – Filled Area Primitives.		
UNIT-II	2D PRIMITIVES	6
Two-dimensional Geometric Transformations: Basic Transformations, Matrix Representation and Homogeneous Coordinates, Composite Transformations, Reflection and Shearing. Two-Dimension Viewing: The viewing Pipeline, Window to view port coordinate transformation, Clipping Operations, Point Clipping, Line Clipping, Polygon Clipping, Text Clipping, Exterior Clipping.		
UNIT-III	3D CONCEPTS	6
Three-Dimensional Concepts: Three-Dimensional Display Methods, 3D Transformations, Parallel Projection and Perspective Projection Parallel and Perspective projections - 3D Concepts – 3D Object Representation, Polygons, Curved Lines, Splines, Quadratic Surfaces, Splines, B-Splines, Bezier Curves, Beta Splines, 3D Transformations, 3D Viewing – Visible surface identification, Elements of Color, Color Perception, Color Matching, Color Models – XYZ, RGB, YIQ, CMY, HSV -		
UNIT-IV	MULTIMEDIA SYSTEM DESIGN	6
Multimedia basics – Multimedia applications – Multimedia system architecture – Evolving technologies for multimedia – Defining objects for multimedia systems – Multimedia data interface standards – Multimedia databases. Compression and decompression – Data and file format standards – Multimedia I/O technologies – Digital voice and audio – Video image and animation – Full motion video – Storage and retrieval technologies.		
UNIT-V	HYPERMEDIA	6
Hypermedia messaging -Mobile messaging – Hypermedia message component – Creating hypermedia message – Integrated multimedia message standards – Integrated document management – Distributed multimedia systems. CASE STUDY: BLENDER GRAPHICS Blender Fundamentals – Drawing Basic Shapes – Modelling – Shading & Textures		
<b>Total Contact Hours: 30</b>		

List of the Experiments	Total Contact Hours: 30
1. Implement Bresenham's line algorithm, Midpoint Circle Algorithm, and Midpoint Ellipse Algorithm. Draw different geometric objects on the screen.	
2. Implement the scan conversion of a polygon and use flood-fill algorithms to fill areas in a graphics window.	
3. Write a program that performs translation, scaling, and rotation on basic 2D shapes (e.g., triangle, rectangle) using matrices.	
4. Write a program that clips polygons to a specified window and displays the clipped polygon.	
5. Write a program that allows the user to perform 3D transformations on basic 3D objects (cube, pyramid) and view the results.	
6. Create and render 3D objects (like cubes, spheres) using polygons and apply basic color and shading techniques.	
7. Create a multimedia application that integrates images, sound, and video in a simple user interface.	
8. Create a program that captures video/audio from a webcam or microphone and displays it on a multimedia interface.	
9. Create an application that allows users to send and receive multimedia messages including text, image, and audio.	
10. Create a simple 3D model using Blender (e.g., a house or object) and apply basic shading and textures to the model.	

<b>Course Outcomes:</b>
<ul style="list-style-type: none"> <li>To gain knowledge about graphics hardware devices and software used.</li> <li>To understand the two-dimensional graphics and their transformations.</li> <li>To understand the three-dimensional graphics and their transformations.</li> <li>To appreciate illumination and color models</li> <li>To become familiar with multimedia and hypermedia</li> </ul>

<b>SUGGESTED ACTIVITIES (if any) (UNIT/ Module Wise) – Could suggest topic</b>
<ul style="list-style-type: none"> <li>Problem solving sessions</li> <li>Flipped classroom - Comparing SOA with Client-Server and Distributed architectures</li> <li>Survey on various storage technologies</li> <li>Activity Based Learning</li> <li>Implementation of small module</li> </ul>

<b>SUGGESTED EVALUATION METHODS</b>
<ul style="list-style-type: none"> <li>Tutorial problems</li> <li>Assignment problems</li> <li>Quizzes</li> <li>Class Presentation/Discussion</li> </ul>

Subject Code	Subject Name (Lab Oriented Theory Course)	Category	L	T	P	C
CS23A38	DIGITAL MARKETING	PE	2	0	2	3
<b>For B.E. Programme CSE, CSECS and B.Tech. Programme in IT</b>						

<b>Objectives:</b>
<ul style="list-style-type: none"> <li>The primary objective of this module is to examine and explore the role and importance of digital marketing in today's rapidly changing business environment.</li> <li>It also focusses on how digital marketing can be utilised by organisations and how its effectiveness can measure.</li> </ul>

UNIT-I	INTRODUCTION TO ONLINE MARKET	6
Online Market space- Digital Marketing Strategy- Components -Opportunities for building Brand Website - Planning and Creation- Content Marketing.		
UNIT-II	SEARCH ENGINE OPTIMIZATION	6
Search Engine optimisation - Keyword Strategy- SEO Strategy - SEO success factors -On-Page Techniques - Off-Page Techniques. Search Engine Marketing- How Search Engine works- SEM components- PPC advertising -Display Advertisement		
UNIT-III	E - MAIL MARKETING	6
E- Mail Marketing - Types of E- Mail Marketing - Email Automation - Lead Generation - Integrating Email with Social Media and Mobile- Measuring and maximising email campaign effectiveness. Mobile Marketing- Mobile Inventory/channels- Location based; Context based; Coupons and offers, Mobile Apps, Mobile Commerce, SMS Campaigns-Profiling and targeting.		
UNIT-IV	SOCIAL MEDIA MARKETING	6
Social Media Marketing - Social Media Channels- Leveraging social media for brand conversations and buzz. Successful /benchmark social media campaigns. Engagement Marketing- Building Customer relationships - Creating Loyalty drivers - Influencer Marketing.		
UNIT-V	DIGITAL TRANSFORMATION	6
Digital Transformation & Channel Attribution- Analytics- Ad-words, Email, Mobile, social media, Web Analytics - Changing your strategy based on analysis- Recent trends in Digital marketing.		
<b>Contact Hours:</b>		<b>30</b>

List of Experiments		
1	Subscribe to a weekly/quarterly newsletter and analyze how its content and structure aid with the branding of the company and how it aids its potential customer segments.	
2	Perform keyword search for a skincare hospital website based on search volume and competition using Google keyword planner tool. 3. Demonstrate how to use the Google Web Masters Indexing API	
3	Discuss an interesting case study regarding how an insurance company manages leads.	
4	Discuss negative and positive impacts and ethical implications of using social media for political advertising.	
5	Discuss how Predictive analytics is impacting marketing automation.	
<b>Contact Hours:</b>		<b>30</b>
<b>Total Contact Hours:</b>		<b>60</b>

<b>Course Outcomes: On completion of the course, the students will be able to</b>
<ul style="list-style-type: none"> <li>To examine and explore the role and importance of digital marketing in today's rapidly changing business environment.</li> <li>To focusses on how digital marketing can be utilised by organisations and how its effectiveness can measure.</li> <li>To know the key elements of a digital marketing strategy</li> <li>To study how the effectiveness of a digital marketing campaign can be measured.</li> <li>To demonstrate advanced practical skills in common digital marketing tools such as SEO, SEM, social media and Blogs</li> </ul>

<b>Average</b>	<b>2.2</b>	<b>2.2</b>	<b>1.6</b>	<b>2</b>	<b>2.4</b>	<b>-</b>	<b>-</b>	<b>-</b>	<b>1.2</b>	<b>2.4</b>	<b>2</b>	<b>2.4</b>	<b>2.4</b>	<b>2.6</b>	<b>2</b>

Correlation levels 1, 2 or 3 are as defined below:

1: Slight (Low)      2: Moderate (Medium)      3: Substantial (High)      No correlation: “- “

Subject Code	Subject Name (Lab course)	Category	L	T	P	C
CD23721	VISUAL EFFECTS	PE	0	0	6	3
<b>For B.E. Programme CSE, CSECS, CSD and B.Tech. Programme in IT, AIML, AIDS</b>						

<b>Objectives:</b>	
•	To Understand the basic principles of visual effects, including CGI, compositing, and integration with liveaction footage.
•	To learn how to combine multiple elements (live-action,CGI, background) seamlessly into a single frame.
•	To explore techniques for creating and animating 3D models and environments for VFX projects.
•	To understand how to track motion in footage to integrate 3D elements effectively with real-world video.
•	To learn to simulate natural phenomena such as fire, smoke,water, nd explosions for realistic effects.

<b>LIST OF EXPERIMENTS</b>	
<b>GREEN SCREEN COMPOSITING</b>	
1	<p><b>Green Screen Compositing</b>  <b>Tools:</b> Adobe After Effects, Nuke, or DaVinci Resolve.  <b>Experiment Variants:</b> Experiment with different lighting setups on the green screen to minimize spill and maximize keying quality.</p>
2	<p><b>Rot scoping Techniques</b>  <b>Tools:</b> After Effects, Nuke, Mocha.  <b>Focus Areas:</b> Vary the complexity by tracking subjects with different motions and adding elements behind or in front of the roto-scoped layer</p>
3	<p><b>Motion Tracking and Match Moving</b>  <b>Tools:</b> After Effects, Blender, Cinema 4D.  <b>Variants:</b> Try planar tracking for surfaces and 3D tracking to simulate the camera movement for more immersive VFX scenes</p>
4	<p>Particle Simulation for Environmental Effects  <b>Tools:</b> Blender, Houdini, Maya.  <b>Experiment Variants:</b> Adjust particle behaviour to control effects like the density of snow or smoke spread based on environmental conditions</p>
5	<p><b>Dynamic Lighting and Shadow Matching</b>  <b>Tools:</b> Maya, Blender, or Nuke.  <b>Experiment Variants:</b> Test different lighting angles, intensities, and shadow softness to match the original footage's conditions.</p>
6	<p><b>Physics-Based Animation</b>  <b>Tools:</b> Blender, Houdini, Cinema 4D.  <b>Focus:</b> Experiment with gravity, elasticity, and friction settings to see how they impact object interactions.</p>
7	<p><b>Time Manipulation Effects</b>  <b>Tools:</b> After Effects, Premiere Pro.  <b>Variants:</b> Test speed-ramping (changing speeds mid-shot) and frame blending to make fast actions smoother or simulate slow-motion effects</p>
<b>Total Contact Hours</b>	
<b>90</b>	

<b>Course Outcomes:</b>	
•	Identify user interface for compositing, Views and Previews, Layers and Properties & Animation, Colours, Masks, Transparency and Keying, Text, Drawing and Painting, Motion Tracking, Effects and Animation, Presents, Rendering and Exporting.
•	Differentiate Image Based Motion Graphics & Video Based Motion Graphics.
•	Create Effects & Title effects.
•	Do colour correction & Keying after effects tools.
•	Use Match mover, Motion tracking Overview, Motion Tracking, Workflow and Controls, Rotoscoping, Wire Removal

Subject Code	Subject Name (Lab Oriented Theory Course)	Category	L	T	P	C
CD23731	FILM MAKING and RADI PODCASTING	PE	2	0	2	3
<b>For B.E. Programme CSE, CSECS, CSD and B.Tech. Programme in IT, AIML, AIDS</b>						

Objectives:
<ul style="list-style-type: none"> <li>To understand the fundamentals of visual storytelling, including scriptwriting and storyboarding.</li> </ul>
<ul style="list-style-type: none"> <li>To learn the technical aspects of camera operations, lighting, and shot composition.</li> </ul>
<ul style="list-style-type: none"> <li>To learn technical aspects of audio recording, mixing, and editing.</li> </ul>
<ul style="list-style-type: none"> <li>To design and produce a variety of radio content such as interviews, advertisements, and podcasts.</li> </ul>
<ul style="list-style-type: none"> <li>To create complete radio programs incorporating jingles, sound effects, and music.</li> </ul>

UNIT-I	Introduction to Media Production	6
Radio as a means of Mass Communication - Brief history of Radio from early years to the present stage - Print vs Electronic Media - Studio set-ups and productions - Field reporting		
UNIT-II	Radio Broadcasting Technologies	6
Public vs Private broadcasting systems in India - Radio Broadcasting Systems--MW, SW, FM - Internet Radio, Space Radio, Community Radio		
UNIT-III	A Guide to Radio Scriptwriting and Management	6
Scriptwriting for different formats of Radio - Elements of Radio scripts - Listing, scheduling and traffic management - Importance of Audience Surveys		
UNIT-IV	Functions of Radio in Public and Private Broadcasting Systems	6
Functions of Radio in the context of Public and Private Broadcasting systems - Types and formats of Radio programmes - News, Music, Interviews, Talks, Dramas – Discussions.		
UNIT-V	Art and Craft of Radio News Reporting	6
Art and Craft of Radio News Reporting - Locating radio news stories - Structure a radio news report - Tools and techniques of radio news reporting - Radio news interviews and vox pops		
<b>Contact Hours:</b>		<b>30</b>

List of Experiments		
<b>1</b>	Create a short video focusing on different shot types (close-up, medium, wide), camera angles, and movement techniques (panning, tilting, tracking).	
<b>2</b>	Set up different lighting setups (3-point lighting, high key, low key) and capture a scene to understand their impact on mood and aesthetics.	
<b>3</b>	Record audio separately from video and then synchronize it in post-production, focusing on lip-sync and ambient sound.	
<b>4</b>	Shoot footage with a green screen, remove the background in post-production, and place the subject into a virtual environment.	
<b>5</b>	Write a short script and direct a scene with actors, focusing on dialogue delivery, blocking, and character motivation.	
<b>6</b>	Design and mix sound effects, music, and dialogue for a short film clip.	
<b>Mini project:</b> Produce a short documentary (5-7 minutes) on a subject of choice, utilizing interviews, voice-over narration, and B-roll footage and create a 2–3-minute stop-motion animation using physical objects or clay figures.		
<b>Contact Hours:</b>		<b>30</b>
<b>Total Contact Hours:</b>		<b>60</b>

<b>Course Outcomes: On completion of the course, the students will be able to</b>	
•	Students understand the conceptual process of Radio Production.
•	Students evaluate the complexities of Radio Production as a means of mass communication.
•	Students create the Radio scripts and other practical implications of the radio production.
•	Students evaluate the complexities of the Radio Broadcasting in detail.
•	Students create Radio News Report and also the Radio feature reporting.

<b>Subject Code</b>	<b>Subject Name (Theory course)</b>	<b>Category</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
CS23A34	User Interface Design	PE	2	0	2	3
<b>For B.E. Programme CSE, CSECS and B.Tech. Programme in IT</b>						

<b>Objectives:</b>
<ul style="list-style-type: none"> <li>Analyze application structures to organize content clearly.</li> <li>Construct Navigation that enables users to easily accomplish tasks.</li> <li>Design page layouts that support findability of hierarchical content and task completion.</li> <li>Determine how to display data to meet user needs.</li> <li>Construct effective forms with focused input controls.</li> </ul>

<b>UNIT I</b>	<b>INTRODUCTION</b>	<b>6</b>
An overview of the user interface. Human factors in interface design: memory, chunking, recognition vs. recall. User interface design principles: user familiarity, consistency, minimal surprise, recoverability, user guidance, user diversity. Characteristics of Graphical User Interface: command line, menu selection, form fill-in, direct manipulation, anthropomorphic. Models of user interface - Generation of user interfaces-Graphical User Interface (GUI), Web User Interface (WUI), Voice User Interfaces (VUI), Tangible User Interfaces (TUI), Ubiquitous User Interfaces (UII). Next generation of user interfaces.		
<b>UNIT II</b>	<b>INTERFACE DESIGN METHODS</b>	<b>6</b>
Interface Design Methods: Characteristics of a GUI. Information presentation. Interaction styles. Direct manipulation. Direct Manipulation advantages. Indirect manipulation. Command interfaces. Problems with command interfaces. Command languages. Natural language interfaces. User interface design process. Lifecycle models. A simple interaction design model. Traditional 'waterfall' life cycle. A life cycle for RAD (Rapid Applications Development). The Star lifecycle model. Usability engineering lifecycle model: features. Menu systems. Problems with menu systems. Multiple user interfaces. Help and message system. Guidelines for error messages. Task analysis and modeling. Content analysis. Work environment analysis.		
<b>UNIT-III</b>	<b>IMPLEMENTATION OF GRAPHICAL USER INTERFACES</b>	<b>6</b>
Correctly designed software- Software layers. Widgets, buttons, callbacks. Working principles of widgets. Project plan. UI design. Low-level prototypes. Evaluation: user-centered. Users' steps. Evolving user understanding. Result. Colors. Layout.		
<b>UNIT IV</b>	<b>DIALOG AND STORYBOARDS</b>	<b>6</b>
Alignment on grids. I/O. Dialogs. Dialogs and storyboards. Input prototyping and design. Checks for inputs. Output. Data visualization. Examples. Challenges of visualization. Error messages.		
<b>UNIT-V</b>	<b>TESTING AND USABILITY ASSESSMENT</b>	<b>6</b>
Testing and Usability Assessment: User interface evaluation. Guiding principles for evaluation. Simple evaluation techniques. Process of evaluation. Approaches to evaluation. User observation. Preparing for user observation. Advantages of observation. Disadvantages of observation. Observation research tips. Importance of usability. Usability testing. Usability testing methods. Qualitative vs. Quantitative observation. Usability attributes. Testing. Formal vs. informal testing. Testing basics process		
<b>Total Contact Hours</b>		<b>: 30</b>

<b>Experiment No:</b>	<b>Title</b>	<b>Tools</b>
1	Design a UI where users recall visual elements (e.g., icons or text chunks). Evaluate the effect of chunking on user memory.	Pencil Project, Figma.
2.	Develop and compare CLI, GUI, and Voice User Interfaces (VUI) for the same task and assess user satisfaction.	Python (Tkinter for GUI, Speech Recognition for VUI), Terminal
3.	Create a prototype with familiar and unfamiliar navigation elements. Evaluate ease of use with different user groups.	Proto.io, Wireflow
4	Design two interfaces: one with direct manipulation (drag-and-drop) and another with indirect commands. Compare usability.	JavaScript (with libraries like D3.js), HTML/CSS.)
5.	Conduct task analysis for an app (e.g., online shopping) and document user flows. Create corresponding wireframes.	Lucid chart (free tier), Dia (open source).
6.	Simulate the lifecycle stages for UI design using the RAD model and develop a small interactive interface.	Axure RP, OpenProj.
7.	Implement a form-based GUI using widgets (e.g., radio buttons, text inputs). Add event handling for user interactions.	PyQt, Tkinter.

8.	Experiment with different layouts and color schemes for an app. Collect user feedback on aesthetics and usability.	Figma (free version), GIMP (open source for graphics).
9.	Develop low-fidelity paper prototypes for a banking app and convert them into digital wireframes.	Pencil Project, Inkscape.
10.	Create storyboards to represent the user flow for a mobile app (e.g., food delivery app).	Balsamiq, OpenBoard
11.	Design input forms that validate data (e.g., email, phone number) and display error messages.	HTML/CSS, JavaScript (with Validator.js).
12.	Create a data visualization (e.g., pie charts, bar graphs) for an inventory management system.	Java Script
13.	Conduct a heuristic evaluation of a simple website based on Jakob Nielsen's usability principles.	UsabilityHub, Google Sheets for evaluation recording.
14.	Perform usability testing on a small application, observing user interactions and documenting issues	OBS Studio for recording, Excel for data analysis.
15.	Execute both formal (structured) and informal (ad hoc) testing on a web application. Compare results.	Selenium, Jupyter Notebook

**Suggested Activities:**

- Assignment problems, Quiz.
- Class presentation/Discussion

**Course Outcomes:** On completion of course, you will be able to

- Understand the importance of user interface and benefits of good design.
- Understand the user interface design process and business function
- Understand the types of system menus and navigation schemes.
- Understand the characteristics of windows and device-based controls.
- Understand the screen-based controls and kinds of tests.

**Textbooks:**

CS23B34	Immersive Experience in AR/VR	PE	1	0	4	3
For B.E. Programme CSE, CSECS and B.Tech. Programme in IT						

**OBJECTIVES:**

• To learn basics of AR/VR
• To create 3D Modeling
• To create AR Application
• To create VR Application
• To develop a Real-Time Project in AR/VR

<b>UNIT-I</b>	<b>Technology Foundations, AR Development</b>	<b>3</b>
Definition and key concepts of Augmented Reality (AR) and Virtual Reality (VR), Historical context and evolution, Current trends and applications. Hardware components (sensors, displays, etc.), Software components (SDKs, engines), Platforms (ARKit, AR Core, Oculus, Etc.), Understanding 3D space and spatial computing, Choosing Development tools (Unity, Blender), Introduction to AR Development Frameworks, Hands-on experience with a simple Project.		
<b>UNIT-II</b>	<b>3D Modelling</b>	<b>3</b>
3D modelling basics, Textures, materials, lighting, Rigging, Animation.		
<b>UNIT-III</b>	<b>AR Development and Integration</b>	<b>3</b>
Vuforia Engine and its AR Functionalities, Marker-based vs Marker less Tracking, Common issues in AR development, Image Detection Applications. Common issues in AR development, Common issues in AR development, Common issues in AR development, Common issues in AR development.		
<b>UNIT-IV</b>	<b>VR Development</b>	<b>3</b>
Overview of VR development tools (Unity), Introduction to VR development frameworks, Hands-on experience with a simple VR project, VR user interfaces (UI), Implementing Basic VR Integration, User experience considerations in VR, Advanced VR Interactions, Implementing in VR, VR Optimization technique. Motion sickness Mitigation, Performance Optimization in VR		
<b>UNIT-V</b>	<b>Project Development in AR/VR</b>	<b>3</b>
Design Principles for immersive experiences, User testing in AR/VR, Iterative design process. Emerging trends in AR/VR. Project Development with AR/VR. Real Time Use Cases in AR/VR		
<b>Contact Hours :</b>		<b>15</b>

**List of Experiments**

**1. Marker-Based AR Experiments**

**Objective:** Develop and test AR applications using fiducial markers.

**Activities:**

- Identify markers using AR libraries (e.g., ARToolkit, Vuforia).
- Experiment with marker designs and recognition under varying conditions (lighting, angle, distance).
- Overlay virtual 3D objects on detected markers.
- Measure marker tracking accuracy.

<p><b>2. Markerless AR Experiments</b>  <b>Objective:</b> Create AR experiences using environmental tracking instead of markers.  <b>Activities:</b></p> <ul style="list-style-type: none"> <li>• Implement SLAM (Simultaneous Localization and Mapping) for real-world recognition.</li> <li>• Place virtual objects in real-world spaces using AR SDKs (e.g., ARCore, ARKit).</li> <li>• Evaluate object stability and precision in different environments.</li> </ul>
<p><b>3. Object Recognition and AR Overlays</b>  <b>Objective:</b> Use machine learning for real-time object recognition in AR.  <b>Activities:</b></p> <ul style="list-style-type: none"> <li>• Train a neural network to detect and recognize objects.</li> <li>• Overlay AR content dynamically based on object recognition.</li> <li>• Experiment with speed and accuracy across diverse datasets.</li> </ul>
<p><b>4. Gesture Recognition in AR</b>  <b>Objective:</b> Integrate AR applications with hand gestures or body movements.  <b>Activities:</b></p> <ul style="list-style-type: none"> <li>• Use a depth-sensing camera (e.g., Leap Motion, Microsoft Kinect).</li> <li>• Implement hand-tracking SDKs and algorithms to manipulate AR objects.</li> <li>• Test usability and responsiveness.</li> </ul>
<p><b>5. AR Navigation and Wayfinding</b>  <b>Objective:</b> Implement AR-based navigation systems.  <b>Activities:</b></p> <ul style="list-style-type: none"> <li>• Develop a path-guidance system overlaying routes on real-world environments.</li> <li>• Experiment with indoor and outdoor environments using ARCore/ARKit or similar tools.</li> <li>• Evaluate accuracy and user experience under different lighting and terrain conditions.</li> </ul>
<p><b>6. Motion Tracking and Locomotion Techniques</b>  <b>Objective:</b> Test and compare different VR locomotion methods.  <b>Activities:</b></p> <ul style="list-style-type: none"> <li>• Implement teleportation, joystick-based movement, and natural walking.</li> <li>• Measure user performance and susceptibility to motion sickness.</li> <li>• Evaluate how each technique affects task efficiency and user comfort.</li> </ul>
<p><b>7. VR-Based Simulation Training</b>  <b>Objective:</b> Develop and test training modules in a VR environment.  <b>Activities:</b></p> <ul style="list-style-type: none"> <li>• Simulate scenarios like flight training, surgery, or disaster response.</li> <li>• Assess the effectiveness of VR training compared to traditional methods.</li> </ul>
<p><b>8. Interaction Methods in VR</b>  <b>Objective:</b> Compare various interaction techniques for manipulating virtual objects.  <b>Activities:</b></p> <ul style="list-style-type: none"> <li>• Experiment with hand tracking, controllers, and gesture-based interactions.</li> <li>• Measure task completion times, accuracy, and user preference.</li> </ul>
<p><b>9. Visual Perception and Depth Cues in VR</b>  <b>Objective:</b> Explore how depth perception influences interaction and navigation.  <b>Activities:</b></p> <ul style="list-style-type: none"> <li>• Study the effects of stereoscopy, occlusion, shadows, and motion parallax on depth perception.</li> <li>• Evaluate user performance in spatial tasks under varying visual conditions.</li> </ul>
<p><b>10. VR and Cognitive Load</b>  <b>Objective:</b> Measure the impact of VR tasks on cognitive load and mental effort.  <b>Activities:</b></p> <ul style="list-style-type: none"> <li>• Use VR environments to test multitasking capabilities.</li> <li>• Monitor physiological responses (e.g., EEG, heart rate) alongside subjective feedback.</li> </ul>

<b>Hardware Requirements:</b>
1. Quest 3 Development Tool Kit 2. System with GTX/RTX Graphic Card Required
<b>Software Requirements:</b>
1. Unity 2. Blender

<b>Course Outcomes: On completion of the course, the students will be able to</b>
• Understand the Foundational Concepts of AR and VR
• Designing 3D Model
• Familiarize in AR Application development
• Familiarize in VR Application Development
• Experiencing Real Time Projects

<b>Textbooks:</b>
1. "Augmented Reality and Virtual Reality: Empowering Human, Place and Business" by M. Claudia tom Dieck and Patrick M. T. Griffin
2. "Programming 3D Applications with HTML5 and WebGL: 3D Animation and Visualization for Web" by Tony Parisi
3. "Understanding Virtual Reality: Interface, Application, and Design" by William R. Sherman and Alan B. Craig.

<b>Reference Books(s):</b>
1 "Augmented Reality: Principles and Practice" by Dieter Schmalstieg and Tobias Hollerer
2 "Unity Virtual Reality Projects" by Jonathan Linowes

**CO-PO-PSO Mapping Matrices:**

1: Slight (Low)    2: Moderate (Medium)    3: Substantial (High)    No correlation: "-"

Subject Code	Subject Name (Lab Oriented Theory course)	Category	L	T	P	C
CS23A32	Robotic Process Automation	PE	1	0	4	3

For B.E. Programme CSE, CSECS, CSD and B.Tech. Programme in IT, AIML, AIDS

Objectives:
<ul style="list-style-type: none"> <li>Prepare to become Junior RPA Developers.</li> <li>Learn the basic concepts of Robotic Process Automation.</li> <li>Develop familiarity and deep understanding of UiPath tools.</li> <li>Develop the ability to design and create robots for business processes independently.</li> <li>Develop skills required to pass UiPath Automation Developer Associate v1.0.</li> </ul>

List of Experiments	
1.	Downloading and Installing UiPath Academic Alliance and connect to Orchestrator.
2.	Installing UiPath Extension in Browsers.
3.	Installing Activity Packages in UiPath Studio - Manage Packages feature to find, install, update and remove packages.
4.	Experiments based on variables and arguments.
5.	Algorithmic Approach: Selection control structures.
6.	Algorithmic Approach: Iteration control structures.
7.	Debugging - Debug modes, debug actions and the debug ribbon option to debug a file or the entire Project and simple and conditional breakpoints and simple and conditional trace points.
8.	Exception Handling - Try Catch, Throw, Rethrow and Retry Scope.
9.	Logging - Apply logging best practices during development.
10.	UI Automation – Modern Recorder, Modern UI Automation Input Activities and Input Methods, Modern UI Automation Output Activities and Output Methods, UI Synchronization with activities available in the Modern Design Experience, static and dynamic Descriptors.
11.	Excel Automation.
12.	Email Automation.
13.	PDF Automation.
14.	Working with Files and Folders.
15.	Data Manipulation.
16.	Version Control Integration.
17.	Libraries and Templates.
18.	Workflow Analyzer
19.	Orchestrator: Invoice Processing – Dispatcher.
20.	Orchestrator: Invoice Processing – Performer.
<b>Contact Hours</b> : <b>75</b>	

Course Outcomes:
On completion of the course, students will be able to:
<ul style="list-style-type: none"> <li>Start working as Junior RPA Developers.</li> <li>Understand the fundamental principles of robotic process automation.</li> <li>Become familiar with and gain a thorough knowledge of UiPath's software tools.</li> <li>Design and build automation robots for business tasks on their own.</li> <li>Successfully pass the UiPath Automation Developer Associate v1.0 certification exam.</li> </ul>

Text Books:	
1.	UiPath Associate Certification Guide: The go-to guide to acing your Associate certification exam with the help of mock tests and quizzes, Niyaz Ahmed, Lahiru Fernando, Rajaneesh Balakrishnan, Packt Publishing Limited, 2022.
2.	Learning Robotic Process Automation: Create Software Robots and Automate Business Processes with the Leading RPA Tool – UiPath, Alok Mani Tripathi, Packt Publishing Limited, 2018.

Reference Books:	
1.	Robotic Process Automation Projects: Build real-world RPA solutions using UiPath and Automation Anywhere, Nandan Mullakara, Arun Kumar Asokan, Packt Publishing Ltd., 2020.
2.	The Robotic Process Automation Handbook: A Guide to Implementing RPA Systems, Tom Taulli, Apress, 2020.
3.	Democratizing Artificial Intelligence with UiPath: Expand automation in your organization to achieve operational efficiency and high performance, Fanny IP, Jeremiah Crowley, Packt Publishing Limited, 2022.
4.	UiPath Administration and Support Guide: Learn industry-standard practices for UiPath program support and administration activities, Arun Kumar Asokan, Packt Publishing, 2022.

Subject Code	Subject Name (Lab Oriented Theory course)	Category	L	T	P	C
CS23A33	Cyber Security and Forensics	PE	2	0	2	3
<b>For B.E. Programme CSE, CSECS, CSD and B.Tech. Programme in AIML, AIDS</b>						

<b>Objectives:</b>
<ul style="list-style-type: none"> <li>● To learn about Cyber Crime and Cyber Laws</li> <li>● To understand Cyber-attacks and tools to mitigate it.</li> <li>● To learn about Computer Forensics and understanding computer Investigation</li> <li>● To become familiar with evidence collection and forensics tools</li> <li>● To learn to analyze and validate forensic data</li> </ul>

<b>UNIT I</b>	<b>INTRODUCTION</b>	<b>6</b>
Cyber Security- History of Internet - Impact of Internet - Reason for Cyber Crime - Need for Cyber Security - History of Cyber Crime–Cybercriminals – Classification of Cybercrimes– A Global Perspective on Cyber Crimes – Cyber Laws- The Indian IT Act		
<b>UNIT II</b>	<b>ATTACKS AND COUNTERMEASURES</b>	<b>6</b>
Malicious Attack Threats and Vulnerabilities: Scope of Cyber-Attacks – Security Breach – Types of Malicious Attacks – Malicious Software – Common Attack Vectors – Social engineering Attack – Wireless Network Attack – Web Application Attack – Attack Tools – Countermeasures		
<b>UNIT-III</b>	<b>INTRODUCTION TO COMPUTER FORENSICS</b>	<b>6</b>
Introduction to Traditional Computer Crime and its problems – Introduction to Identity Theft & Identity Fraud – Types of CF techniques - Incident and incident response methodology - Forensic duplication and investigation – Preparation for IR: Creating response tool kit and IR team – Forensics Technology and Systems - Understanding Computer Investigation – Data Acquisition.		
<b>UNIT IV</b>	<b>EVIDENCE COLLECTION AND FORENSICS TOOLS</b>	<b>6</b>
Processing Crime and Incident Scenes – Working with Windows and DOS Systems –Current Computer Forensics Tools- Software/ Hardware Tools		
<b>UNIT-V</b>	<b>ANALYSIS AND VALIDATION</b>	<b>6</b>
Validating Forensics Data – Data Hiding Techniques – Performing Remote Acquisition – Network Forensics – Email Investigations – Cell Phone and Mobile Devices Forensics		
<b>Total Contact Hours</b>		<b>: 30</b>

<b>List of Experiments</b>		
1	Linux auditing using Lynis and increase the hardening index using security tools	
2	Hardening Linux OS using various configuration to reduce the attack surface	
3	Analyze Web Application Security using N-Stalker tool	
4	Perform open-source intelligence gathering using Netcraft, Whois Lookups, DNS Reconnaissance, Harvester and Maltego	
5	Live Data Acquisition of a folder and take its image using FTKImager	
6	Recover deleted file using FTKImager	
7	Analyze RAM dump using Volatility tool	
8	Collect Email Evidence in Victim PC and Extract Browser Artifacts (ChromeHistory view for Google Chrome)	
9	Perform Live Forensics Case Investigation using Autopsy	
10	Study Email Tracking and Email Tracing and write a report on them.

Subject Code	Subject Name (Lab Oriented Theory course)	Category	L	T	P	C
CS23A36	3D PRINTING AND DESIGN	PE	2	0	2	3
<b>For B.E. Programme CSE, CSECS, CSD and B.Tech. Programme in IT, AIML, AIDS</b>						

<b>Objectives:</b>
<ul style="list-style-type: none"> <li>● To discuss on basis of 3D Printing</li> <li>● To explain the file format of 3D Printing techniques</li> <li>● To explain the processes of 3D Printing</li> <li>● To explain and demonstrate INKJET technology</li> <li>● To explain and demonstrate laser technology</li> </ul>

<b>UNIT I</b>	<b>INTRODUCTION TO CAD</b>	<b>6</b>
<p>Coordinate systems: Geometric co-ordinate systems - Cartesian, Cylindrical and Spherical coordinate systems. Display co-ordinate systems - Global, Local, View and Screen coordinate systems.</p> <p>Curves: Definition - Parametric and non- parametric forms of analytical and synthetic curves. Analytical Curve modeling - Line Segment, Circle, Ellipse. Synthetic Curve modeling - Hermite Cubic Spline, Bezier, B-spline. Surfaces and types. Mathematical modeling of Solids: Properties of solid model, Solid modeling Techniques - Boundary representation, Constructive Solid Geometry, Analytical Solid Modeling, Sweep representation schemes. Solid Manipulation Techniques.</p>		
<b>UNIT II</b>	<b>STL FILE FORMAT AND MANIPULATION</b>	<b>6</b>
<p>Introduction, Preparation of CAD Models – The STL File Format, Binary/ASCII, Creating STL Files from a CAD System, Calculation of Each Slice Profile, Technology Specific Elements, Problems with STL Files, STL File Manipulation- Viewers, STL Manipulation on the AM Machine, Beyond the STL File- Direct Slicing of the CAD Model, Color Models, Multiple Materials, Use of STL for Machining.</p>		
<b>UNIT-III</b>	<b>3D PRINTING PROCESSES</b>	<b>6</b>
<p>Vat photo polymerization, Material jetting, Binder jetting, Powder bed fusion, Material extrusion, Directed energy deposition, Sheet lamination, 3D printing Processes limitations and Industrial applications.</p>		
<b>UNIT IV</b>	<b>INKJET TECHNOLOGY</b>	<b>6</b>
<p>Printer- Working Principle, Positioning System, print head, print bed, Frames, Motion control; Print head Considerations – Continuous Inkjet, Thermal Inkjet, Piezoelectric Drop-on-Demand; Material Formulation for jetting; Liquid based fabrication – Continuous jet, Multijet; power-based fabrication- Colourjet.</p>		
<b>UNIT-V</b>	<b>LASER TECHNOLOGY</b>	<b>6</b>
<p>Light Sources – Types, Characteristics; Optics – Deflection, Modulation; Material feeding and flow- Liquid, powder; Printing machines – Types, Working Principle, Build Platform, Print bed Movement, Support structures.</p>		
<b>Total Contact Hours</b>		<b>: 30</b>

<b>List of Experiments</b>		
1	Analyze the CAD software's interface and fundamental tools	
2	Study 3D printers including print head, build envelope, materials used and related support removal systems	
3	Review the Commands for moving from 2D to 3D	
4	Adept CAD commands for exploring 3D objects	
5	Design every Day Object Using Thingiverse, Shapeways, and GitFab <ul style="list-style-type: none"> <li>▪ Mobile Stand</li> <li>▪ Football</li> <li>▪ Tooth Brush</li> </ul>	
6	Use the CAM Software to prepare files for 3D Printing	
7	Manipulate machine movement and material layering	
<b>Contact Hours:</b>		<b>30</b>
<b>Total Contact Hours:</b>		<b>60</b>

<b>Course Outcomes: On completion of course, you will be able to</b>	
●	Outline and examine the basic concepts of 3D Printing technology using CAD software
●	Outline of File Format and manipulation
●	Students can able to understand the basics concepts of printing processes
●	Students can able to explain and categories the working principles of Inkjet technology
●	Students can able to explain and categories the working principles of laser technology

Course Code	Course Title (THEORY COURSE)	Category	L	T	P	C
CB23G11	Quantum Computation and Quantum Information	PE	3	0	0	3
<b>For B.E. Programme CSE, CSECS, CSD and B.Tech. Programme in IT, AIML, AIDS</b>						

<b>Objectives:</b>	
•	To learn about Quantum information.
•	To gain knowledge about Quantum algorithms.
•	To understand and learn about Quantum random number generators.
•	To study the basis of post-Quantum cryptography.

<b>UNIT-I</b>	<b>INTRODUCTION TO QUANTUM INFORMATION</b>	<b>9</b>
States, Operators, Measurements, Quantum Entanglement: Quantum Teleportation, Super-dense coding, CHSH Game, Quantum gates and circuits.		
<b>UNIT-II</b>	<b>QUANTUM ALGORITHMS</b>	<b>9</b>
Deutsch-Jozsa, Simon, Grover, Shor, Implication of Grover's and Simon's algorithms towards classical symmetric key cryptosystems, Implication of Shor's algorithm towards factorization and Discrete Logarithm based classical public key cryptosystems.		
<b>UNIT-III</b>	<b>QUANTUM TRUE RANDOM NUMBER GENERATORS</b>	<b>9</b>
Detailed design and issues of quantum Ness, Commercial products and applications.		
<b>UNIT-IV</b>	<b>QUANTUM KEY DISTRIBUTION</b>	<b>9</b>
BB84, Ekert, Semi-Quantum QKD protocols and their variations, Issues of Device Independence, Commercial products.		
<b>UNIT-V</b>	<b>INTRODUCTORY TOPICS IN POST-QUANTUM CRYPTOGRAPHY</b>	<b>9</b>
API-Public-key Signatures, Key Encapsulation Mechanism (KEM), Digital Signature standard, Pair-Wise Key Establishment-Discrete Logarithm Cryptography, Integer Factorization Cryptography.		
<b>Total Contact Hours</b>		<b>: 45</b>

<b>Course Outcomes:</b>	
On completion of the course, the students will be able to	
•	Apply quantum gates and circuits using quantum information.
•	Apply quantum algorithms in cryptosystems.
•	Understand the importance of Quantum random number generator.
•	Understand the importance of Quantum key distribution.
•	Apply the concept of post-quantum cryptography.

Subject Code	Subject Name (Lab Course)	Category	L	T	P	C
CS23B32	Advanced Application Development with Oracle APEX	PE	0	0	6	3
<b>B.E Programme for CSE</b>						

**Course Objectives:**

- To provide students with an understanding of Oracle APEX as a platform for rapid application development using Oracle Autonomous Database.
- To enable students to create, design, and manage database-driven applications with interactive features.
- To introduce advanced techniques for managing interactive reports, grids, and dynamic data visualization tools like cards and smart filters.
- To teach students how to enhance applications using dynamic actions, computations, processes, validations, and implement robust security features.
- To prepare students to handle application lifecycle tasks such as migrating development between environments and managing application data effectively.

**List of Experiments**

1. Setting up the environment and getting started with Oracle APEX.
2. Exploring SQL Workshop, creating tables, and executing SQL queries.
3. Creating database application and deploying it on APEX.
4. Adding and customizing pages and regions in an application.
5. Creating and formatting reports to visualize data.
6. Modifying interactive reports to enhance user interaction.
7. Managing and personalizing interactive grids in an application.
8. Adding page controls like buttons, list items, and selectors.
9. Integrating computations, processes, and validations for application logic.
10. Implementing dynamic actions to enhance user interactivity.
11. Designing and implementing advanced search and filter options.
12. Creating interactive forms and connecting them with database tables.
13. Designing and implementing navigation menus and breadcrumbs.
14. Customizing application look and feel using themes and styles.
15. Adding plugins and JavaScript to extend functionality.
16. Importing, exporting, and managing data within an application.
17. Implementing security measures like authentication and authorization.
18. Integrating new pages into the existing application structure.
19. Deploying and migrating applications across different environments.

**Contact Hours : 90**

**Course Outcomes:**

Upon completing the course, students will be able to:

- Demonstrate the ability to use Oracle APEX to create and deploy scalable database applications.
- Develop and customize pages, regions, forms, and navigation components for a seamless user experience.
- Integrate interactive reports, grids, dynamic actions, and search functionalities to enhance application interactivity and usability.
- Apply best practices for securing applications and managing data, including implementing authentication and authorization techniques.
- Exhibit proficiency in migrating applications between environments and extending their capabilities using themes, plugins, and advanced customization techniques.

**Software Requirements:**

1. Oracle APEX Installation Requirements  
URL: <https://docs.oracle.com/en/database/oracle/apex/24.1/htmig/apex-installation-requirements.html#GUID-02BE4A34-B631-412C-8A82-EB92DABBACE0>
2. Oracle Database Requirements  
Oracle APEX release 24.1 requires an Oracle Database release 19c or later. APEX runs on all database editions, including Enterprise Edition (EE), Standard Edition (SE), and Oracle Database Free. APEX can be installed in single-instance database and in Oracle Real Application Clusters (Oracle RAC) database.
3. Browser Requirements  
Oracle APEX requires a JavaScript-enabled browser and supports the current and prior major release of Google Chrome, Mozilla Firefox, Apple Safari, and Microsoft Edge.
4. Web Server Requirements

	Oracle APEX requires Oracle REST Data Services (ORDS) 20.x or later. The use of Quick SQL requires Oracle REST Data Services (ORDS) 23.3 or later.
5.	<b>Disk Space Requirement</b> <ul style="list-style-type: none"> <li>Free space for APEX software files on the file system: 599 MB if using English only download (apex_24.1_en.zip) and 983 MB if using full download (apex_24.1.zip).</li> <li>Free space in APEX tablespace: 190 MB</li> <li>Free space in SYSTEM tablespace: 125 MB</li> <li>Free space in APEX tablespace for each additional language (other than English) installed: 60 MB</li> </ul>
6.	<b>Oracle XML DB Requirement</b> Oracle XML DB must be installed in the Oracle database that you want to use if you are installing a full development environment. If you are using a preconfigured database created either during an installation or by Database Configuration Assistant (DBCA), Oracle XML DB is already installed and configured.
7.	<b>Free APEX Workspace</b> URL: <a href="https://apex.oracle.com/pls/apex/r/apex/quick-sign-up/request-workspace">https://apex.oracle.com/pls/apex/r/apex/quick-sign-up/request-workspace</a>

Subject Code	Subject Name (Lab Course)	Category	L	T	P	C
CS23B33	Introduction to Modern Databases with MongoDB	PE	0	0	6	3
<b>B.E Programme for CSE</b>						

**Course Objectives:**

- To introduce the fundamental concepts of modern general-purpose databases and distinguish between relational and non-relational database systems.
- To provide practical exposure to MongoDB's features, architecture, and developer ecosystem, including MongoDB Atlas.
- To enable students to design, query, and manipulate complex data using MongoDB Query Language (MQL) and aggregation frameworks.
- To develop skills in data modeling, indexing, sharding, and implementing transactions in MongoDB for scalable and efficient database applications.
- To explore the integration of MongoDB with modern application development through drivers, connectors, and real-time capabilities like change streams.

**List of Experiments**

1. Exploring the Features of a Modern General-Purpose Database.
2. Comparing Relational and Non-Relational Databases through Practical Examples.
3. Demonstrating Different Types of Non-Relational Databases.
4. Identifying Scenarios for Using Non-Relational Databases.
5. Understanding the Document Model and Getting Started with MongoDB.
6. Building Applications Using MongoDB as a Developer Data Platform.
7. Investigating MongoDB's Architecture with Hands-On Exploration.
8. Managing Databases in the Cloud Using MongoDB Atlas.
9. Writing Queries in Relational and Non-Relational Databases.
10. Crafting Queries Using MongoDB Query Language (MQL)
11. Querying Complex Data Structures in MongoDB Using MQL.
12. Applying Operators and Compound Conditions in MongoDB Queries.
13. Inserting and Updating Documents in MongoDB Collections.
14. Deleting Data Efficiently in MongoDB Collections.
15. Exploring the MongoDB Aggregation Framework.
16. Using the Aggregation Framework to Query Data in MongoDB.
17. Designing Data Models and Schema Patterns in MongoDB.
18. Implementing Sharding to Distribute Data Across Multiple Nodes in MongoDB.
19. Optimizing Query Performance with Indexing in MongoDB.
20. Implementing Transactions in MongoDB for Multi-Document Operations.
21. Real-Time Data Streams with Change Streams in MongoDB.
22. Integrating MongoDB with Applications Using Drivers, Connectors, and Exploring the Ecosystem.

**Contact Hours : 90**

**Course Outcomes:**

Upon completing the course, students will be able to:

- Differentiate between relational and non-relational databases and identify scenarios for the use of modern database systems.
- Utilize MongoDB to build, query, and manage databases effectively using MQL and aggregation techniques.
- Design and implement optimized schemas and data models, leveraging indexing and sharding for performance and scalability.
- Demonstrate the ability to handle transactions, manage data integrity, and perform real-time data streaming using MongoDB's advanced features.
- Integrate MongoDB with various application platforms using drivers and connectors to build robust, data-driven solutions.

BA23512	Fundamentals of Accounting	PC	3	0	0	3
<b>B.E. Programme for CSE and B.Tech. Programme for AIML, AIDS</b>						

<b>Objectives:</b>
<ul style="list-style-type: none"> <li>To create an awareness about the importance and usefulness of the accounting concepts and their managerial implications.</li> </ul>
<ul style="list-style-type: none"> <li>To develop an understanding of the financial statements and the underlying principles and learn to interpret financial statements.</li> </ul>
<ul style="list-style-type: none"> <li>To develop an understanding of project costing. Understand the different terms like cost, budget, estimate, margins. Recognize the different components that contribute to project costs, including direct costs, indirect costs, and overhead.</li> </ul>
<ul style="list-style-type: none"> <li>Understand the concept of cost-benefit analysis: Learn how to evaluate the financial viability of a project by comparing its costs to its benefits.</li> </ul>

<b>UNIT I</b>	<b>ACCOUNTING CONCEPT &amp; PROCESS</b>	<b>9</b>
Introduction, Techniques and Conventions, Financial Statements- Understanding & Interpreting Financial Statements. Book Keeping and Record Maintenance, Fundamental Principles and Double Entry, Journal format - Ledger format- Trial Balance format - balance sheets.		
<b>UNIT II</b>	<b>PROJECT COSTING &amp; TECHNIQUES</b>	<b>9</b>
Introduction to project costing and its importance in project management. Explore the different types of costs involved in projects. Project Costing Techniques – Top Down, Bottom Up, Analogous, Parametric.		
<b>UNIT-III</b>	<b>COST ELEMENTS AND ANALYSIS. COST CONTROL AND MONITORING</b>	<b>9</b>
Direct Costs (Labor, Material, Equipment), Indirect Costs (Overhead, General/Administrative), Risk/Contingency, Cost Benefit Analysis. Evaluating project profitability: EVM, NPV, IRR, payback period.		
<b>UNIT IV</b>	<b>ADVANCED COST MANAGEMENT ITEMS</b>	<b>9</b>
Risk Management - Identifying cost risks: Common sources and potential impacts. Risk mitigation strategies: Contingency planning, risk transfer. Cost control measures: Change management, performance monitoring.		
<b>UNIT-V</b>	<b>BUDGETING AND FINANCIAL PLANNING</b>	<b>9</b>
Creating a project budget, Budgeting techniques and tools, Financial Planning and forecasting.		
<b>Total Contact Hours</b>		<b>: 45</b>

<b>Course Outcomes: On completion of course, you will be able to</b>
<ul style="list-style-type: none"> <li>Understand the theories, concept, and different element of Cost management.</li> </ul>

Subject Code	Subject Name (Lab oriented Theory Course)	Category	L	T	P	C
IT23C31	Software Testing	PE	2	0	2	3
<b>For B.E. Programme CSE, CSECS, CSD and B.Tech. Programme in IT, AIML, AIDS</b>						

Objectives:
<ul style="list-style-type: none"> <li>To learn the criteria for test cases</li> <li>To learn the design of test cases.</li> <li>To understand test management and test automation techniques</li> <li>To understand test management and test structure group</li> <li>To apply test metrics and measurements</li> </ul>

<b>UNIT-I</b>	<b>INTRODUCTION</b>	<b>6</b>
Testing as an Engineering Activity – Testing as a Process – Testing Maturity Model- Testing axioms – Basic definitions – Software Testing Principles – The Tester’s Role in a Software Development Organization – Origins of Defects – Cost of defects – Defect Classes – The Defect Repository and Test Design		
<b>UNIT-II</b>	<b>TEST CASE DESIGN STRATEGIES</b>	<b>6</b>
Test case Design Strategies – Using Black Box Approach to Test Case Design – Using White Box Approach to Test design – Test Adequacy Criteria – static testing vs. structural testing – code functional testing – Coverage and Control Flow Graphs – Covering Code Logic – Paths – Secured Code Writing – code complexity testing		
<b>UNIT-III</b>	<b>LEVELS OF TESTING</b>	<b>6</b>
The need for Levels of Testing – Unit Test – Unit Test Planning – Designing the Unit Tests –Running the Unit tests and Recording results – Integration tests – Designing Integration Tests – Integration Test Planning – Scenario testing – Defect bash elimination System Testing – Acceptance testing – Performance testing – Regression Testing – Internationalization testing – Ad-hoc testing – Alpha, Beta Tests – Testing OO systems – Usability and Accessibility testing – Configuration testing –Compatibility testing .		
<b>UNIT-IV</b>	<b>TEST MANAGEMENT</b>	<b>6</b>
People and organizational issues in testing – Organization structures for testing teams – testing services – Test Planning – Test Plan Components – Test Plan Attachments – Locating Test Items – test management – test process – Reporting Test Results – Introducing the test specialist – Skills needed by a test specialist – Building a Testing Group- The Structure of Testing Group.		
<b>UNIT-V</b>	<b>TEST AUTOMATION</b>	<b>6</b>
Software test automation – skills needed for automation – scope of automation – design and architecture for automation – requirements for a test tool – challenges in automation – Test metrics and measurements – project, progress and productivity metrics		
<b>Contact Hours: 30</b>		

List of the Experiments	Total Contact Hours: 30
1. Demonstrate the working of the following a. constructs: i) do...while ii) while....do iii) if...else iv) switch v) for	
2. Take any system (e.g. ATM system) and study its system specifications and report the various bug	
3. Write the test cases for any known application (e.g. Banking application)	
4. Create a test plan document for any application (e.g. Library Management System)	
5. Study of any testing tool (e.g. Win runner)	
6. Study of any web testing tool (e.g. Selenium)	
7. Study of any bug tracking tool (e.g. Bugzilla, bugbit)	
8. Study of any test management tool (e.g. Test Director)	
9. Study of any open source-testing tool (e.g. Test Link)	

Course Outcomes: At the end of the course the students will be able to
<ul style="list-style-type: none"> <li>Design test cases suitable for a software development for different domains</li> <li>Identify suitable tests to be carried out</li> <li>Prepare test planning based on the document</li> <li>Document test plans and test cases designed</li> <li>Use Automatic Testing Tools and Develop and Validate a Test Plan</li> </ul>

**SUGGESTED ACTIVITIES (if any)**

- Survey on various Testing technologies
- Activity Based Learning

**SUGGESTED EVALUATION METHODS (if Any)**

- Assignment problems
- Quizzes
- Class Presentation/Discussion

Subject Code	Subject Name (Lab Oriented Theory Course)	Category	L	T	P	C
IT23B33	DevOps	PE	2	0	2	3

For B.E. Programme CSE, CSECS, CSD, CSBS and B.Tech. Programme in IT, AIML, AIDS

Objectives:
<ul style="list-style-type: none"> <li>Understand the principles and practices of DevOps.</li> <li>Gain proficiency in using DevOps tools like Git, Jenkins, Docker, Kubernetes, and Helm.</li> <li>Learn to implement CI/CD pipelines for automation and efficiency.</li> <li>Explore advanced topics like DevSecOps, security testing, and reducing deployment downtime.</li> <li>Apply DevOps concepts to real-world applications and projects.</li> </ul>

Unit – I	Introduction to DevOps	6
What is DevOps- DevOps Roots and Origin- Why Is DevOps Required- The DevOps Lifecycle and Workflow- DevOps Practices- DevOps Tools		
UNIT-II	DevOps CI/CD Pipeline	6
Managing Your Source Code with Git - Overviewing Git and its principal command lines- Understanding the Git process and Gitflow pattern- Continuous Integration and Continuous Delivery- CI/CD principles- Creating a CD pipeline – the release- Using GitLab CI- Using Jenkins for CI/CD implementation- Deploying Infrastructure as Code with CI/CD Pipelines-		
UNIT-III	Microservices with Docker and Kubernetes	6
Containerizing Your Application with Docker- Installing Docker- An overview of Docker's elements- Building and running a container on a local machine- Using Docker for running command-line tools- Docker Compose- Installing Kubernetes- Installing the Kubernetes dashboard- Using Helm as a package manager- Creating a CI/CD pipeline for Kubernetes with Azure Pipelines		
UNIT-IV	More on DevOps	6
Security in the DevOps Process with DevSecOps- Testing Azure infrastructure- Writing InSpec tests- Reducing Deployment Downtime- Blue-green deployment concepts and patterns- DevOps for Open-Source Projects- pull requests- Sharing binaries- GitHub Actions- Analyzing code with SonarCloud		
UNIT-IV	DevOps Best Practices	6
Choosing the right tool- Writing all your configuration in code- Designing the system architecture- Building a good CI/CD pipeline- Shifting security left with DevSecOp- Applying web security and penetration testing with ZAP- Running performance tests with Postman		
<b>Contact Hours: 30</b>		

List of Experiments
1. Exploring Git Commands through Collaborative Coding.
2. Implement GitHub Operations
3. Exploring Git Commands through Collaborative Coding.
4. Implement GitHub Operations
5. Applying CI/CD Principles to Web Development Using Jenkins, Git, and Local HTTP Server
6. Exploring Containerization and Application Deployment with Docker
7. Applying CI/CD Principles to Web Development Using Jenkins, Git, using Docker Containers
8. Demonstrate Container Orchestration using Kubernetes.
9. Create the GitHub Account to demonstrate CI/CD pipeline using Cloud Platform.
10. Reduce the Downtown using Blue-Green Deployment
11. Testing Project with ZAP and Postmen
<b>Contact Hours : 30</b>
<b>Total Contact Hours: 60</b>

Course Outcomes: Students will be able to
<ul style="list-style-type: none"> <li>Apply DevOps principles and lifecycle workflows to software development.</li> <li>Build and manage CI/CD pipelines for application development and deployment.</li> <li>Utilize tools like Docker and Kubernetes for containerization and orchestration.</li> <li>Implement DevSecOps practices for secure and reliable deployments.</li> <li>Demonstrate advanced DevOps practices such as blue-green deployment and testing.</li> </ul>

**SUGGESTED EVALUATION METHODS (if Any) (UNIT/ Module Wise) – could suggest topic**

- Lab assessment:
- Quizzes and Assignments
- Group project

**SUGGESTED ACTIVITIES****Case Study:**

Evolution of DevOps in industry-leading companies. Group discussion on the DevOps lifecycle and workflow.

- Code walkthrough:

Implementing a blue-green deployment strategy. Conducting security analysis using Sonar Cloud and GitHub Actions and walkthrough the code to the group.

Subject Code	Subject Name (Lab Oriented Theory Course)	Category	L	T	P	C
IT23B31	C# AND .NET PROGRAMMING	PE	2	0	2	3
<b>For B.E. Programme CSE, CSECS, CSD, CSBS and B.Tech. Programme in IT, AIML, AIDS</b>						

Objectives:
<ul style="list-style-type: none"> <li>To learn basic programming in C# and the object-oriented programming concepts</li> <li>To study the advance programming concepts in C#</li> <li>To understand the working of base class libraries, their operations and manipulation of data using XML</li> <li>To update and enhance skills in writing Windows application, WPF, WCF and WWF with C# and .NET</li> <li>To implement mobile applications using .Net compact framework</li> </ul>

<b>Unit – I</b>	<b>C# LANGUAGE BASICS</b>	<b>6</b>
.Net Architecture – Core C#– Objects and Types– Inheritance- Generics – Arrays and Tuples – Operators and Casts.		
<b>UNIT-II</b>	<b>C# ADVANCED FEATURES</b>	<b>6</b>
Delegates – Lambdas – Events– Strings and Regular Expressions – Collections –Asynchronous Programming- Memory Management and Pointers – Errors and Exceptions – Reflection.		
<b>UNIT-III</b>	<b>BASE CLASS LIBRARIES AND DATA MANIPULATION</b>	<b>6</b>
Diagnostics -Tasks, Threads and Synchronization – Manipulating XML–ADO.NET- Peer-to-Peer Networking – Core Windows Presentation Foundation (WPF).		
<b>UNIT-IV</b>	<b>WINDOW BASED APPLICATIONS, WCF AND WWF</b>	<b>6</b>
Core ASP.NET- ASP.NET Web forms -Windows Communication Foundation (WCF)– Introduction to Web Services –.Net Remoting -Windows Service – Windows Workflow Foundation (WWF)		
<b>UNIT-IV</b>	<b>.NET FRAMEWORK AND COMPACT FRAMEWORK</b>	<b>6</b>
Assemblies – Custom Hosting with CLR Objects – Core XAML – .Net Compact Framework – Compact Edition Data Stores – Errors, Testing and Debugging – Optimizing performance.		
<b>Contact Hours:</b>		<b>30</b>

<b>List of Experiments</b>	
1.	Write a console application that obtains four int values from the user and displays the product. Hint: you may recall that the Convert.ToDouble() command was used to convert the input from the console to a double; the equivalent command to convert from a string to an int is Convert.ToInt32().
2.	Write an application that receives the following information from a set of students: Student Id: Student Name: Course Name: Date of Birth: The application should also display the information of all the students once the data is Entered. Implement this using an Array of Structures
3.	Write a program to declare a class “staff” having data members as name and post. Accept this data 5 for 5 staffs and display names of staff who are HOD.
4.	Write a program to implement multilevel inheritance from following figure. Accept and display data for one student.
5.	Write a program to create a delegate called TrafficDel and a class called TrafficSignal with the following delegate methods. <pre> Public static void Yellow(){ Console.WriteLine(“Yellow Light Signal To Get Ready”); } Public static void Green(){ Console.WriteLine(“Green Light Signal To Go”); } Public static void Red(){ Console.WriteLine(“Red Light Signal To Stop”); } </pre> Also include a method IdentifySignal() to initialize an array of delegate with the above methods and a method show() to invoke members of the above array.
6.	Write a program to accept a number from the user and throw an exception if the number is not an even number.
7.	Create an application that allows the user to enter a number in the textbox named “getnum”. Check whether the number in the textbox “getnum” is palindrome or not. Print the message accordingly in the label control named lbldisplay when the user clicks on the button “check”.

8. Create a project that calculates the total of fat, carbohydrate and protein. Allow the user to enter into text boxes. The grams of fat, grams of carbohydrate and grams of protein. Each gram of fat is 9 calories and protein or carbohydrate is 4 calories. Display the total calories of the current food item in a label. Use to other labels to display and accumulated some of calories and the count of items entered. The form food has 3 text boxes for the user to enter the grams for each category include label next to each text box indicating what the user is enter.
9. Database programs with ASP.NET and ADO.NET. Create a Web App to display all the Empname and Deptid of the employee from the database using SQL source control and bind it to GridView . Database fields are (DeptId, DeptName, EmpName, Salary).
10. Programs using ASP.NET Server controls. Create the application that accepts name, password, age, email id, and user id. All the information entry is compulsory. Password should be reconfirmed. Age should be within 21 to 30. Email id should be valid. User id should have at least a capital letter and digit as well as length should be between 7 and 20 characters
<b>Contact Hours: 30</b>
<b>Total Contact Hours: 60</b>

<b>Course Outcomes: On completion of the course, the students will be able to</b>
• Write various applications using C# Language.
• Write various applications using advanced C# concepts
• Create window services, libraries and manipulating data using XML.
• Develop distributed applications using .NET Framework.
• Create mobile applications using .NET compact Framework

Subject Code	Subject Name (Theory Course)	Category	L	T	P	C
IT23A11	Internet of Things	PE	3	0	0	3
<b>For B.E. Programme CSE, CSECS and B.Tech. Programme in IT, AIML, AIDS</b>						

Objectives:
<ul style="list-style-type: none"> <li>To understand the basics of Internet of Things and communication protocols.</li> </ul>
<ul style="list-style-type: none"> <li>To understand the basic principles, architecture, and components, Methods of IoT systems.</li> </ul>
<ul style="list-style-type: none"> <li>To explore the hardware aspects, including microcontrollers (e.g., Arduino, Raspberry Pi) and sensors commonly used in IoT projects.</li> </ul>
<ul style="list-style-type: none"> <li>To gain hands-on experience with popular IoT platforms, Physical servers and cloud.</li> </ul>
<ul style="list-style-type: none"> <li>To learn how to process, analyze, and visualize data collected from IoT devices to derive actionable insights</li> </ul>

Unit – I	Introduction to Internet of Things	9
Introduction – Definition and characteristics of IoT – How IoT Works? – IoT Applications- Challenges of IoT – Advantages and Disadvantages of IoT - IoT Protocols – Logical Design of IoT: IoT Functional blocks – IoT Communication Models – IoT Communication APIs.		
UNIT-II	Internet of Things Architecture and Design Methodologies	9
IoT Architecture – IoT Reference Architecture – IOT Design Methodology: Domain Specification- Functional View, Information View, Operation and deployment, Device and Component Integration, Application development and deployment UNIT-III IOT ELEMENT		
UNIT-III	Internet of Things Hardware and Management	9
Building blocks of an IoT Device – Raspberry Pi, Arduino – Sensors, Communication Modules: Bluetooth, Zigbee, RFID - Power Sources –Data Management, Business Processes in IoT		
UNIT-IV	IOT Platforms and Cloud Management	9
Physical servers and cloud - XaaS, M2M, WAMP- AutoBahn for IoT – Xively Cloud for IoT – Django – Designing a RESTful Web API –Google cloud for IoT.		
UNIT-IV	Tools and Applications	9
Retail, Health care, Transportation, Agriculture and environmental, Smart city, Government and military, Smart home		
<b>Contact Hours: 45</b>		

Course Outcomes: On completion of the course, the students will be able to
<ul style="list-style-type: none"> <li>Know about IoT and its functionalities.</li> </ul>
<ul style="list-style-type: none"> <li>Interpret IoT Architecture.</li> </ul>
<ul style="list-style-type: none"> <li>Implement the various IoT elements and design the system.</li> </ul>
<ul style="list-style-type: none"> <li>Understand the IoT physical servers and cloud integration.</li> </ul>
<ul style="list-style-type: none"> <li>Design and develop the various applications in IoT</li> </ul>

#### SUGGESTED ACTIVITIES

**Case Study Analysis:** Analyze case studies that implement Internet of Things on the following Sectors- Retail, Health care, Transportation, Agriculture and environmental, Smart city, Government and military, Smart homes.

#### SUGGESTED EVALUATION METHODS

- Mini Projects
- Assignment problems
- Quizzes

Subject Code	Subject Name (Theory Course)	Category	L	T	P	C
IT23C12	Software Project Management (Common to IT, CSE, AIDS, CSD)	PE	3	0	0	3

Objectives:
<ul style="list-style-type: none"> <li>This course describes the key aspects of a software project.</li> </ul>
<ul style="list-style-type: none"> <li>It introduces the basic principles of Engineering Software Projects. Most, if not all, students' complete projects as part of assignments in various courses undertaken.</li> </ul>
<ul style="list-style-type: none"> <li>The course provides an understanding of the purpose, methods and benefits of process management by exposing the student to the concepts, practices, processes, tools and techniques used in process management for software development.</li> </ul>

UNIT-I	SOFTWARE DEVELOPMENT PROCESS	9
Defining of Software Development Process - Process - Tailoring the Process – Improving the process discipline - Need for implementing discipline. Software Production Process - Identify the Software Model - Software Process Models: Waterfall Model, Prototyping Model, RAD Model, Incremental Model, Spiral Model, Component Assembly Model - Software Life Cycle.		
UNIT-II	SOFTWARE PROJECT MANAGEMENT	9
Introduction to Software Project Management- Software Projects – ways of categorizing software projects – problems with software projects – Project Life Cycle– Management -Setting objectives –Stakeholders – Project Team- Step-wise: An overview of project planning -project Evaluation –Selection of Appropriate Project Objectives- Software Effort Estimation Techniques, Function Point Analysis-Object Point-COCOMO.		
UNIT-III	SOFTWARE PLANNING	9
Activity planning– project schedules – sequencing and scheduling projects – Network planning model – AON and AOA- identifying critical activities-Crashing and Fast Tracking-, Risk management—Categories, Risk planning, Management and Control – Evaluating risks to the schedule. PERT- Resource Allocation, Monitoring and Tracking – Monitoring and control – allocation – identifying resource requirements – scheduling resources – creating critical paths – publishing schedule – cost schedules- sequence schedule.		
UNIT-IV	SOFTWARE SPECIFICATIONS	9
Product Specifications - Defining the Final Product - Data Flow Diagram, Data Dictionary, Structured English, Decision Trees, Decision Tables - Feasibility Study. Software Testing: Test Plan - Development Testing: Verification and Validation - General Testing Methods: White Box and Black Box Testing - Unit Testing – System Integration Testing - Validation Testing - System testing.		
UNIT-V	SOFTWARE QUALITY	9
Software Quality - Quality Measures - FURPS - Software Quality Assurance – Software Reviews - Format Technical Review (FTR) Formal Approaches to SQA – Software Reliability - Introduction to SQA - The Software Quality Assurance Plan – Formal approaches to SQA - Clean room Methodology.		
<b>Total Contact Hours:45</b>		

Course Outcomes:
<ul style="list-style-type: none"> <li>Apply project management concepts and techniques to an IT project.</li> </ul>
<ul style="list-style-type: none"> <li>Identify issues that could lead to IT project success or failure.</li> </ul>
<ul style="list-style-type: none"> <li>Explain project management in terms of the software development process.</li> </ul>
<ul style="list-style-type: none"> <li>Describe the responsibilities of IT project managers.</li> </ul>
<ul style="list-style-type: none"> <li>Apply project management concepts through working in a group as team leader</li> </ul>

SUGGESTED ACTIVITIES
<ul style="list-style-type: none"> <li>Problem solving sessions</li> <li>Activity Based Learning</li> <li>Implementation of small module</li> </ul>

SUGGESTED EVALUATION METHODS
<ul style="list-style-type: none"> <li>Tutorial problems</li> <li>Assignment problems</li> <li>Quizzes</li> <li>Class Presentation/Discussion</li> </ul>

Subject Code	Subject Name (Theory course)	Category	L	T	P	C
IT23C17	Ubiquitous Computing (Common to IT, CSE)	PE	3	0	0	3

Objectives:
1. Understand the fundamental concepts and principles of ubiquitous computing.
2. Understand the architecture, lifecycle, and integration of smart devices and services in modern technological ecosystems.
3. Design and develop basic ubiquitous computing systems or applications.
4. Explore the principles and design of intelligent systems, focusing on interaction, autonomy, and artificial life.
5. Communicate effectively about ubiquitous computing concepts and applications.

UNIT-I	INTRODUCTION	9
Applications- Properties- Implicit Human Computer Interaction- Ubiquitous System Environment Interaction - Architectural Design for UbiCom Systems- Applications and Requirements: Example Early UbiCom Research Projects, Everyday Applications in the Virtual, Human and Physical World		
UNIT-II	SMART DEVICES	9
Smart Devices and Services - Service Architecture Models - Service Provision Life Cycle - Virtual Machines and Operating Systems- Smart Mobile Devices, Users, Resources and Code- Operating Systems for Mobile Computers and Communicator Devices - Smart Card Devices- Device Networks		
UNIT-III	HUMAN COMPUTER INTERACTION	9
Basic Concepts - User Interfaces and Interaction for Four Widely Used Devices - Hidden UI Via Basic Smart Devices - Hidden UI Via Wearable and Implanted Devices - Human Centred Design (HCD) - Tagging the Physical World - Sensors and Sensor Networks - Control Systems - Robots		
UNIT-IV	INTELLIGENT SYSTEMS	9
Basic Concepts, IS Architectures, IS System Operations - Interaction Multiplicity- Interaction Design -Generic Intelligent Interaction Applications- Autonomous Systems and Artificial Life		
UNIT-V	UBIQUITOUS COMMUNICATION	9
Audio Networks, Data Networks, Wireless Data Networks and Ubiquitous Networks- Managing Smart Devices in Virtual Environments and Human User Centered Environments		
<b>Total Contact Hours: 45</b>		

Course Outcomes:
1. Gain a comprehensive understanding of the principles and concepts underlying ubiquitous computing.
2. Design and implement service-oriented solutions leveraging smart devices and networks.
3. Understanding ubiquitous computing applications across various platforms, including mobile, wearable, and IoT devices.
4. Design intelligent systems with effective interaction and autonomous capabilities.
5. Apply ubiquitous computing principles to solve real-world problems and challenges such as healthcare, smart cities, and personalized services.

SUGGESTED ACTIVITIES (if any) (UNIT/ Module Wise) – Could suggest topic
<ul style="list-style-type: none"> <li>● Case study on ubiquitous computing</li> <li>● Survey on various application</li> <li>● Activity Based Learning</li> <li>● Implementation of small module</li> </ul>

SUGGESTED EVALUATION METHODS (if Any) (UNIT/ Module Wise) – could suggest topic
<ul style="list-style-type: none"> <li>● Tutorial problems</li> <li>● Assignment problems</li> <li>● Quizzes</li> <li>● Class Presentation/Discussion</li> </ul>

Subject Code	Subject Name (Lab oriented Theory course)	Category	L	T	P	C
CS23B35	Internet of Things: Concepts and Hands-on Applications	PE	1	0	4	3
<b>B.E. Programme for CSE</b>						

**OBJECTIVES:**

• To introduce the terminology, technology and its applications
• To introduce the concept of M2M (machine to machine) with necessary protocols
• To introduce the Python Scripting Language which is used in many IoT devices
• To introduce the Raspberry PI platform, that is widely used in IoT applications
• To introduce the implementation of web-based services on IoT devices

<b>UNIT-I</b>	<b>Introduction</b>	<b>3</b>
Definition and Characteristics of IoT, Sensors, Actuators, Physical Design of IoT – IoT Protocols, IoT communication models, IoT Communication APIs, IoT enabled Technologies – Wireless Sensor Networks, Cloud Computing, Embedded Systems, IoT Levels and Templates, Domain Specific IoTs – Home, City, Environment, Energy, Agriculture and Industry.		
<b>UNIT-II</b>	<b>IoT and M2M</b>	<b>3</b>
Software defined networks, network function virtualization, difference between SDN and NFV for IoT, Basics of IoT System Management with NETCONF, YANG- NETCONF, YANG, SNMP NETOPEER		
<b>UNIT-III</b>	<b>IoT Physical Devices and Controlling Hardware</b>	<b>3</b>
IoT Physical Devices and Endpoints- Introduction to Arduino and Raspberry Pi- Installation, Interfaces (serial, SPI, I2C) Controlling Hardware- Connecting LED, Buzzer, Switching High Power devices with transistors, Controlling AC Power devices with Relays, Controlling servo motor, speed control of DC Motor, unipolar and bipolar Stepper motors		
<b>UNIT-IV</b>	<b>Sensors</b>	<b>3</b>
Light sensor, temperature sensor with thermistor, voltage sensor, ADC and DAC, Temperature and Humidity Sensor DHT11, Motion Detection Sensors, Wireless Bluetooth Sensors, Level Sensors, USB Sensors, Embedded Sensors, Distance Measurement with ultrasound sensor		
<b>UNIT-V</b>	<b>IoT Physical Servers and Cloud Offerings</b>	<b>3</b>
Introduction to Cloud Storage models and communication APIs Web Server – Web server for IoT, Cloud for IoT, Python web application framework Designing a RESTful web API		
<b>Total Contact Hours</b>		<b>: 15</b>

**List of Experiments**

1	Use Light Dependent Resistor (LDR) and control an LED that should switch-on/off depending on the light.	
2	Create a traffic light signal with three colored lights (Red, Orange and Green) with a duty cycle of 5-2-10 seconds	
3	Switch on and switch of a DC motor based on the position of a switch.	
4	Convert an analog voltage to digital value and show it on the screen.	
5	Create a door lock application using a reed switch and magnet and give a beep when the door is opened.	
6	Control a 230V device (Bulb) with Raspberry Pi using a relay.	
7	Control a 230V device using a threshold temperature, using a temperature sensor.	
8	Create an application that has three LEDs (Red, Green and white). The LEDs should follow the cycle (All Off, Red On, Green On, White On) for each clap (use sound sensor).	
9	Create a web application for the above applications wherever possible with suitable modifications to get input and to send output.	
<b>Contact Hours</b>		<b>: 60</b>
<b>Total Contact Hours</b>		<b>: 75</b>

**Hardware Requirements:**

1. Arduino board, ultrasonic sensor, IR sensor, breadboard, jumper wires.
2. Raspberry Pi

**Software Requirements:**

1. Jupyter Notebook (Python), Anaconda.
2. Arduino IDE.
3. MATLAB

<b>Course Outcomes: On completion of the course, the students will be able to</b>	
•	Understand IoT value chain structure (device, data cloud), application areas and technologies involved.
•	Understand IoT sensors and technological challenges faced by IoT devices, with a focus on wireless, energy, power, and sensing modules
•	Market forecast for IoT devices with a focus on sensors
•	Explore and learn about Internet of Things with the help of preparing projects designed for Raspberry Pi
•	Design and analyze IoT servers and application needs.

## **OPEN ELECTIVE – OFFERED BY CSE**

Subject Code	Subject Name (Lab Oriented Theory Course)	Category	L	T	P	C
OCS2331	JAVA PROGRAMMING	OE	2	0	2	3
<b>B.E. Programme for CSE</b>						

Objectives:
<ul style="list-style-type: none"> <li>To understand Object Oriented Programming concepts and characteristics of Java.</li> </ul>
<ul style="list-style-type: none"> <li>To know the principles of classes, abstraction and inheritance.</li> </ul>
<ul style="list-style-type: none"> <li>To create packages, define exceptions and use interface.</li> </ul>
<ul style="list-style-type: none"> <li>To use I/O streams and Generics in applications.</li> </ul>
<ul style="list-style-type: none"> <li>To learn how to organize and handle data effectively in Java programs, making them faster and easier to manage using Collections</li> </ul>

<b>UNIT-I</b>	<b>INTRODUCTION TO OOP AND JAVA FUNDAMENTALS</b>	<b>6</b>
Introduction to Object Oriented Programming – Basic concepts of OOP - The History and Evolution of Java - An overview of Java - Java Architecture - Data Types - Variables- Arrays- Operators - Control Statements - String – String Buffer.		
<b>UNIT-II</b>	<b>CLASSES AND INHERITANCE</b>	<b>6</b>
<b>Classes</b> – Class Fundamentals - A Simple Class - Declaring Objects - Assigning Object Reference Variables - Methods - Constructors – this - <b>Inheritance</b> - Inheritance Basics - Member Access - super - Method Overriding - Dynamic Method Dispatch - Abstract Classes - final - Object Class.		
<b>UNIT-III</b>	<b>PACKAGES, INTERFACE &amp; EXCEPTION HANDLING</b>	<b>6</b>
<b>Packages</b> - Defining a Package - Access Protection - Imports - <b>Interfaces</b> - Implements - Nested Interfaces - <b>Exception Handling</b> - Types - try - catch - throw - throws - finally - User Defined Exceptions.		
<b>UNIT-IV</b>	<b>I/O AND GENERIC PROGRAMMING</b>	<b>6</b>
Input / Output Basics – Streams – Byte streams and Character streams – Reading and Writing Console – Reading and Writing Files – Generic Programming – Generic Classes – Generic Methods.		
<b>UNIT-V</b>	<b>COLLECTIONS</b>	<b>6</b>
Collection – Iterable - List Iterable - Collections - List – ArrayList - LinkedList- Vector – Stack - Set - HashSet – LinkedHashSet – SortedSet- TreeSet - Queue - PriorityQueue - Map - HashMap – TreeMap.		
<b>Total Contact Hours:</b>		<b>30</b>

<b>List of Experiments (If applicable)</b>		
<b>1</b>	Programs using data types and Operators.	
<b>2</b>	Programs using control structures.	
<b>3</b>	Programs using arrays.	
<b>4</b>	Programs using strings and string buffer.	
<b>5</b>	Programs using classes and objects.	
<b>6</b>	Programs using inheritance.	
<b>7</b>	Programs using Packages.	
<b>8</b>	Programs using Interfaces.	
<b>9</b>	Programs to create user defined exceptions.	
<b>10</b>	Programs using Files.	
<b>11</b>	Programs to implement Object Serialization.	
<b>12</b>	Programs using collections-LIST.	
<b>13</b>	Programs using collections-Stack and Queue.	
<b>14</b>	Programs using collections-SET.	
<b>15</b>	Programs using collections-MAP.	
<b>Contact Hours:</b>		<b>30</b>
<b>Total Contact Hours:</b>		<b>60</b>

Course Outcomes: On completion of the course, the students will be able to
<ul style="list-style-type: none"> <li>Develop Java programs using OOP principles and Strings.</li> </ul>
<ul style="list-style-type: none"> <li>Develop Java programs with the concept's inheritance.</li> </ul>
<ul style="list-style-type: none"> <li>Build Java applications using exceptions and interfaces.</li> </ul>
<ul style="list-style-type: none"> <li>Develop Java applications using I/O and collections.</li> </ul>
<ul style="list-style-type: none"> <li>Learning how to organize and handle data effectively in Java programs, making them faster and easier to manage using Collections.</li> </ul>

SUGGESTED ACTIVITIES
<ul style="list-style-type: none"> <li><b>Quizzes</b> – basic concepts of JAVA &amp; language basics</li> <li><b>Tutorial</b> – Class &amp; Inheritance</li> <li><b>Flipped Classroom</b> – Packages &amp; Interface</li> <li><b>Mind Map, Poster Design</b> – IO &amp; Generics</li> <li><b>Implementation of small Systems</b>- Collections</li> </ul>

SUGGESTED EVALUATION METHODS
<ul style="list-style-type: none"> <li><b>Quizzes</b> – basic concepts of JAVA &amp; language basics.</li> <li><b>Tutorial problems</b> - Applications &amp; Implementations using Inheritance</li> <li><b>Implementation</b> – small applications using exception handling</li> <li><b>Logical thinking</b> – solving problems using generics</li> <li><b>Mini Project</b> – Collections</li> </ul>

Correlation levels 1, 2 or 3 are as defined below:

1: Slight (Low) 2: Moderate (Medium) 3: Substantial (High) No correlation: “-”

Course Code	Subject Name (Lab Oriented Theory Course)	Category	L	T	P	C
OCS2332	DATA STRUCTURES USING C	OE	2	0	2	3
<b>B.E. Programme for CSE</b>						

**Objectives:**

- To introduce the basics of C programming language.
- To learn the concepts of advanced features of C.
- To understand the concepts of ADTs and linear data structures
- To know the concepts of non-linear data structure and hashing.
- To familiarize the concepts of sorting and searching techniques.

<b>UNIT-I</b>	<b>C PROGRAMMING FUNDAMENTALS</b>	<b>6</b>
Data Types – Variables – Operations – Expressions and Statements – Conditional Statements – Functions – Recursive Functions – Arrays – Single and Multi-Dimensional Arrays.		
<b>UNIT-II</b>	<b>C PROGRAMMING - ADVANCED FEATURES</b>	<b>6</b>
Structures – Union – Enumerated Data Types – Pointers: Pointers to Variables, Arrays and Functions– File Handling – Pre-processor Directives.		
<b>UNIT-III</b>	<b>LINEAR DATA STRUCTURES</b>	<b>6</b>
Abstract Data Types (ADTs) – List ADT – Array-Based Implementation – Linked List – Doubly- Linked Lists – Circular Linked List – Stack ADT – Implementation of Stack – Applications – Queue ADT – Priority Queues – Queue Implementation – Applications.		
<b>UNIT-IV</b>	<b>NON-LINEAR DATA STRUCTURES</b>	<b>6</b>
Trees – Binary Trees – Tree Traversals – Expression Trees – Binary Search Tree – Hashing - Hash Functions – Separate Chaining – Open Addressing – Linear Probing– Quadratic Probing – Double Hashing – Rehashing.		
<b>UNIT-V</b>	<b>SEARCHING AND SORTING TECHNIQUES</b>	<b>6</b>
Insertion Sort – Quick Sort – Heap Sort – Merge Sort –Linear Search – Binary Search.		
<b>Contact Hours</b>		<b>: 30</b>

**List of Experiments**

1.	C programs using single and multidimensional arrays	
2.	C program using Pointers	
3.	C program using structures	
4.	C programs for file handling	
5.	Implementation of Singly, Doubly, Circular Linked List	
6.	Implementation of Stack and Queue	
7.	Implementation of Binary Search Tree	
8.	Implementation of Hashing Techniques	
9.	Implementation of Searching algorithms using C	
10.	Implementation of Sorting algorithms using C	
<b>Contact Hours:</b>		<b>30</b>
<b>Total Contact Hours:</b>		<b>60</b>

**Course Outcomes: On completion of course, you will be able to**

- Develop C programs for any real world/technical application.
- Apply advanced features of C in solving problems.
- Suggest and use appropriate linear/non-linear data structure operations for solving a given problem.
- Apply appropriate hash functions that result in a collision free scenario for data storage and retrieval.
- Appropriately use sort and search algorithms for a given application.

**Suggested Activities:**

- Class lecture and discussion
- Small group activities and assignments
- Video and other media support
- Visit to special schools
- Peer reviews
- Research and presentation activities

**Suggested Assessment Methods:**

- Interactive Activities
- Quiz
- Mini Project
- CAT & Final Exams

**List of the Experiments**

1.	Customized seat cushion for wheelchair users.	
2.	Mobile app for detecting clothing colors and patterns to help a blind person dress independently.	
3.	Smart stick with sensing and a haptic interface designed for a blind person.	
4.	Android-based task-reminder	
5.	Customized mouse event handler for someone using only his eyes to control the mouse.	
6.	Voice-controlled tablet-based software to control various aspects of the user's environment.	
7.	Custom "no-spill" spoon for a person with a spinal cord injury to eat more easily.	
8.	Software/tools for improving cognitive functions	
9.	Development of multi-sensory games transcending to life skills	
10.	Development of AR technologies to learn with enjoyment	
11.	Diagnostic tools for assessing the levels of hearing impairment.	
12.	Identification of medicines, knowing expiry dates on packages including

Subject Code	Subject Name (Lab Oriented Theory course)	Category	L	T	P	C
OCS2334	Web Design and Development	OE	2	0	2	3
<b>B.E.Programme for CSE</b>						

Objectives:
• To understand the basic concepts in Web Design.
• To understand a dynamic web page using JavaScript
• To learn how to develop server-side programs using PHP
• To learn how to create Animations & Effect using JQuery
• To learn responsive websites using Bootstrap

UNIT I	WEB BASICS, HTML AND CSS	6
Web Basics: Clients, Servers, and Communication-Internet Overview-Basic Internet Protocols – HTML 5.0: Tables – Lists - Image - HTML5 control elements - Semantic elements - Drag and Drop - Audio - Video controls. CSS3.0: Inline, embedded and external style sheets - Rule cascading - Inheritance - Backgrounds - Border Images - Colors - Shadows - Text - Transformations - Transitions – Animations.		
UNIT II	CLIENT-SIDE SCRIPTING – JAVA SCRIPT	6
JavaScript Introduction – Variables and Data Types - Statements - Operators – Literals - Expressions and Control Flow in JavaScript - JavaScript Functions, Objects and Arrays - Regular Expression- Document Object Model (DOM) - Event handling – Validation.		
UNIT-III	SERVER-SIDE SCRIPTING - PHP	6
Introduction- Working principle of PHP -Variables - Constants - Operators - Flow Control and Looping - Arrays - Strings - Functions - File Handling -PHP and HTML - Simple PHP scripts - Databases with PHP.		
UNIT IV	JQUERY	6
JQUERY: Introduction to jQuery – Selectors – Elements: Manipulations, Changing and Setting elements – Event Models: Event handlers – Animations & Effects – Functions – Plugins.		
UNIT-V	BOOTSTRAP 5	6
Bootstrap Background and Features - Getting Started with Bootstrap - Grids - Components - Menus and Navigations - Plugins - Flexbox& Layouts.		
<b>Total Contact Hours</b>		<b>: 30</b>

List of Experiments		
1	Create a web page to embed a map along with hot spot frames & links.	
2	Create a web page using an embedded, external, and inline CSS file.	
3	Create an online job registration page along with java script validations.	
4	Write a PHP program for Employee Details, which includes EmpID, Name, Designation, Salary, DOJ, etc., to connect with the database and execute queries to retrieve and update data. Also, prepare the report for single and group of employees based on the end user needs.	
5	Create an online application in any of the web application like PHP for Tourism management like the available trip details in season based. Type of mode, Concession details for passengers and Booking / Cancelling tickets.	
6	Develop a Simple game using jQuery	
7	Develop an Attractive web pages using Bootstrap.	
8	Design a Web page with Navigation menu, Inline editor, Order form, Instant Search & Switchable Grid using Bootstrap	
<b>Contact Hours:</b>		<b>30</b>
<b>Total Contact Hours:</b>		<b>60</b>

<b>Platform Needed: Linux</b>	
<b>HARDWARE :</b>	Personal Computer with Dual Core Processor with 4 GB RAM.
<b>SOFTWARE :</b>	Gcc Compiler

<b>Suggested Activities:</b>	Assignment problems, Quiz. Class presentation/Discussion
------------------------------	---

<b>Course Outcomes: On completion of course you will be able to</b>
<ul style="list-style-type: none"> <li>• Know the basic concepts in Web Design.</li> <li>• Develop a dynamic web page using JavaScript</li> <li>• Develop a server-side programs using PHP</li> <li>• Design an Animations &amp; Effect using JQuery</li> <li>• Develop a responsive website using Bootstrap</li> </ul>

Course Code	Subject Name (Lab Oriented Theory course)	Category	L	T	P	C
OCS2335	APP DEVELOPMENT	OE	2	0	2	3
<b>B.E. Programme for CSE</b>						

Objectives:
<ul style="list-style-type: none"> <li>Understand Various App Development Paradigms.</li> </ul>
<ul style="list-style-type: none"> <li>Master Native App Development.</li> </ul>
<ul style="list-style-type: none"> <li>Explore Hybrid App Development.</li> </ul>
<ul style="list-style-type: none"> <li>Develop Skills in Cross-Platform Application Development.</li> </ul>
<ul style="list-style-type: none"> <li>Evaluate Non-Functional Aspects of Application Development.</li> </ul>

Unit-I	Fundamentals of Mobile and Web Application Development	6
Basics of Web and Mobile application development, Native App, Hybrid App, Cross-platform App, What is Progressive Web App, Responsive Web design.		
Unit-II	Native App Development	6
Native Web App, Benefits of Native App, Scenarios to create Native App, Tools for creating Native App, Cons of Native App, Popular Native App Development Frameworks.		
Unit-III	Hybrid App Development	6
Hybrid Web App, Benefits of Hybrid App, Criteria for creating Native App, Tools for creating Hybrid App, Cons of Hybrid App, Popular Hybrid App Development Frameworks.		
Unit-IV	Cross-Platform App Development	6
What is Cross-platform App?, Benefits of Cross-platform App, Criteria for creating Cross-platform App, Tools for creating Cross-platform App, Cons of Cross-platform App, Popular Cross-platform App Development Frameworks.		
Unit-V	Non-Functional Characteristics of App Frameworks	6
Comparison of different App frameworks, Build Performance, App Performance, Debugging capabilities, Time to Market, Maintainability, Ease of Development, UI/UX, Reusability.		
<b>Contact Hours:</b>		<b>30</b>

List of Experiments		
1.	Introduction to MIT App Inventor.	
2.	Develop an application for a BMI calculator.	
3.	Develop an application for a simple expense manager, which allows entering expenses and income on each day and displays category wise weekly income and expense.	
4.	Develop an application to convert units from imperial system to metric system (km to miles, kg to pounds etc.).	
5.	Design an application for a user login screen with username, password, reset button and a submit button. Also, include header image and a label. Use layout managers.	
6.	Build a Music and Video application.	
7.	Create an Alarm application.	
8.	Develop an accelerometer and Shaking, Random Numbers and Dolphin Game.	
9.	Develop a Find my Phone application.	
10.	Develop an interactive quiz application.	
11.	Develop a browser app.	
12.	Develop a list picker app with DB.	
13.	Design and develop an application for day-to-day task (to-do) management.	
14.	Design and develop an application to find and display the current location of the user.	
15.	Mini Project.	
<b>Contact Hours:</b>		<b>30</b>
<b>Total Contact Hours:</b>		<b>60</b>

<b>Platform Needed: Linux</b>	
<b>HARDWARE :</b>	PC with 8 GB RAM, i3 Processor
<b>SOFTWARE :</b>	Android Studio, Flutter SDK, MIT App Inventor.

<b>Course Outcomes: On completion of course, you will be able to</b>	
•	Proficiently Develop Various Types of Apps.
•	Utilize Development Tools Effectively.
•	Create Responsive and Progressive Web Apps.
•	Analyze and Compare App Development Frameworks.
•	Implement Best Practices in App Development.

**COURSES OFFERED BY CSE**  
**TO OTHER DEPARTMENTS**

<b>Subject Code</b>	<b>Subject Name (Lab Oriented Theory Course)</b>	<b>Category</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
GE23233	PROBLEM SOLVING AND PYTHON PROGRAMMING	ES	2	0	4	4
<b>B.E. Programme for CSE</b>						

<b>Objectives:</b>
<ul style="list-style-type: none"> <li>● To know the basics of algorithmic problems solving</li> <li>● To develop Python programs with conditionals and loops</li> <li>● To define Python functions and call them</li> <li>● To use Python data structures--lists, tuples, dictionaries</li> <li>● To do input/output with files in Python</li> </ul>

<b>UNIT-I</b>	<b>ALGORITHMIC PROBLEM SOLVING</b>	<b>6</b>
Introduction to computers-characteristics-basic organization of a computer– algorithms-building blocks of algorithms (instructions / statements, state, control flow, functions)-notation (pseudo code, flow chart, programming language) - algorithmic problem solving - simple strategies for developing algorithms (iteration, recursion).		
<b>UNIT-II</b>	<b>DATA, EXPRESSIONS, STATEMENTS AND CONTROL FLOW</b>	<b>6</b>
Python interpreter and interactive mode - values and types - data types – variables – keywords – expressions and statements- python I/O - operators- precedence of operators– comments. Conditionals: conditional (if)-alternative (if-else)-chained conditional (if- elif- else)–nested conditional.		
<b>UNIT-III</b>	<b>CONTROL FLOW – II AND FUNCTIONS</b>	<b>7</b>
Iteration: while – for - break – continue – pass. Illustrative programs: exchange the values of two variables- circulate the values of n variables-test for leap year. Function calls – type conversion– math function– composition- definition and use - flow of execution - parameters and arguments. Fruitful functions: return values – parameters - scope: local and global - recursion.		
<b>UNIT-IV</b>	<b>STRINGS</b>	<b>5</b>
Strings: string slices – immutability - string functions and methods – string comparison. Illustrative programs: square root– GCD– exponentiation-sum the array of numbers linear search- binary search.		
<b>UNIT-V</b>	<b>LISTS, TUPLES AND DICTIONARIES</b>	<b>6</b>
Lists - list operations - list slices - list methods - list loop – mutability – aliasing - cloning lists - list parameters. Tuples – immutable - tuple assignment - tuple as return value. Dictionaries: operations and methods– dictionaries and tuples– dictionaries and lists. Advanced list processing- list comprehension. Illustrative programs: Sorting.		
<b>Contact Hours</b>		<b>: 30</b>

<b>List of Experiments</b>			
1	Introduction to Python Programming and Python IDLE/Anaconda distribution.		
2	Experiments based on Variables, Data types and Operators in Python.		
3	Coding Standards and Formatting Output.		
4	Algorithmic Approach: Selection control structures.		
5	Algorithmic Approach: Iteration control structures.		
6	Experiments based on Strings and its operations.		
7	Experiments based on Lists and its operations.		
8	Experiments based on Tuples and its operations.		
9	Experiments based on Sets and its operations.		
10	Experiments based on Dictionary and its operations.		
11	Functions: Built-in functions.		
12	Searching techniques: Linear and Binary.		
13	Sorting techniques: Bubble and Merge Sort.		
<b>Contact Hours</b>			<b>: 60</b>
<b>Total Contact Hours</b>			<b>: 90</b>

<b>Course Outcomes: On completion of the course, the students will be able to</b>	
●	Understand the working principle of a computer and identify the purpose of a computer programming language and ability to identify an appropriate approach to solve the problem.
●	Write, test, and debug simple Python programs with conditionals and loops.
●	Develop Python programs step - wise by defining functions and calling them.
●	Use Python lists, tuples, dictionaries for representing compound data.
●	Apply searching, sorting on data and efficiently handle data using flat files.

Subject Code	Subject Name (Lab Oriented Theory Course)	Category	L	T	P	C
CS23232	FUNDAMENTALS OF DATA STRUCTURES USING C	ES	3	0	4	5
<b>B.E. Programme for CSE</b>						

<b>Objectives:</b>
<ul style="list-style-type: none"> <li>To learn the features of C</li> <li>To learn about functions, pointers and structures</li> <li>To explore the applications of linear data structures list</li> <li>To explore the applications of linear data structures stack and queue</li> <li>To learn the basic sorting and searching algorithms and about hashing</li> </ul>

<b>UNIT-I</b>	<b>PROGRAMMING BASICS</b>	<b>10</b>
Structure of a C program – Constants, Variables – Data Types – Expressions using operators in C – Managing Input and Output operations – Decision Making and Branching – Looping statements. Arrays – Initialization – Declaration – One dimensional and Two-dimensional arrays. Strings - String operations		
<b>UNIT-II</b>	<b>FUNCTIONS, POINTERS AND STRUCTURES</b>	<b>9</b>
Functions – Pass by value – Pass by reference – Recursion – Pointers - Definition – Initialization – Structures and unions - definition – Structure within a structure - Programs using structures.		
<b>UNIT-III</b>	<b>LINEAR DATA STRUCTURES – LIST</b>	<b>9</b>
Abstract Data Types (ADTs) – List ADT – array-based implementation – linked list implementation — singly linked lists– applications of lists –Polynomial Manipulation – All operation (Insertion, Deletion, Merge, Traversal)		
<b>UNIT-IV</b>	<b>LINEAR DATA STRUCTURES – STACKS, QUEUES</b>	<b>8</b>
Stack ADT – Evaluating arithmetic expressions- Balancing Symbols- Queue ADT – circular queue implementation – applications of queues		
<b>UNIT-V</b>	<b>SORTING, SEARCHING AND HASH TECHNIQUES</b>	<b>9</b>
Sorting algorithms: Insertion sort – Selection sort – Bubble sort – Quick sort – Merge sort – Searching: Linear search – Binary Search Hashing: Hash Functions – Separate Chaining – Open Addressing – Rehashing		
<b>Contact Hours</b>		<b>: 45</b>

<b>List of Experiments</b>			
1	Programs using, I/O statements and expressions.		
2	Programs using decision-making statements		
3	Programs using Arrays and Strings		
4	Programs using Functions		
5	Programs using Structures		
6	Linked list implementation of List		
7	Array implementation of Stack and Queue ADTs		
8	Linked list implementation of Stack and Queue ADTs		
9	Applications of List, Stack and Queue ADTs		
10	Implementation of Searching and Sorting algorithms		
11	Hashing –Linear probing

<b>Average</b>	<b>1.2</b>	<b>1.6</b>	<b>2.0</b>	<b>1.6</b>	<b>1.0</b>	-	-	-	<b>1</b>	<b>2</b>	<b>1.5</b>	<b>1.2</b>	<b>1.6</b>	<b>2.2</b>	<b>2</b>

Correlation levels 1, 2 or 3 are as defined below:

1: Slight (Low) 2: Moderate (Medium) 3: Substantial (High)

No correlation: “-“

Subject Code	Subject Name (Lab Course)	Category	L	T	P	C
CS23422	Python Programming for Machine learning	ES	0	0	4	2
<b>B.E. Programme for CSE</b>						

### Objectives:

- To understand the relationship of the data collected for decision making.
- To know the concept of principal components, factor analysis and cluster analysis for profiling and interpreting the data collected.
- Lay the foundation of machine learning and its practical applications and prepare students for real-time problem-solving in data science.
- Develop self-learning algorithms using training data to classify or predict the outcome of future datasets.
- Distinguish overtraining and techniques to avoid it such as cross-validation.

### List of Experiments for practice

1.	NumPy Basics: Arrays and Vectorized Computation		
2.	Getting Started with pandas		
3.	Data Loading, Storage, and File Formats		
4.	Data Cleaning and Preparation		
5.	Data Wrangling: Join, Combine, and Reshape		
6.	Plotting and Visualization		
7.	Data Aggregation and Group Operations		
8.	Time Series		
9.	Supervised Learning		
10.	Unsupervised Learning and Pre-processing		
11.	Representing Data and Engineering Features		
12.	Model Evaluation and Improvement		
<b>Contact Hours</b>		<b>:</b>	<b>60</b>

### Platform Needed: Linux

<b>HARDWARE</b>	:	Personal Computer with Dual Core Processor with 4 GB RAM.
<b>SOFTWARE</b>	:	GCC Compiler

### Course Outcomes: On completion of the course, students will be able to:

- Develop a sound understanding of current, modern computational statistical approaches and their application to a variety of datasets.
- Analyze and perform an evaluation of learning algorithms and model selection.
- Compare the strengths and weaknesses of many popular machine learning approaches.
- Appreciate the underlying mathematical relationships within and across machine learning algorithms and the paradigms of supervised and unsupervised learning.
- Design and implement various machine learning algorithms in a range of real-world applications.

<b>CS23422.5</b>	2	2	3	2	3	-	-	-	-	-	2	1	2	2	2
<b>Average</b>	<b>1.8</b>	<b>1.6</b>	<b>2.2</b>	<b>1.6</b>	<b>1.8</b>	<b>0.0</b>	<b>0.0</b>	<b>0.0</b>	<b>0.2</b>	<b>0.2</b>	<b>1.4</b>	<b>1</b>	<b>2.4</b>	<b>2.4</b>	<b>2</b>

Correlation levels 1, 2 or 3 are as defined below:

1: Slight (Low) 2: Moderate (Medium) 3: Substantial (High) No correlation: “-“

Subject Code	Subject Name (Laboratory Course)	Category	L	T	P	C
CS23336	INTRODUCTION TO PYTHON PROGRAMMING	ES	1	0	4	3

**B.E. Programme for CSE**

**Objectives:**

- To understand computers, programming languages and their generations and essential skills for a logical thinking for problem solving.
- To write, test, and debug simple Python programs with conditionals, and loops and functions
- To develop Python programs with defining functions and calling them
- To understand and write python programs with compound data-lists, tuples, dictionaries
- To search, sort, read and write data from /to files in Python.

**List of Experiments**

1. Study of algorithms, flowcharts and pseudocodes.
2. Introduction to Python Programming and Python IDLE/Anaconda distribution.
3. Experiments based on Variables, Data types and Operators in Python.
4. Coding Standards and Formatting Output.
5. Algorithmic Approach: Selection control structures.
6. Algorithmic Approach: Iteration control structures.
7. Experiments based on Strings and its operations.
8. Experiments based on Lists and its operations.
9. Experiments based on Tuples and its operations.
10. Experiments based on Sets and its operations.
11. Experiments based on Dictionary and its operations.
12. Functions: Built-in functions.
13. Functions: User-defined functions.
14. Functions: Recursive functions.
15. Searching techniques: Linear and Binary.
16. Sorting techniques: Bubble and Merge Sort.
17. Experiments based on files and its operations.

**Contact Hours** : 75

**Platform Needed: Linux**

<b>HARDWARE:</b>	Personal Computer with Dual Core Processor with 4 GB RAM.
<b>SOFTWARE:</b>	GCC Compiler

**Course Outcomes: On completion of the course, students will be able to:**

- Understand the working principle of a computer and identify the purpose of a computer programming language and ability to identify an appropriate approach to solve the problem.
- Write, test, and debug simple Python programs with conditionals and loops.
- Develop Python programs step - wise by defining functions and calling them.
- Use Python lists, tuples, dictionaries for representing compound data.
- Apply searching, sorting on data and efficiently handle data using flat files.
